Wuloo S600-P3

Wuloo Wireless Intercom System User Manual

Model: S600-P3
Hands-Free Two Way Intercoms for Home and Business

1. PRODUCT OVERVIEW

The Wuloo Wireless Intercom System (Model S600-P3) is an upgraded, full-duplex, hands-free communication solution designed for homes and businesses. This system offers clear voice quality, an extended signal range of up to 1 mile, and low power consumption. It is engineered for ease of use and reliable performance, providing seamless room-to-room communication without the need for Wi-Fi.

3. Key Features

The Wuloo Wireless Intercom System incorporates several advanced features for enhanced communication:

- **Full Duplex Communication:** Allows for simultaneous two-way conversation, similar to a phone call.
- **Hands-Free Operation:** Enables communication without needing to press and hold a button during conversation.
- **Extended Range:** Offers a signal range of up to 1 mile (5280 ft) in open areas.
- **Superior Voice Quality:** Provides clear and crisp audio transmission.
- **Anti-Interference Technology:** Utilizes new technology to prevent eavesdropping and ensure private

conversations.

- **Expandable System:** Supports up to 10 intercom units within a single system.
- **Monitor Function:** Allows continuous monitoring of a specific unit with no time limit.
- **Adjustable Chimes & Volume:** Features 10 distinct chime types with adjustable chime and call volumes.
- **Flexible Installation:** Designed with wall mounts on the back for easy installation or can be placed on a desk.
- **Low Power Consumption:** Energy-efficient design.

4. SETUP GUIDE

Follow these steps to quickly set up your Wuloo intercom system:

1. **Connect to AC Power:** Plug each intercom unit into a standard AC power outlet using the provided power cables and adapters.
2. **Set Code Number:** For each unit, press and hold the "CALL OK" button to enter the code setting mode. Use the "VOL+" or "VOL-" buttons to select a unique code number (1-10) for each unit. Press "CALL OK" again to confirm. Ensure each unit has a distinct code.
3. **Distribute Units:** Place the intercom units in desired locations throughout your home or business. Assign different units to different members or rooms as needed.
4. **Begin Communication:** Once powered and coded, the units are ready for hands-free communication.

Note:

To ensure optimal voice clarity and avoid low volume, please keep the microphone 20-30 cm (8-12 inches) away from your mouth when speaking.

The intercom can also operate outdoors with a suitable power bank (not included).

  - To restore factory settings (Channel 1, middle volume): When the intercom is OFF, press and hold the Power button and CALL button simultaneously. When the intercom is ON, press and hold the Power button and VOL- button simultaneously.

6. Maintenance

To ensure the longevity and optimal performance of your Wuloo Wireless Intercom System, please follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the units. Do not use abrasive cleaners, solvents, or strong chemicals, as these may damage the surface.
- **Power Supply:** Always use the original power adapters provided with the system. Ensure power cables are not bent, pinched, or placed under heavy objects.
- **Environment:** Avoid exposing the units to extreme temperatures, direct sunlight, high humidity, or dusty environments. Keep them away from water and other liquids.
- **Storage:** If storing the units for an extended period, disconnect them from power and store them in a cool, dry place.

7. Troubleshooting

If you encounter any issues with your Wuloo Wireless Intercom System, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
No power/Unit not turning on	Power cable not connected properly; Power outlet not working; Faulty adapter.	Check power cable connection. Try a different power outlet. Test with another adapter if available.
Poor voice quality/Static	Units too far apart; Obstructions between units; Interference from other devices.	Reduce distance between units. Relocate units to minimize obstructions. Move away from other electronic devices.
Cannot communicate with another unit	Incorrect code number set; Unit is off or out of range.	Verify that both units have the correct code number set. Ensure the target unit is powered on and within range.
Chime/Call volume too low/high	Volume settings are not adjusted correctly.	Use the VOL+/- buttons to adjust the chime and call volumes as described in the Operating Instructions.
Receiving random conversations	Interference from other wireless devices or systems.	The system has strong anti-interference capabilities. If this occurs, try changing the unit's code number or relocating the unit.

If the problem persists after trying these steps, please contact Wuloo customer support for further assistance.
