Aquaguard Delight NXT UV+UF

Aquaguard Sure Delight NXT UV+UF Water Purifier

MODEL: DELIGHT NXT UV+UF

1. Introduction

The Aquaguard Sure Delight NXT UV+UF Water Purifier is designed to provide safe and healthy drinking water. This appliance utilizes advanced UV E-Boiling and Ultra Filtration technologies to purify water. It is specifically engineered for use with municipal water sources where the Total Dissolved Solids (TDS) level is less than 200 ppm. This manual provides essential information for the proper installation, operation, maintenance, and troubleshooting of your water purifier.

Important Note: This water purifier is not suitable for borewell or tanker water sources where TDS levels typically exceed 200 ppm. Using the purifier with water sources outside the recommended TDS range may affect its performance and longevity.

2. Setup and Installation

Your Aquaguard Sure Delight NXT UV+UF Water Purifier comes with a complimentary installation service. It is recommended to utilize this professional service to ensure correct setup and optimal performance.

2.1 Professional Installation

- Upon delivery, contact Aquaguard customer service to schedule your free installation.
- A certified technician will install the unit, connect it to your water supply, and ensure all components are functioning

correctly.

- The installation includes the necessary plumbing kit and power adapter.

2.2 Site Requirements

- Ensure a stable, flat surface for countertop installation.
- The installation area should have access to a potable water supply line and a standard electrical outlet.
- Maintain adequate space around the unit for ventilation and future maintenance access.

3. Operating Instructions

The Aquaguard Sure Delight NXT UV+UF Water Purifier is designed for user-friendly operation. Once installed, the unit will automatically begin purifying water when connected to power and water supply.

3.1 Purification Process

The purifier employs a multi-stage filtration process:

1. **Pre-filtration:** Removes larger suspended particles.
2. **UV E-Boiling Technology:** Utilizes ultraviolet light to eliminate bacteria and viruses, ensuring water purity equivalent to water boiled for over 20 minutes.
3. **Ultra Filtration (UF):** Further purifies water by removing ultra-fine suspended particles, microplastics, bacteria, and cysts, resulting in crystal clear water.

5-STAGE FILTRATION

Provides All-round Protection for Your Family
Against Bacterial and Viral Diseases

Image 3.2: Visual representation of the 5-stage filtration process.

3.2 Smart LED Indication

The purifier features Smart LED indicators to keep you informed about its status:

- **Power Indicator:** Shows if the unit is powered on.
- **Purification Status:** Indicates when purification is in progress.
- **Tank-Full Indicator:** Lights up when the storage tank is full.
- **Filter Life Warning:** Alerts you when filters are nearing the end of their life and require replacement.
- **Electronic Errors:** Notifies of any internal electronic malfunctions.

4. Maintenance

Regular maintenance ensures the longevity and efficiency of your Aquaguard water purifier. Adhere to the recommended service schedule.

4.1 Filter Cartridge Life

The filter cartridge has a life cycle of up to 1 year or 6000 litres, whichever comes first. The Smart LED Indication system will alert you when a filter change is due.

4.2 Free Service Plan

Your purchase includes a free service plan worth ₹2000, which covers:

- Free installation (as mentioned in Setup).
- One free maintenance visit within the first year of purchase.

- Unlimited repair visits within the first year of purchase.

To schedule a service, refer to the contact information provided in the Warranty and Support section.

5. Troubleshooting

This section addresses common issues you might encounter with your water purifier. For problems not listed here or if solutions do not resolve the issue, please contact customer support.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No water dispensing	No power, water supply off, tank empty, or electronic error.	Check power connection, ensure water supply is open, wait for tank to fill, check LED indicators for error codes.
Slow water flow	Clogged filters, low water pressure.	Check filter life indicator; if due, schedule service for filter replacement. Ensure adequate inlet water pressure.
Unusual taste or odor	Filters nearing end of life, new filter installation (initial flush required).	If new, flush a few liters of water. If filters are old, schedule service for replacement.
LED indicator showing error	Internal electronic malfunction.	Note the specific error indicated and contact customer support for diagnosis and repair.

Note: Due to the specialized nature of the components, self-repair or replacement of parts is not recommended. Always rely on certified Aquaguard technicians for service.

6. Specifications

Detailed technical specifications for the Aquaguard Sure Delight NXT UV+UF Water Purifier:

Feature	Detail
Brand	Aquaguard
Model Name	Delight NXT UV+UF
Model Number	GWPDASDNU10000
