## OPERATING INSTRUCTIONS

The unit can be operated using the control panel on top of the unit or the provided remote control.

### Control Panel and Remote Functions

- **Power Button ( ):** Turns the unit ON or OFF.
- **Mode Button:** Cycles through operating modes: Cool, Dehumidify (DRY), and Fan.
- **Speed Button:** Adjusts fan speed between High and Low.
- **Temperature Up/Down Arrows (  $\wedge$  /  $\vee$  ):** Adjusts the desired temperature in Cool mode.

- **Timer Button:** Sets the 24-hour timer for automatic ON/OFF operation.
- **Sleep Mode:** Activates a quieter operation mode, often with gradual temperature adjustments for nighttime comfort.

## Operating Modes

- **Cool Mode:** Provides powerful cooling. Set your desired temperature using the Up/Down arrows. The unit will cool the room to the set temperature.
- **Dehumidifier (DRY) Mode:** Removes excess moisture from the air, creating a healthier and more comfortable environment. The unit collects water, which may require periodic draining.
- **Fan Mode:** Circulates air without cooling. Useful for general air movement. You can select between High and Low fan speeds.

## MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your portable AC unit.

### Draining Water

When operating in Dehumidifier (DRY) mode, the unit collects moisture. The internal water tank will fill, and you will need to drain it periodically. The unit may indicate when draining is required.

## TROUBLESHOOTING

If you encounter issues with your LifePlus portable AC unit, refer to the common problems and solutions below:

- **Unit Does Not Turn On:**

- Ensure the power cord is securely plugged into a working electrical outlet.
- Check if the circuit breaker has tripped.
- Verify that the operating temperature range (41°F to 95°F / 5°C to 35°C) is met. The unit may not operate outside this range.

- **Insufficient Cooling:**

- Check if the exhaust hose is properly installed and not kinked or blocked.
- Ensure windows and doors in the room are closed to prevent warm air from entering.
- Clean the air filters if they are dirty.
- Verify the room size is within the recommended cooling area (130-250 sq.ft.).

- **Water Tank Fills Quickly:**

- This is normal in high humidity environments, especially when using the Dehumidifier (DRY) mode. Frequent draining may be necessary.

- **Unusual Noise:**

- Ensure the unit is placed on a flat, stable surface.
- Check for any obstructions in the air intake or exhaust vents.
