Hot Wheels L2593

Hot Wheels X-Jet, Screen Time 4/10 [Black] Instruction Manual

Official User Guide for Model L2593

PRODUCT OVERVIEW

The Hot Wheels X-Jet is a 1:64 scale die-cast model, part of the Screen Time series, inspired by the Marvel X-Men universe. This collectible toy is designed for play and display, featuring a durable construction and detailed design.

This image displays the Hot Wheels X-Jet die-cast model, a black aircraft-like vehicle, sealed in its original blister packaging. The packaging features Marvel X-Men branding, Hot Wheels logo, and indicates it is part of the 'Screen Time' series, 4/10, and model 60/250. The recommended age is 3+.

SETUP

The Hot Wheels X-Jet is ready for use directly out of its packaging. No assembly or batteries are required.

1. Carefully remove the die-cast model from its blister packaging.
2. Inspect the model for any visible damage or manufacturing defects.
3. Ensure all wheels are securely attached and spin freely.

OPERATING INSTRUCTIONS

The Hot Wheels X-Jet is designed for imaginative play and collection. Its primary function is as a miniature vehicle for racing on Hot Wheels tracks or for display.

- **Playing:** Place the X-Jet on a flat surface or a compatible Hot Wheels track. Push the vehicle forward to initiate movement.
- **Collecting:** For collectors, handle the model with care to preserve its condition. Store it in a clean, dry environment away from direct sunlight.

MAINTENANCE

Proper care will ensure the longevity and appearance of your Hot Wheels X-Jet.

- **Cleaning:** Use a soft, dry cloth to gently wipe down the model. For stubborn dirt, a slightly damp cloth can be used, but avoid excessive moisture. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the X-Jet in a cool, dry place, away from extreme temperatures and humidity. If storing for extended periods, consider a display case or protective container to prevent dust accumulation and accidental damage.
- **Handling:** Always handle the die-cast model by its body, avoiding direct pressure on delicate parts like wings or small details.

TROUBLESHOOTING

While the Hot Wheels X-Jet is a simple and durable toy, here are some common issues and their resolutions:

Issue	Possible Cause	Solution
Wheels do not spin freely.	Debris caught in axle, bent axle, or manufacturing defect.	Check for and remove any visible debris. If the axle is bent or there's a defect, refer to the Warranty section.
Paint chipping or fading.	Rough play, exposure to harsh elements (sunlight, chemicals).	This is typically wear and tear. Ensure proper storage and gentle cleaning.
Missing or broken parts.	Accidental damage or manufacturing defect.	For manufacturing defects, refer to the Warranty section. For accidental damage, replacement parts are generally not available for individual die-cast models.

WARRANTY INFORMATION

Hot Wheels products, including the X-Jet, are often backed by a **Limited Lifetime Warranty**. This warranty typically covers manufacturing defects in materials and workmanship for the lifetime of the product under normal use.

Please refer to the original product packaging or the official Hot Wheels website for the most current and detailed warranty terms and conditions. Proof of purchase may be required for warranty claims.

CUSTOMER SUPPORT

For further assistance, questions, or to report any issues not covered in this manual, please contact Hot Wheels customer support.

- **Online Support:** Visit the official [Hot Wheels Store on Amazon](#) or the manufacturer's website (Mattel).
- **Contact Information:** Look for contact details (phone number, email) on the manufacturer's official website or product packaging.
