4. IMPORTANT NOTES AND SAFETY

Not a Voltage Converter: This adapter is NOT a voltage converter. It only adapts the plug shape. Ensure your devices support dual voltage (100-250V) before plugging them in. Using devices that are not dual voltage compatible may cause damage to the device or the adapter.

Figure 5: Visual reminder that the adapter is not a voltage converter. Always check your device's voltage compatibility (100-250V supported).

For high-power appliances like hair dryers, straighteners, or curling irons, verify they are dual voltage compatible (100-

250V) before use. This adapter does not offer surge protection, making it suitable for cruise ship travel where surge protectors are often prohibited.
