Chemical Guys CWS61916BB Basic Car Wash & Bucket Bundle User Manual

Model: CWS61916BB | Brand: Chemical Guys

PRODUCT OVERVIEW

The Chemical Guys CWS61916BB Basic Car Wash & Bucket Bundle provides essential tools for vehicle cleaning and enhancement. This bundle includes Black Light Foaming Car Wash Soap and a Heavy Duty Smoked Obsidian Black Detailing Bucket, designed to deliver a deep clean and enhance the shine of dark-colored vehicles.

Image: The bundle includes a bottle of Black Light Foaming Car Wash Soap and a Heavy Duty Smoked Obsidian Black Detailing Bucket.

Key Features:

- Enhances dark colored vehicles by taking shine to new levels of depth and clarity.
- Suitable for use with a wash mitt and bucket, foam gun, or foam cannon.
- Professional-grade formulation designed for effective cleaning.
- Concentrated formula: a small amount produces significant foam and suds.
- Heavy Duty Smoked Obsidian Black Detailing Bucket offers versatility for various detailing tasks.

SETUP

Before beginning the car wash process, ensure you have all necessary equipment ready. This includes a clean water

source, additional wash mitts or sponges, and a drying towel. The detailing bucket can be used for holding wash solution or rinse water.

OPERATING INSTRUCTIONS

Method 1: Two-Bucket Wash Method

This method helps prevent swirl marks by separating clean wash solution from dirty rinse water.

1. Fill one 5-gallon bucket with clean water for rinsing your wash mitt.
2. In a separate 5-gallon soap bucket (the included detailing bucket is suitable), add approximately 1 oz. of Black Light Car Wash Soap. Fill the rest with water to create suds.
3. Wash the car from top to bottom using a premium chenille microfiber mitt or similar soft wash tool.
4. After washing a section, rinse the mitt thoroughly in the clean water bucket before returning it to the soap bucket to pick up more solution.
5. For wheels and tires, it is recommended to use a third, separate bucket and dedicated tools to avoid cross-contamination with paintwork.
6. Rinse the vehicle thoroughly with clean water from top to bottom to remove all soap residue.

Method 2: Foam Cannon/Gun Application

Using a foam cannon or gun creates a thick layer of foam that helps loosen dirt and grime before contact washing.

1. Fill the foam solution bottle of your foam cannon or gun with warm water.
2. Add approximately 2 oz. of Black Light Car Wash Soap to the foam solution bottle.
3. Attach the foam cannon/gun to your pressure washer or garden hose.
4. Adjust the air/solution ratio on your foam cannon/gun to achieve the desired amount of foam. For thicker foam, increase the soap concentration.
5. Apply the foam evenly over the entire vehicle, allowing it to dwell for a few minutes to encapsulate dirt.
6. Proceed with a two-bucket wash method (as described above) or rinse thoroughly with clean water, depending on the level of dirt and desired cleaning depth.

Always read the directions on the Black Light Car Wash Soap bottle before use for specific instructions and safety precautions. The product is safe for use on all automotive paint colors and will not strip wax or sealant.

MAINTENANCE

- **Bucket Cleaning:** After each use, rinse the Heavy Duty Smoked Obsidian Black Detailing Bucket thoroughly with clean water to remove any soap residue or debris. Allow it to air dry completely before storage to prevent mildew.
- **Soap Storage:** Store the Black Light Car Wash Soap bottle in a cool, dry place, away from direct sunlight and extreme temperatures. Ensure the cap is tightly sealed to prevent evaporation or contamination.
- **Tool Care:** Regularly clean and maintain any wash mitts, sponges, or foam cannon equipment used with the product according to their respective manufacturer's instructions.

TROUBLESHOOTING

- **Insufficient Foam:** If the car wash soap is not producing enough foam, ensure you are using the recommended concentration (1 oz. for bucket wash, 2 oz. for foam cannon/gun). For foam cannons, adjust the air/solution ratio to allow more soap into the mix. Ensure your water source has adequate pressure.

- **Streaks or Residue:** Streaks can occur if the soap is allowed to dry on the vehicle surface, or if not rinsed thoroughly. Always wash and rinse one section at a time, especially in hot weather. Ensure the vehicle is completely rinsed with clean water after washing.
- **Product Separation:** While unlikely, if the soap appears separated, gently shake the bottle before use to re-mix the solution.

SPECIFICATIONS

Brand	Chemical Guys
Model Number	CWS61916BB
Item Form	Foaming, Liquid
Scent	Cherry
Specific Uses For Product	Car Washing and Detailing
Item Volume (Soap)	16 oz (Soap)
Bucket Capacity	5 Gallons (Bucket)
Special Features	Concentrated, Gloss Technology Agents
