Beats MMT93LL/A

Beats Studio Buds User Manual

Model: MMT93LL/A

Brand: Beats

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your Beats Studio Buds. These true wireless noise-cancelling earbuds are designed for compatibility with both Apple and Android devices, offering a balanced sound experience with active noise cancellation and transparency modes.

Image: Beats Studio Buds in Moon Gray, shown with their charging case open, displaying both earbuds.

WHAT'S IN THE BOX

Upon opening your Beats Studio Buds package, you should find the following components:

- Beats Studio Buds true wireless noise cancelling earphones
- Charging case
- Ear tips with three size options (Small, Medium, Large)
- USB-C to USB-C charging cable
- Quick Start Guide
- Warranty card

Note: A USB-C power adapter is sold separately and is not included in the box.

What's in the Box

Beats Studio Buds | USB-C to USB-C charging cable
Eartips with three size options | Quick start guide
"B" logo sticker | Warranty card

Setup

1. Charging

Before initial use, ensure both the Beats Studio Buds and their charging case are fully charged. Connect the provided USB-C to USB-C charging cable to the charging port on the case and to a compatible USB-C power adapter (not included) or a computer's USB-C port.

- The LED indicator on the front of the charging case will show charging status.
- A full charge provides up to 8 hours of listening time for the earbuds, and up to 24 hours combined with the charging case.
- A 5-minute Fast Fuel charge provides up to 1 hour of playback.

Battery Life

Each earbud has up to **8** hours of listening time.
Up to **24** hours combined with charging case.[1]

[1] Battery life depends on device settings, environment, usage, and many other factors.

2. Pairing

Beats Studio Buds offer seamless one-touch pairing for both Apple and Android devices.

For Apple Devices:

1. Ensure your iPhone or iPad is running iOS 14.6 or later.
2. With the earbuds in the charging case, open the case lid and hold it near your unlocked Apple device.
3. A setup animation will appear on your device's screen. Follow the on-screen instructions to connect.

For Android Devices:

1. Ensure your Android device is running Android 6.0 or later and has Google Play Services enabled.
2. With the earbuds in the charging case, open the case lid and hold it near your unlocked Android device.
3. A notification will appear on your device's screen. Tap to connect.
4. For full access to features, download the Beats app from the Google Play Store.

Simple One-Touch Pairing
Compatible with Apple and Android[3,4]

³ One-touch pairing requires iOS 14.6 or later.
⁴ Fast Pair requires location enabled. Full access to features requires an Android 6.0 or newer device with Google Play Service enabled and Google Account.

3. Fitting Ear Tips

Selecting the correct ear tip size is crucial for optimal sound quality and comfort, as well as effective noise cancellation. The Beats Studio Buds come with three sizes of soft silicone ear tips (Small, Medium, Large).

1. Try each size to find the one that creates a comfortable and secure seal in your ear canal.
2. A good seal will block out ambient noise and enhance bass response.
3. Gently insert the earbud into your ear and twist it slightly forward or backward until it feels snug and stable.

OPERATING YOUR BEATS STUDIO BUDS

On-Device Controls

Each earbud features a multi-function 'b' button that allows you to control various functions without needing to access your device.

Action	Function
Single Press	Play/Pause audio, Answer/End call
Double Press	Skip forward
Triple Press	Skip backward
Press and Hold	Toggle between Active Noise Cancellation (ANC) and Transparency mode, or activate voice assistant (customizable via Beats app).

Image: A detailed view of the Beats Studio Buds earbud, highlighting the location of the multi-function 'b' button for on-device controls.

Active Noise Cancellation (ANC) and Transparency Mode

Your Beats Studio Buds feature two distinct listening modes to control your audio experience:

- **Active Noise Cancellation (ANC):** This mode actively blocks external noise, providing an immersive listening experience. It is ideal for environments with significant ambient sound.
- **Transparency Mode:** This mode allows ambient sound to filter through, enabling you to hear your surroundings while still enjoying your audio. It is useful for situations where situational awareness is important, such as walking in a city or listening for announcements.

Toggle between these modes by pressing and holding the 'b' button on either earbud. You can also manage these settings through the Bluetooth settings on your Apple device or the Beats app on your Android device.

Active Noise Cancelling (ANC)
## Blocks external noise for immersive sound

Image: A graphic representation of the Active Noise Cancelling (ANC) feature of the Beats Studio Buds, showing how external noise is blocked.

Spatial Audio Support

Beats Studio Buds support Spatial Audio for an immersive audio experience with compatible content and devices. This feature creates a three-dimensional soundstage, making music, movies, and games feel more engaging.

Supports Spatial Audio[1]

For immersive music, movies, and games

[1] Compatible hardware and software required. Works with compatible content in supported apps. Not all content available in Dolby Atmos.

Image: An illustration depicting the Beats Studio Buds' support for Spatial Audio, with sound waves emanating around the earbuds.

Water Resistance

The Beats Studio Buds are IPX4-rated, meaning they are sweat- and water-resistant. This makes them suitable for workouts and outdoor activities. However, they are not waterproof and should not be submerged in water.

MAINTENANCE

Cleaning Your Earbuds and Case

- Use a soft, lint-free cloth to wipe down the earbuds and charging case.
- For stubborn dirt, slightly dampen the cloth with water. Avoid using abrasive materials or harsh chemicals.
- Remove ear tips and clean them separately with water and mild soap if necessary. Ensure they are completely dry before reattaching.
- Keep charging contacts on both the earbuds and the case clean and dry to ensure proper charging.

Storage

Always store your Beats Studio Buds in their charging case when not in use to protect them and keep them charged. Store the case in a cool, dry place away from extreme temperatures and direct sunlight.

TROUBLESHOOTING

If you encounter issues with your Beats Studio Buds, try the following common troubleshooting steps:

- **No Sound or Intermittent Audio:**

    - Ensure earbuds are charged.
    - Check Bluetooth connection on your device and try re-pairing.
    - Clean ear tips and earbud speakers to remove any debris.
    - Try resetting the earbuds (refer to the Quick Start Guide for specific steps).

- **Earbuds Not Charging:**

    - Ensure the charging case is charged.
    - Verify the USB-C cable and power adapter are functioning correctly.
    - Clean the charging contacts on both the earbuds and inside the case.
    - Ensure earbuds are properly seated in the charging case.

- **Poor Noise Cancellation:**

    - Ensure you have selected the correct ear tip size for a proper seal.
    - Verify ANC mode is activated.

- **Connectivity Issues:**

    - Move closer to your device to ensure you are within Bluetooth range (up to 100 meters).
    - Turn off and on Bluetooth on your device.
    - Forget the device in your Bluetooth settings and re-pair.

For more detailed troubleshooting or persistent issues, refer to the official Beats support website or contact customer service.
