- **Handling:** Always hold the disc by its outer edges or by the center hole. Avoid touching the playback surface (the shiny side) to prevent fingerprints and scratches.
- **Cleaning:** If the disc becomes dirty, gently wipe it with a soft, lint-free cloth. Wipe in a straight line from the center of the disc outwards, not in a circular motion. Do not use abrasive cleaners, solvents, or harsh chemicals.
- **Storage:** Store the disc in its original case in a cool, dry place, away from direct sunlight, extreme temperatures, and high humidity.

5. TROUBLESHOOTING

If you encounter issues while playing your Blu-ray disc, consider the following:

- **Disc Not Playing/Loading:**
 - Ensure the disc is inserted correctly (label side up).
 - Verify your player is a Blu-ray disc player and not a standard DVD player.
 - Check the disc for visible dirt or scratches and clean it if necessary (refer to Section 4).
 - Try playing another Blu-ray disc to determine if the issue is with the player or the disc.
- **No Audio or Video:**
 - Check all cable connections between your Blu-ray player and your television/audio system.
 - Ensure your television is set to the correct input source (HDMI).
 - Verify the audio settings on your Blu-ray player and television.
- **Skipping or Freezing:**
 - Clean the disc thoroughly (refer to Section 4).
 - Check for significant scratches or damage on the disc surface. Severely damaged discs may not play correctly.
 - Ensure your Blu-ray player's firmware is up to date. Consult your player's manual for instructions on updating firmware.
