4. SETUP AND ASSEMBLY

The GreenForest L Shaped Desk is designed for easy assembly, typically requiring one person. All necessary tools are included. Follow the steps below for a smooth setup.

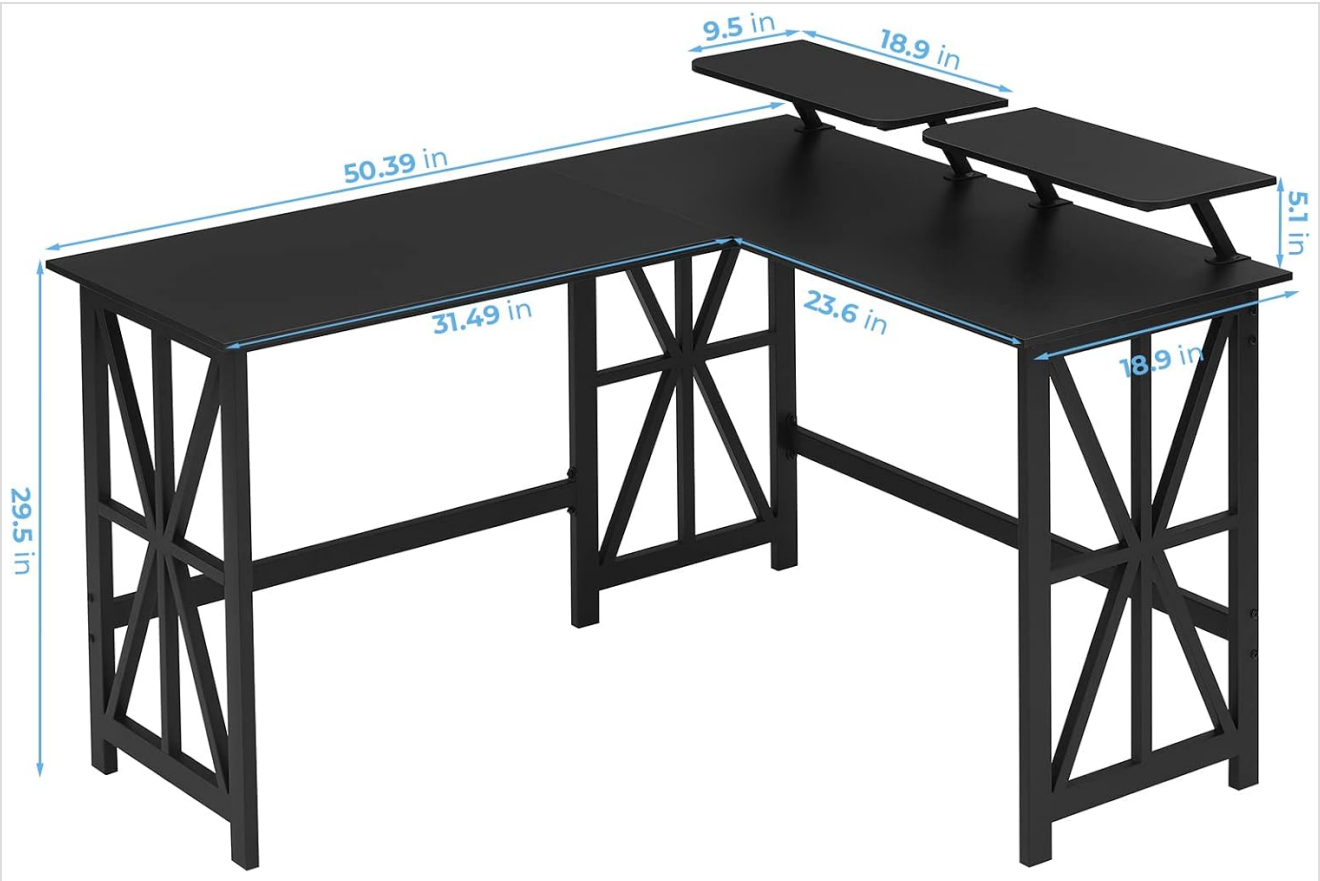

Figure 4.1: Desk Dimensions. This diagram illustrates the precise measurements of the L-shaped desk, including its overall length (50.39 inches), width (23.6 inches), and height (29.5 inches), along with monitor stand dimensions.

Figure 4.2: Two-Way Setup. This image highlights the desk's reversible design, allowing users to configure it for either a right-hand or left-hand L-shape to best suit their room layout and preferences.

Assembly Steps:

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Refer to the included parts list to identify each piece and ensure nothing is missing.
2. **Assemble the Frame:** Begin by attaching the metal legs to the main desk panels. Follow the numerical sequence provided in the separate assembly diagram (not included in this text, but typically found in the product box). Ensure all connections are finger-tight initially.
3. **Configure L-Shape (Reversible):** Decide whether you prefer a right-hand or left-hand L-shape. The desk panels are reversible, allowing you to flip them as needed to achieve your desired orientation.
4. **Attach Monitor Stands:** The two monitor stands are movable. To adjust their position, **loose the screw** on the underside of the stands and slide them along the desk's edge to your preferred location. Tighten the screws once positioned.
5. **Final Tightening:** Once all components are in place and the desk is in its desired configuration, systematically tighten all screws and bolts using the provided hex key. Do not overtighten.
