Evajoy EJ-HF032

EVAJOY 16ft x 48in Metal Frame Swimming Pool Set

Brand: Evajoy | Model: EJ-HF032

PRODUCT OVERVIEW

The EVAJOY 16ft x 48in Metal Frame Swimming Pool Set provides a robust and enjoyable swimming experience for your backyard. This round above-ground pool features a durable metal frame and a reinforced PVC liner, designed for stability and longevity. It comes complete with a sand filter pump, pool ladder, ground cloth, and pool cover, offering a comprehensive solution for summer fun.

SAFETY INFORMATION

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Always supervise children and non-swimmers. Ensure the pool area is secure and free from hazards. Follow all local regulations regarding pool installation and safety barriers. Do not dive into the pool. Always use the provided ladder for entry and exit.

PACKAGE CONTENTS

Before beginning assembly, ensure all components listed below are present and undamaged. If any parts are missing or damaged, contact customer support.

- 1 x EVAJOY 16ft x 48in Pool Liner (3-layer reinforced PVC)
- 1 x Metal Frame Set (galvanized steel poles and connectors)
- 1 x 2000 GPH Sand Filter Pump with 7-way valve and pressure gauge
- 1 x Pool Ladder
- 1 x Ground Cloth
- 1 x Pool Cover
- Necessary Hoses and Connectors for Filter Pump

Transportation Tips

-  Easy to carry by truck or SUV
Box Size: 37.6 in*19.69 in* 53.15 in
-  Box requires 2 adults to lift
Weight:231.95 lb

What's in the Box ?

SETUP AND ASSEMBLY

The EVAJOY pool is designed for a straightforward 3-step assembly process:

1. **Prepare the Ground:** Select a flat, level area for pool installation. Lay the included ground cloth on the prepared surface. Ensure the area is free of sharp objects or debris that could damage the liner.
2. **Assemble the Frame:** Carefully unfold the pool liner and position it on the ground cloth. Assemble the metal frame components according to the diagrams in the detailed instruction manual (not provided)

here). When connecting corner joints and U-shaped support bars, ensure proper alignment. If hoses for the sand filter pump feel stiff, leaving them in the sun for a short period can make them more pliable for easier connection.

3. **Fill with Water:** Once the frame is fully assembled and secure, begin filling the pool with water. As the pool fills, smooth out any wrinkles in the liner from the center outwards.

3 Step Assembly

1

Lay the pool flat on the ground

2

Assemble the frame

3

Fill the pool with water

For detailed, step-by-step instructions and diagrams, please refer to the comprehensive manual included in your product packaging.

OPERATING INSTRUCTIONS

The included 2000 GPH Sand Filter Pump is essential for maintaining clear and clean pool water. Connect the pump to the designated inlet and outlet ports on the pool liner using the provided hoses.

- **Filtration:** Operate the sand filter pump daily to circulate and filter the pool water. The duration of operation depends on pool usage and water conditions.
- **Backwash/Rinse:** Periodically backwash and rinse the sand filter as indicated by the pressure gauge or when water clarity decreases. Refer to the pump's specific manual for detailed instructions on its 7-way valve settings.
- **Water Chemistry:** Regularly test and balance your pool's water chemistry (pH, chlorine, alkalinity, etc.) to ensure a safe and healthy swimming environment and prevent algae growth.

Effortless Maintenance

Keeps pool water clean and crystal clear

MAINTENANCE

- **Regular Cleaning:** Skim debris from the surface daily and vacuum the pool floor as needed to remove settled particles.
- **Liner Care:** The 3-layer reinforced PVC liner is designed for durability. Avoid sharp objects and excessive force that could cause punctures or tears.
- **Frame Inspection:** Periodically inspect the galvanized steel frame for any signs of rust or corrosion, especially at connection points. The powder coating provides protection, but regular checks are

recommended.

- **Winterizing:** For colder climates, proper winterization is crucial. Drain the pool, clean the liner, and disassemble the frame for storage in a dry, protected area. Ensure all water is removed from the pump and hoses to prevent freezing damage. The pool's hose holes have covers that can be used to prevent water from pouring out when the pump is disconnected.

TROUBLESHOOTING

- **Green Pool Water:** This typically indicates an algae bloom or unbalanced water chemistry. Shock the pool with appropriate chemicals and ensure the filter pump is running sufficiently. Test and adjust pH, alkalinity, and sanitizer levels.
- **Pump Not Filtering Effectively:** Check if the sand filter needs backwashing or rinsing. Ensure all hoses are securely connected and free of air leaks. Verify the pump is receiving adequate power.
- **Pool Ladder Instability:** The included ladder is functional but may feel less sturdy than aftermarket options. Ensure all connections are tightened. Consider purchasing a more robust ladder if increased stability is desired.
- **Missing or Damaged Parts:** If you receive the product with missing or damaged components, contact Evajoy customer support immediately for assistance.

SPECIFICATIONS

Feature	Detail
Brand	Evajoy
Model Number	EJ-HF032
Pool Dimensions	16ft (Diameter) x 48in (Height)
Capacity	Approx. 2000 Gallons
Material	Polyvinyl Chloride (PVC) Liner, Galvanized Steel Frame
Item Weight	188 Pounds (Product Only)
Pump Type	Sand Filter Pump (2000 GPH)
UPC	719710511378
