3. SETUP INSTRUCTIONS

Follow these steps to set up your Gigaset A695 Duo phone system:

1. **Install Batteries:** Open the battery compartment on each handset and insert the provided AAA NiMH rechargeable batteries, observing the correct polarity. Close the battery compartment.
2. **Connect Base Station:**
 - Connect the power supply unit to the base station and plug it into a wall outlet.
 - Connect the telephone connection cable to the base station and then to your wall telephone socket or router.
3. **Charge Handsets:** Place both handsets on their respective base stations or charging cradles. The handsets will begin charging automatically. Allow them to charge for at least 6 hours before first use to ensure optimal battery performance.

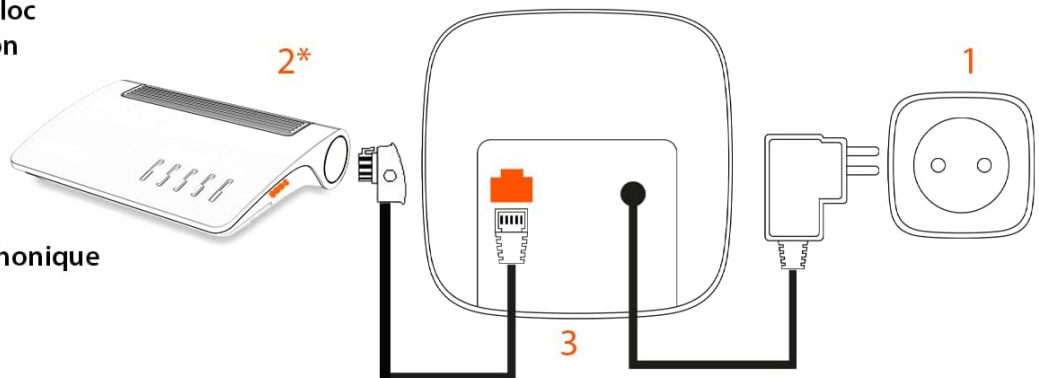

Variante de raccordement 1

- 1 Brancher le bloc d'alimentation
- 2 Brancher la prise téléphonique
- 3 Insérer les câbles dans les gaines de câbles

Variante de raccordement 2

- 1 Brancher le bloc d'alimentation
- 2 Brancher la prise téléphonique
- 3 Insérer les câbles dans les gaines de câbles

4.2 Key Features

- **High-Contrast Display:** The large, high-contrast display ensures optimal readability, especially with extra-large digits in dialing mode.
- **Volume Adjustment:** Adjust the call volume to one of 5 available levels using the navigation keys during a call.
- **Phonebook:** Store up to 100 contacts in the phonebook. Access it via the 'Menu' button and navigate to 'Phonebook'.
- **Call Protection:** Block up to 32 unwanted numbers. This feature helps prevent nuisance calls. Refer to the menu for 'Call Blocking' or 'Blacklist' options.

5. MAINTENANCE

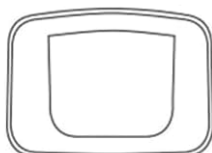

To ensure the longevity and optimal performance of your Gigaset A695 Duo, follow these maintenance guidelines:

- **Cleaning:** Clean the handsets and base station with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Battery Care:** Use only the recommended NiMH rechargeable batteries. If the phone will not be used for an extended period, remove the batteries.
- **ECO DECT Technology:** Your Gigaset A695 features ECO DECT technology, which reduces energy consumption and transmitting power. This contributes to a more environmentally friendly operation.

6. TROUBLESHOOTING

If you encounter issues with your Gigaset A695 Duo, try the following solutions:

Problem	Possible Solution
No dial tone	Check if the telephone cable is securely connected to both the base station and the wall socket/router. Ensure the power supply is connected.
Handset not charging	Ensure the handset is correctly placed on the base station/charging cradle. Check that the power supply is connected to the base station and the outlet. Clean the charging contacts on both the handset and base.
Poor sound quality	Move closer to the base station. Check for interference from other electronic devices. Ensure batteries are sufficiently charged.

Problem	Possible Solution
Display always on (even on base)	This is a characteristic of some Gigaset models. If you wish to turn off the display, remove the handset from the base. For night use in a bedroom, consider placing the handset off the base or deactivating it temporarily (consult advanced settings in the menu).
Cannot make/receive calls	Check if the handset is registered to the base station. Restart the base station by unplugging and replugging the power. Verify your phone line is active.

If the problem persists after trying these solutions, please contact Gigaset customer support.
