SETUP INSTRUCTIONS

1. **Unfold the Prongs:** Gently pull out the foldable AC prongs from the charger body until they click into place.
2. **Connect to Power Outlet:** Insert the charger firmly into a standard wall outlet.
3. **Connect Devices:** Use appropriate USB-C or USB-A charging cables (not included) to connect your devices to the charger's available ports.
4. **Begin Charging:** The charger will automatically detect and begin charging your connected devices.

OPERATING INSTRUCTIONS

The Anker GaNPrime 65W Charger features PowerIQ 4.0 with Dynamic Power Distribution, which intelligently adjusts power output based on the connected devices to optimize charging speed.

Power Output Guidelines

- **Single Device Charging:** When only one device is connected to any USB-C port, the charger can deliver up to 65W.
- **Multiple Device Charging:** When multiple devices are connected, the 65W total output is dynamically distributed among the ports. For optimal charging, refer to the specific power distribution diagrams below.

SAFETY INFORMATION

Please observe the following safety precautions to prevent damage to the product or injury to yourself.

- Do not expose the charger to liquids, moisture, or extreme temperatures.
- Do not disassemble, modify, or attempt to repair the charger.
- Keep the charger out of reach of children.
- Ensure the charger is used in a well-ventilated area to prevent overheating.
- Unplug the charger during lightning storms or when unused for extended periods.
- The charger features **ActiveShield 2.0**, which continuously monitors temperature to protect connected devices from overheating.

TROUBLESHOOTING

Device Not Charging

- Ensure the charger is securely plugged into a working wall outlet.
- Verify that the charging cable is properly connected to both the charger and your device.
- Try using a different charging cable or a different port on the charger.

- Test the charger with a different device to confirm functionality.

Slow Charging

- Check if multiple devices are connected. The total 65W output is shared, which may reduce individual port speeds.
- Ensure your device and cable support fast charging protocols (e.g., Power Delivery, PPS) for optimal speed.
- Disconnect and reconnect the device to reset the power distribution.
