Evajoy AMZEJ-HF049B01

EVAJOY Inflatable Swimming Pool User Manual

Model: AMZEJ-HF049B01

Brand: Evajoy

1. IMPORTANT SAFETY INFORMATION

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Always supervise children when they are in or near the pool. Do not leave children unattended.

- Always ensure the pool is placed on a level, stable surface.
- Do not over-inflate the top ring.
- Keep sharp objects away from the pool liner to prevent punctures.
- Ensure proper water chemistry is maintained for safe and clean water.
- Drain and store the pool properly when not in use to prevent damage and ensure longevity.

2. INCLUDED COMPONENTS

Your EVAJOY Inflatable Swimming Pool package includes the following items:

- Inflatable Pool Liner (15ft diameter, 35 inches depth)
- Filter Pump
- Ground Cloth
- Pool Cover

The complete EVAJOY Inflatable Swimming Pool set, including the pool, filter pump, ground cloth, and pool cover.

3. SETUP INSTRUCTIONS

1. **Prepare the Ground:** Select a flat, level area in your garden or backyard. Clear the area of any sharp objects, debris, or uneven surfaces. Lay down the included ground cloth to provide an additional protective layer for the pool liner.

Easy Setup

1. Spread out the pool on level ground

2. Inflate the top ring with an air pump (not included)

3. Fill with water to 80% capacity

Image showing the pool liner being spread out on level ground, ready for inflation and filling.

- Inflate the Top Ring:** Locate the air valve on the top inflatable ring of the pool. Using an air pump (not included), inflate the top ring until it is firm to the touch but not over-inflated. Ensure the valve cap is securely closed after inflation.

Easy Setup

Image illustrating the process of inflating the top ring of the pool using an air pump.

- 3. Fill with Water:** Begin filling the pool with water using a standard garden hose. As the pool fills, the water pressure will cause the pool walls to rise. Continue filling until the water level reaches approximately 80% of the pool's capacity, just below the inflatable top ring. This ensures optimal stability and prevents overfilling.

Easy Setup

1. Spread out the pool on level ground

2. Inflate the top ring with an air pump (not included)

3. Fill with water to 80% capacity

Image demonstrating the pool being filled with water, showing the walls rising as it fills.

4. **Connect Filter Pump:** Follow the instructions provided with the filter pump to connect it to the designated inlet and outlet ports on the pool. Ensure all connections are secure to prevent leaks. The filter pump is designed to circulate and filter the pool water, maintaining clarity.

Keeps Water Clean & Clear

Included filter pump efficiently maintains water clarity

A visual representation of the filter pump connected to the pool, ensuring water cleanliness.

4. OPERATING THE POOL AND FILTER PUMP

Once set up, your EVAJOY Inflatable Swimming Pool is ready for use. The pool has a maximum capacity of 2640 gallons and can accommodate up to 7 people.

Summer Party Time Among Friends

Capacity for up to 7 adults

15ft x 35in

2640Gal

The spacious EVAJOY pool, perfect for family and friends to enjoy during summer.

4.1 Filter Pump Operation

The included filter pump is essential for maintaining water quality. It can pump up to 800 gallons of water per hour.

- Ensure the filter pump is connected to a grounded electrical outlet.
- Turn on the pump according to its specific instructions. It is recommended to run the pump for several hours each day, depending on usage and water conditions, to keep the water clean and clear.
- Regularly check the filter cartridge for debris and clean or replace it as needed to ensure efficient

filtration.

5. MAINTENANCE

Proper maintenance will extend the life of your EVAJOY Inflatable Swimming Pool and ensure a safe swimming environment.

5.1 Water Treatment

- Regularly test the pool water for pH and chlorine levels using a pool test kit (not included).
- Adjust chemical levels as necessary to maintain balanced water chemistry.
- Shock the pool periodically to eliminate bacteria and algae.

5.2 Cleaning the Pool

- Skim the surface daily to remove leaves and other floating debris.
- Vacuum the pool bottom as needed to remove settled dirt and particles.
- Wipe down the pool walls with a soft brush or cloth to prevent algae buildup.

5.3 Using the Pool Cover

The included pool cover is designed to protect your pool from dirt, leaves, and other debris when not in use.

Debris Cover

The pool cover helps keep the water clean and free from debris, protecting it from sunlight, snow, ice, and wind.

- Place the cover over the pool when it is not being used, especially overnight or during periods of strong winds.
- Secure the cover tightly to prevent it from blowing off.

5.4 Winterization and Storage

- Before storing, completely drain the pool water.
- Clean and dry the pool liner thoroughly to prevent mold and mildew.
- Deflate the top ring and fold the pool neatly.

- Store the pool and all accessories in a cool, dry place, away from direct sunlight and extreme temperatures.

6. TROUBLESHOOTING

Here are some common issues and their potential solutions:

Problem	Possible Cause	Solution
Pool is losing air.	Puncture in liner or loose valve cap.	Check for punctures and use a repair kit (not included). Ensure valve cap is tightly sealed.
Water is cloudy or green.	Insufficient filtration, unbalanced chemicals, or algae growth.	Run filter pump longer, clean/replace filter cartridge, test and adjust water chemistry, shock the pool.
Filter pump not circulating water effectively.	Clogged filter, air in system, or improper connection.	Clean or replace filter cartridge. Bleed air from the system. Check all hose connections for tightness.
Hoses leaking at connections.	Loose clamps or improper fit.	Ensure hose clamps are tightened securely. If hoses are too tight to fit, gentle heat may help soften the plastic for easier connection.

7. SPECIFICATIONS

Feature	Detail
Brand	Evajoy
Model Number	AMZEJ-HF049B01
Product Dimensions	180"L x 180"W x 35"H (15ft diameter x 35in height)
Shape	Round
Material	Robust 0.6mm 3-ply reinforced Polyvinyl Chloride (PVC) with UV-resistant coating
Capacity	2640 Gallons
Filter Pump Flow Rate	Up to 800 gallons per hour
Assembly Required	Yes
