Important Safety Information

- **Electrical Installation:** Installation requires working with existing outdoor wiring and a junction box. If you are not comfortable with electrical wiring, it is strongly recommended to consult a qualified electrician.

Installation Guide

Before You Begin

- Ensure you have existing outdoor wiring and a compatible junction box at the desired installation location.
- Turn off power to the circuit at the breaker box before starting any electrical work.
- Gather necessary tools: screwdriver, wire nuts, ladder (if needed).

Mounting the Floodlight Camera

1. **Prepare the Junction Box:** Ensure the existing junction box is securely mounted and accessible.
2. **Attach Mounting Plate:** Secure the provided mounting plate to your existing junction box using the screws from the screw pack.
3. **Wire Connections:** Connect the floodlight camera's wires to your home's electrical wires. Typically, this involves connecting the ground wire (green or bare copper) to the ground wire, the neutral wire (white) to the neutral wire, and the live wire (black) to the live wire. Use wire nuts to secure connections.
4. **Mount the Camera:** Carefully align the floodlight camera with the mounting plate and secure it in place. Ensure all wires are tucked safely into the junction box.
5. **Adjust Floodlights:** Once mounted, adjust the angle of the floodlights to cover the desired area.
