## SETUP AND ASSEMBLY

Follow these steps for proper assembly of your Alphas model kit. Refer to the included graphical instructions for detailed part identification and placement.

1. **Unboxing and Part Identification:** Carefully open the package and lay out all runner frames. Identify each part according to the assembly guide. It is recommended to use a hobby nipper to cleanly remove parts from the runners.
2. **Body Assembly:** Begin by assembling the core body, including the torso and head. Pay attention to the orientation of joints and connection points.
3. **Limb Assembly:** Assemble the arms and legs. The Alphas kit features advanced articulation, so ensure all joints are correctly aligned and move smoothly.
4. **Booster and Cape Assembly:** Attach the multi-axis movable boosters and the iconic cape to the back of the figure. These components are designed for dynamic posing. The boosters feature movable fins and unfolding gimmicks.
5. **Accessory Assembly:** Assemble the Divine Sword Grade Alpha and prepare the Digitalize of Soul PET plastic effect sheets. These sheets have a unique arranged design for enhanced visual expression.

6. **Sticker Application:** Carefully apply the included stickers to the designated areas on the model. Use tweezers for precise placement.
7. **Final Assembly:** Connect all assembled sections to form the complete Alphamon figure.

## OPERATING AND POSING

The Alphamon Figure-Rise Standard Amplified model kit is designed for extensive articulation, allowing for a wide range of dynamic poses.

- **Joint Movement:** Gently manipulate the joints in the arms, legs, torso, and head to achieve desired poses. Avoid excessive force to prevent damage.
- **Booster and Cape Articulation:** The boosters and cape on the back feature multi-axis movable connectors. Adjust these to create dramatic and expressive stances. The booster fins can also be unfolded.
- **Accessory Posing:** Position the Divine Sword Grade Alpha in the figure's hand. Utilize the Digitalize of Soul effect sheets to enhance action poses.
- **Stability:** For complex or dynamic poses, consider using a display stand (sold separately) to ensure stability and prevent the figure from falling.

## MAINTENANCE

---

Proper care will ensure the longevity and appearance of your model kit.

- **Cleaning:** Dust the model regularly with a soft brush or a can of compressed air. For stubborn dirt, gently wipe with a slightly damp cloth, then dry immediately. Avoid harsh chemicals or abrasive cleaners.
- **Storage:** Store the model in a cool, dry place away from direct sunlight and extreme temperatures, which can cause plastic degradation or discoloration.
- **Handling:** Always handle the model by its main body parts. Avoid gripping small, delicate components or accessories too tightly.

## TROUBLESHOOTING

---

If you encounter any issues during assembly or display, refer to the following common solutions:

- **Parts Not Fitting:**
  - Ensure the parts are correctly oriented according to the instructions.

- Check for any excess plastic (nubs) left from the runner. Carefully trim them with a hobby knife or nipper.
  - If a joint is too tight, gently widen the peg hole slightly with a small drill bit or hobby knife. If too loose, apply a thin layer of clear nail polish or super glue to the peg and let it dry completely before reattaching.
- **Stickers Peeling/Not Adhering:**
    - Ensure the surface is clean and dry before application.
    - Use tweezers for precise placement and press firmly to remove air bubbles.
    - For better adhesion, a small amount of decal setter solution can be used (follow product instructions).
- **Figure Instability:**
    - Verify all joints are fully connected and secure.
    - Adjust the pose to distribute weight evenly.
    - Consider purchasing a compatible display stand for more dynamic or stable poses.
