3.3. Connecting the Smart Plug

Ensure your Wi-Fi network is 2.4GHz. The smart plug does not support 5GHz Wi-Fi.

1. Plug the ANTELA Smart Plug into a standard wall socket.
2. Open the Smart Life app.
3. Tap the "+" icon in the top right corner to add a device.
4. Select "Electrical Outlet" or "Socket (Wi-Fi)" from the device list.
5. Follow the on-screen instructions to connect the plug to your 2.4GHz Wi-Fi network. This typically involves confirming the indicator light on the plug is blinking rapidly and entering your Wi-Fi password.
6. Once connected, you can rename the device for easier identification (e.g., "Living Room Lamp").

4. Operating Instructions

4.1. Manual Control

Each smart plug has a physical power button. Press it once to turn the connected appliance on or off.

4.2. App Control (Remote Control)

Once connected to the Smart Life app, you can control your smart plug from anywhere with an internet connection:

1. Open the Smart Life app.
2. Select the desired smart plug from your device list.
3. Tap the power icon to toggle the connected appliance on or off.

4.3. Voice Control (Alexa/Google Home)

To enable voice control, link your Smart Life account to Amazon Alexa or Google Home:

1. Open the Alexa or Google Home app.
2. Navigate to "Skills & Games" (Alexa) or "Works with Google" (Google Home).
3. Search for "Smart Life" and enable the skill/service.
4. Link your Smart Life account using your Smart Life credentials.
5. Discover devices.

Once linked, you can use voice commands such as:

- "Alexa, turn on [device name]."
- "Hey Google, turn off [device name]."

4.4. Scheduling and Timers

Automate your appliances with schedules and timers:

1. In the Smart Life app, select the smart plug.
2. Tap on "Schedule" or "Timer" options.
3. Set desired times for the plug to turn on or off. You can create daily, weekly, or one-time schedules.
4. Use the "Countdown" feature for a specific duration.

4.5. Energy Monitoring

The smart plug provides energy consumption data:

1. In the Smart Life app, select the smart plug.
2. Look for the "Energy Monitoring" or "Electric" section.
3. View real-time power (W), current (mA), voltage (V), and total energy consumption (kWh).
4. Historical data is displayed in graphs (daily/monthly).

Note: The plug will display energy data after usage for at least 1 hour.

4.6. Group Control and Family Sharing

To control multiple plugs or share access:

- **Group Control:** In the Smart Life app, select multiple devices and create a group. You can then control all devices in that group with a single command.
- **Family Sharing:** Share control of your smart plugs with family members by inviting them through the app's "Family Management" or "Device Sharing" settings.

5. Maintenance

- Keep the smart plug dry and clean.
- Do not expose the device to extreme temperatures or humidity.
- Clean the exterior with a soft, dry cloth. Do not use harsh chemicals or abrasive cleaners.
- Ensure the plug is unplugged from the wall socket before cleaning.
- Regularly check for firmware updates within the Smart Life app to ensure optimal performance and security.

6. Troubleshooting

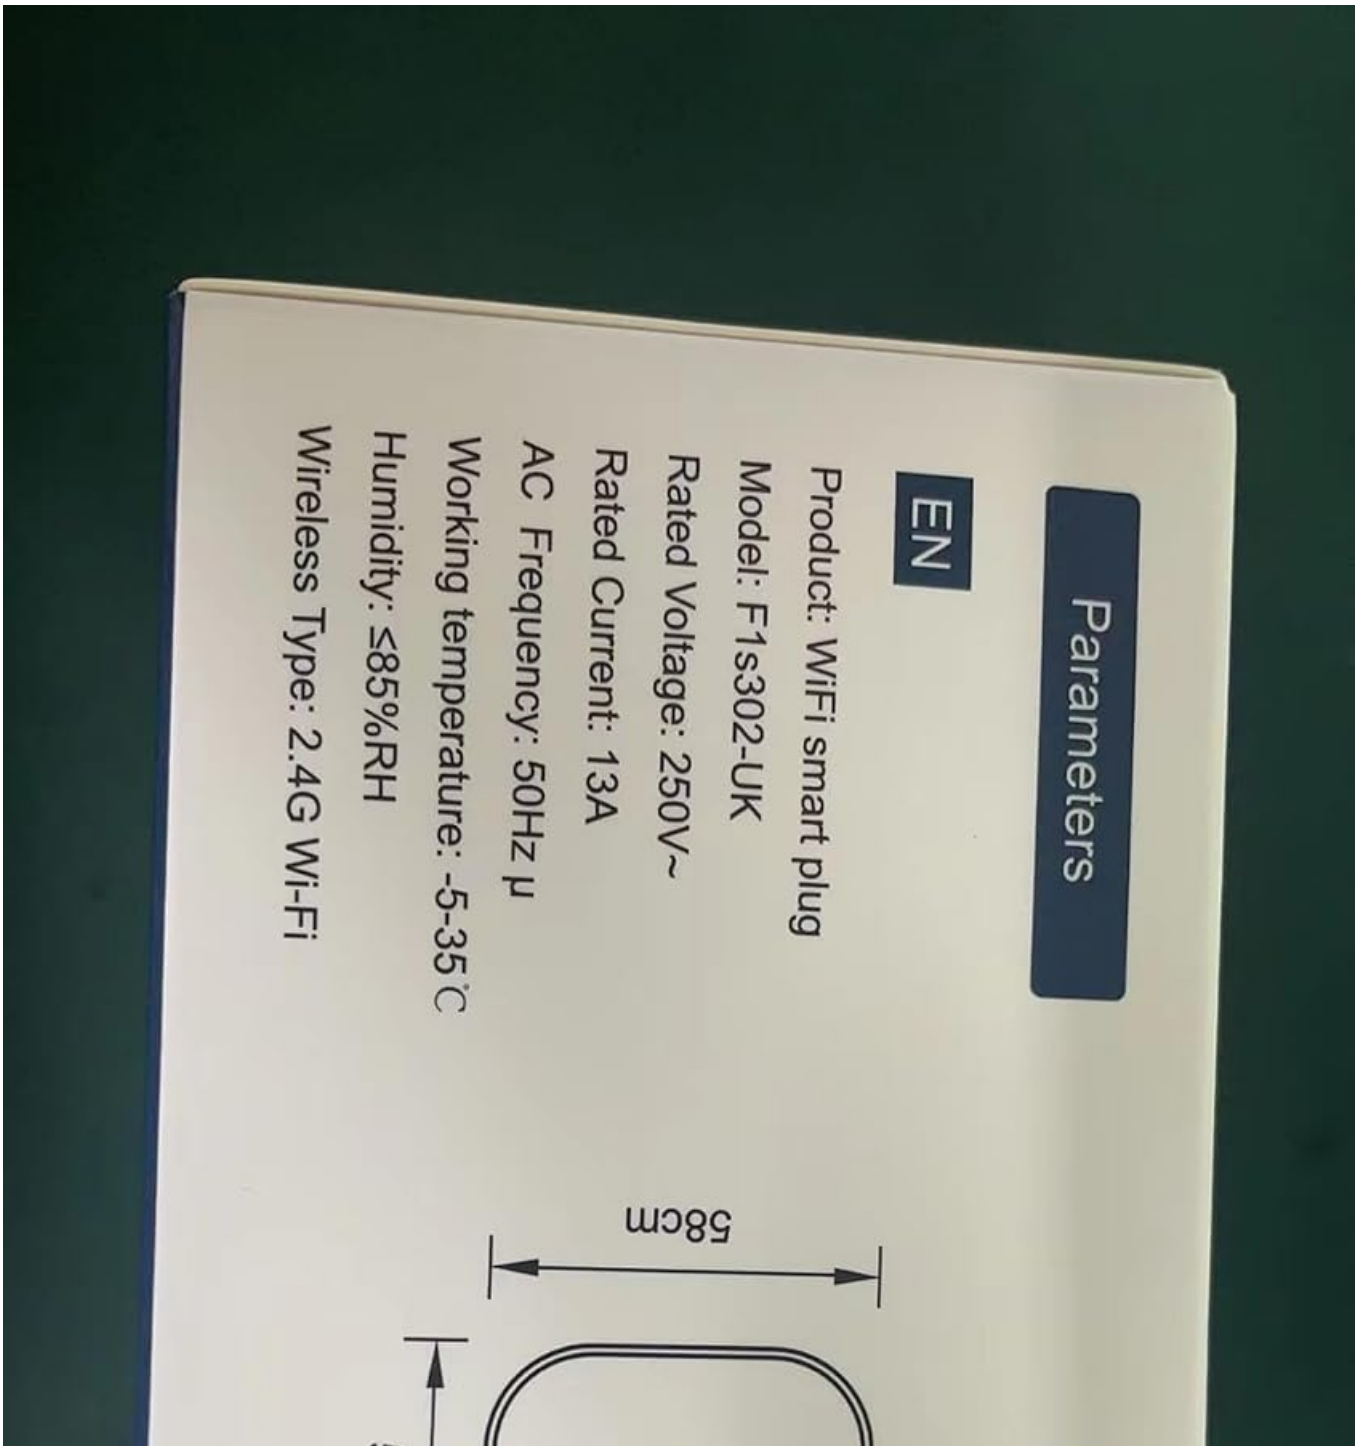

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
Smart Plug cannot connect to Wi-Fi.	• Incorrect Wi-Fi password. • Not connected to 2.4GHz Wi-Fi. • Plug is too far from router. • Router settings (e.g., MAC filtering).	• Verify Wi-Fi password. • Ensure your phone is connected to a 2.4GHz network during setup. • Move the plug closer to the router. • Check router settings or temporarily disable advanced security features. • Reset the plug (press and hold power button for 5 seconds until light blinks rapidly) and try pairing again.
Voice control not working.	• Smart Life skill/service not enabled. • Account not linked. • Device name not recognized.	• Ensure Smart Life skill is enabled in Alexa/Google Home app. • Relink your Smart Life account. • Try simpler device names or discover devices again.
Energy monitoring not showing data.	• Device has not been used for 1 hour. • App data synchronization issue.	• Ensure the connected appliance has been running for at least 1 hour. • Refresh the app or restart it.
Plug is unresponsive.	• No power. • Wi-Fi connection lost. • Device malfunction.	• Check if the wall socket has power. • Verify Wi-Fi router is working and plug is within range. • Try unplugging and re-plugging the smart plug. • Perform a factory reset (consult app for specific instructions, usually holding the button for 5-10 seconds).
