Govee H7062

Govee RGBIC Outdoor Flood Lights

USER MANUAL

Introduction

The Govee RGBIC Outdoor Flood Lights offer vibrant, customizable lighting solutions for your outdoor spaces. Featuring RGBIC technology, these smart lights allow for individual color control, a wide selection of scene modes, and convenient app control via WiFi or Bluetooth. They are designed for outdoor use with a high waterproof rating for the lights themselves, making them ideal for enhancing gardens, yards, and patios.

- **Color Changing Light Effects:** RGBIC technology for separate light color settings and 35 scene modes.
- **Hands-free Control:** Control via Govee Home app (WiFi/Bluetooth), compatible with Alexa and Google Assistant.
- **Outdoor Festival Light Effects:** Sync light effects to party and festival music with mic on your phone.
- **Endless Color Selection:** 16 million colors, 2700-6500K warm/cool whites, 500 lumens brightness.
- **Flood light Uplight 2 in 1:** Can be installed onto the wall and ground.

What's in the Box

Your Govee RGBIC Outdoor Flood Lights package includes the following components:

- 6 Pack Flood Lights
- Power Cable

Setup Guide

Follow these steps to set up your Govee RGBIC Outdoor Flood Lights:

1. Unpacking and Initial Inspection

Carefully remove all components from the packaging. Inspect each flood light and cable for any signs of damage. Ensure all listed components are present.

2. Connecting the Lights

The flood lights are connected to each other on one cord and cannot be cut. Connect the lights securely to the main power cable. Ensure all connections are tight to maintain the waterproof seal.

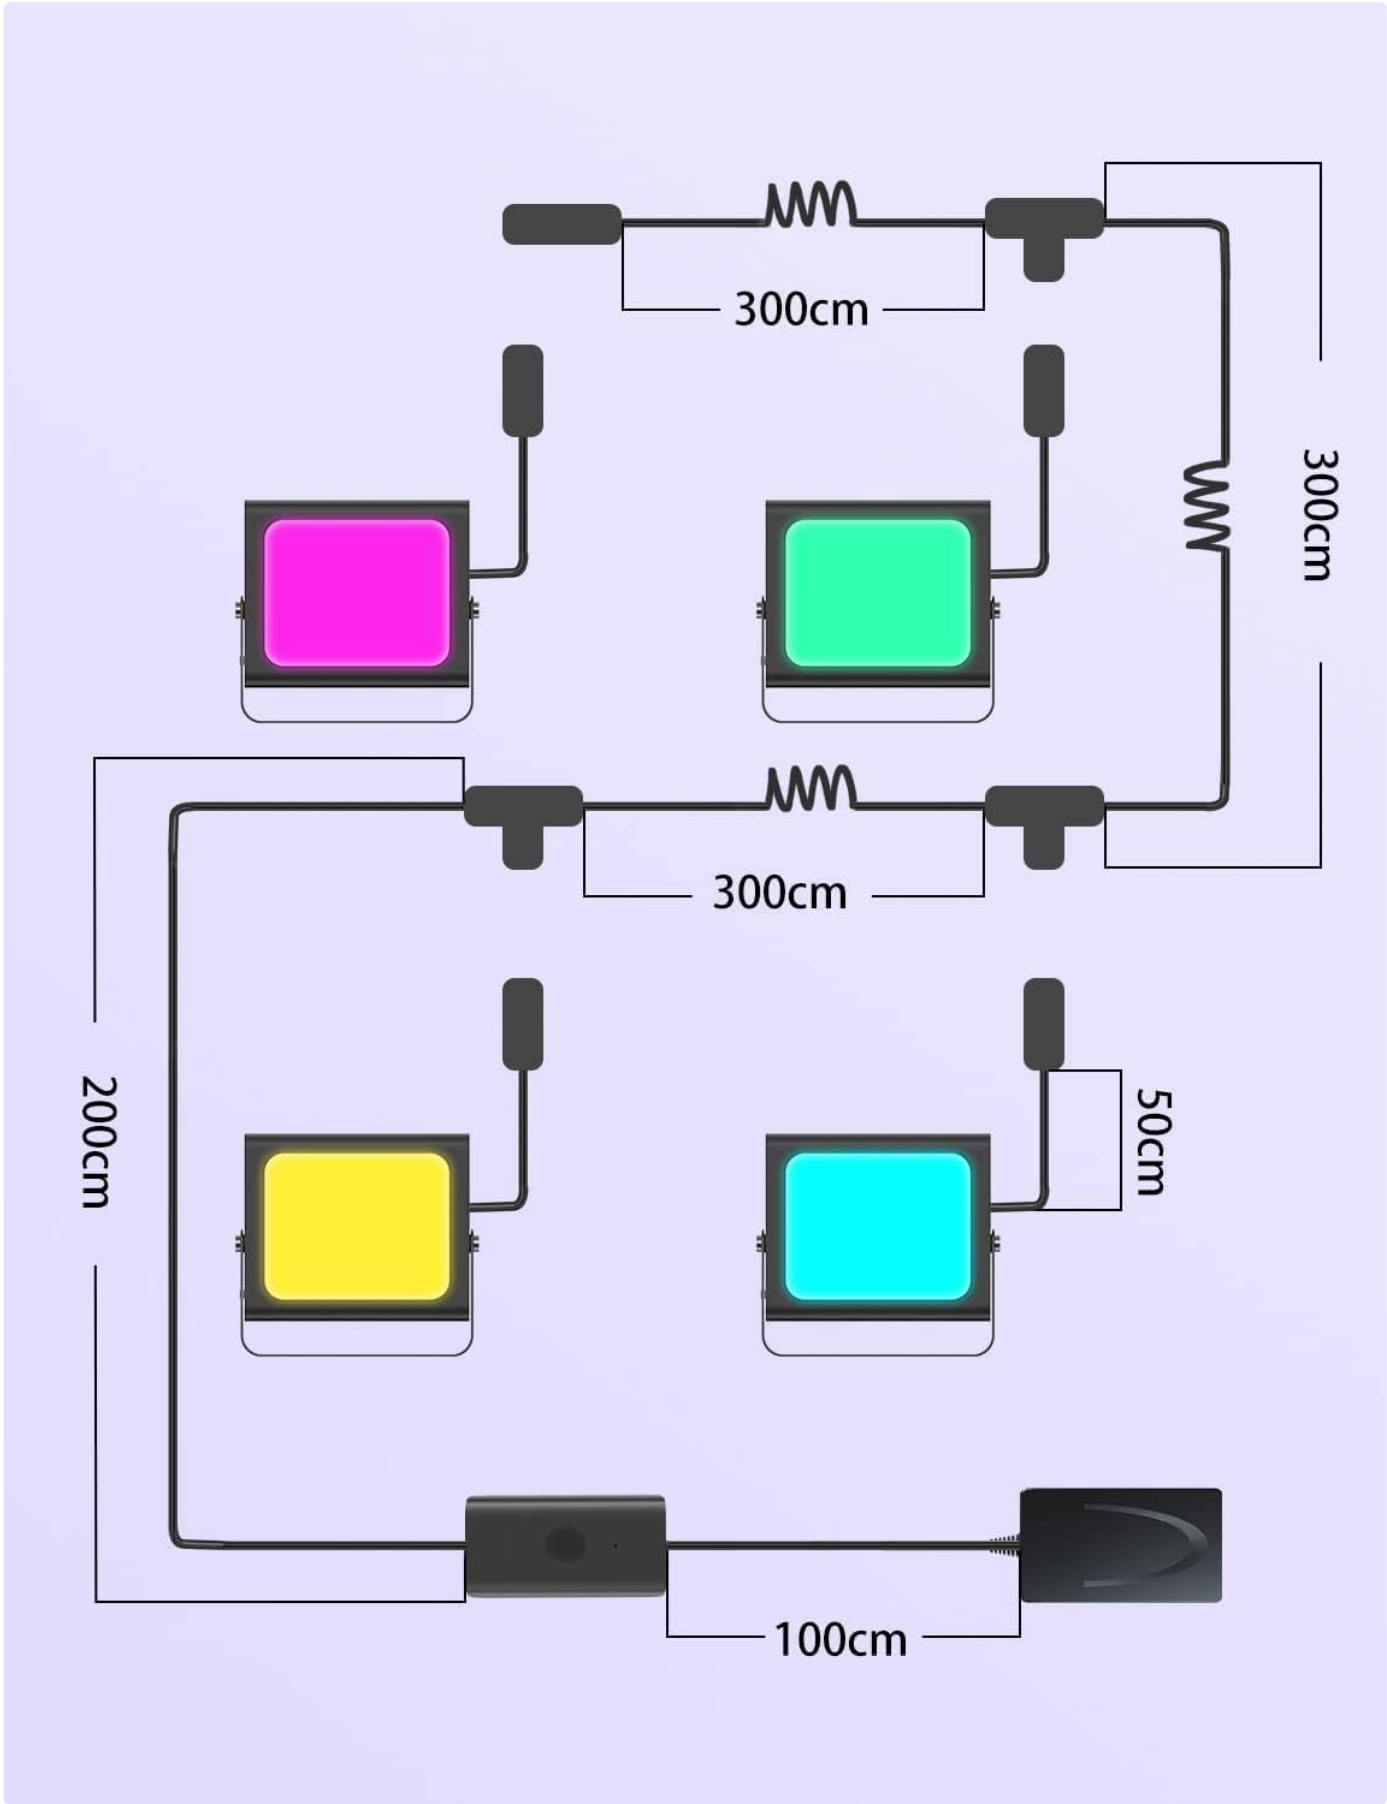

Image: A diagram illustrating the connection layout of the Govee flood lights, including cable lengths between each light and the main power source.

3. Placement and Installation

The lights can be installed onto the wall or directly into the ground using the provided stakes. Screws are not provided for wall mounting. Choose a location that allows for optimal light distribution and is within reach of a power outlet. Remember that the power adapter is IP44 rated, meaning it is splash-proof but not fully waterproof, and should be protected from direct water exposure.

4. Powering On and App Connection

Plug the power adapter into a suitable outdoor power outlet. Download the Govee Home app from your smartphone's app store. Follow the in-app instructions to add your new flood lights and connect them via WiFi or Bluetooth.

Operating Instructions

Once your Govee RGBIC Outdoor Flood Lights are set up and connected to the Govee Home app, you can begin customizing your lighting experience.

1. App Control

The Govee Home app provides comprehensive control over your lights. You can adjust brightness, select from 16 million colors, choose from 35 preset scene modes, and even create your own DIY lighting effects. The app also allows you to set timers for automatic on/off schedules.

2. Voice Control

These lights are compatible with Amazon Alexa and Google Assistant. Once integrated, you can use voice commands to control your lights, such as turning them on/off, changing colors, or activating scene modes.

3. Music Mode

Activate the music mode in the Govee Home app to synchronize your lights with the rhythm of your favorite music. The lights will change colors and patterns in response to sounds picked up by your phone's microphone.

Maintenance

Proper maintenance ensures the longevity and optimal performance of your Govee RGBIC Outdoor Flood Lights.

- **Cleaning:** Regularly wipe the lights with a soft, damp cloth to remove dirt and debris. Avoid using harsh chemicals or abrasive materials that could damage the finish or light panel.
- **Water Protection:** The lights themselves have an IP66 waterproof rating, making them highly resistant to dust and strong jets of water. However, the power adapter is IP44 rated and should be protected from direct exposure to heavy rain or standing water. Ensure the adapter is placed in a dry, sheltered location or within a waterproof enclosure.
- **Cable Management:** Periodically check the cables for any signs of wear, fraying, or damage. Secure cables to prevent tripping hazards and ensure they are not exposed to sharp objects or excessive tension.
- **Seasonal Storage:** If storing the lights for an extended period, clean them thoroughly, disconnect all power, and store them in a cool, dry place away from direct sunlight and extreme temperatures.

Troubleshooting

If you encounter issues with your Govee RGBIC Outdoor Flood Lights, try the following troubleshooting steps:

- **Lights Not Turning On:**
  - Ensure the power adapter is securely plugged into a working outlet.
  - Check all cable connections between the lights and the power cable for tightness.
  - Verify that the power outlet is receiving power (test with another device).
- **App Connectivity Issues:**
  - Make sure your smartphone's Bluetooth is enabled and you are within range of the lights.
  - Ensure your Wi-Fi network is active and the lights are connected to the correct network.
  - Restart the Govee Home app or your smartphone.
  - If issues persist, try resetting the lights (refer to the app or Govee support for specific reset procedures).
- **Inconsistent Lighting/Water Inside Lights:**

- While the lights are IP66 rated, extreme conditions or improper installation can sometimes lead to moisture ingress. If you notice water inside a light, immediately disconnect power to prevent electrical hazards.
- Contact Govee customer support for assistance if water ingress occurs, as this may indicate a product defect or require professional attention.
