5.2. Voice Activated Recording (VAR)

This feature allows the recorder to start recording automatically when sound is detected and pause when silence occurs. You can set voice decibel levels across 4 different sensitivities in the settings menu.

5.3. Playback

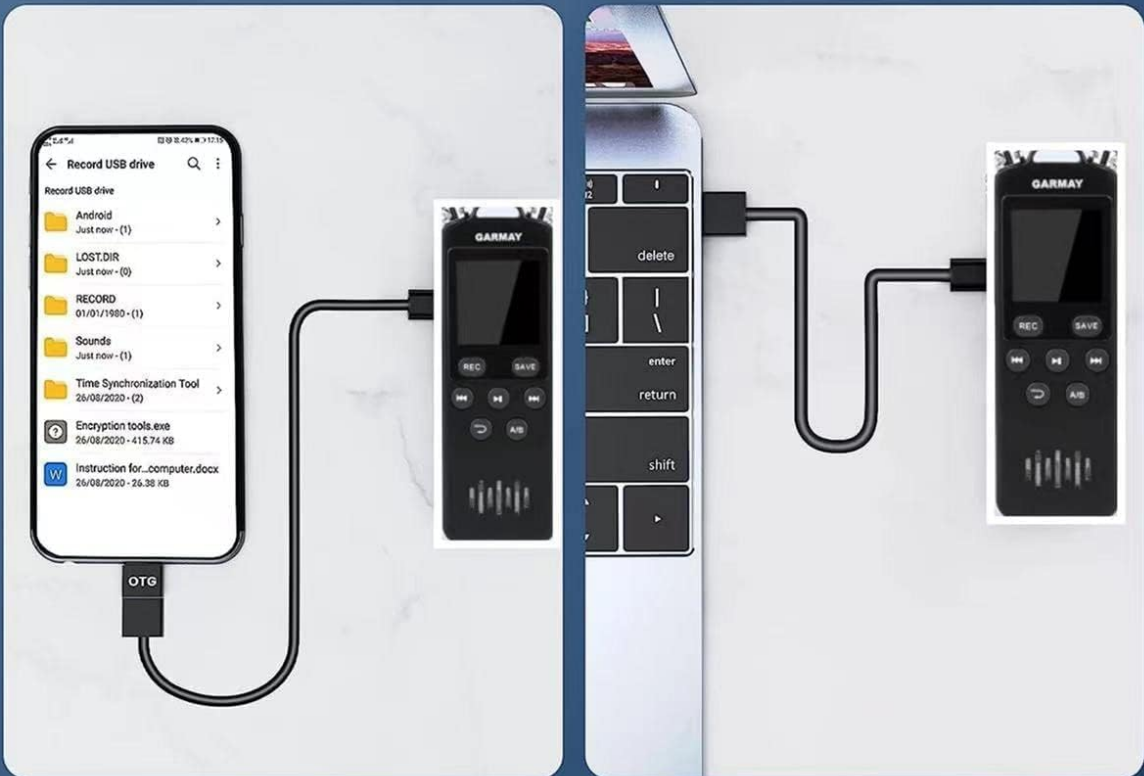

1. From the main menu, navigate to 'Recordings' or 'Folder'.
2. Select the desired file using the navigation buttons.
3. Press the **Play/Pause** button to start playback.
4. Adjust volume using **VOL+** / **VOL-** buttons.

5.4. File Transfer and Management

Connect the recorder to your computer using the supplied Micro USB cable. The device will appear as a removable disk. You can then drag and drop files to transfer, delete, or rename them. The device is compatible with Windows PC, Mac, and Android phones (an additional OTG adapter may be required for Android phones, not included).

Fast File Transfer

Compatible devices: Android phone , Windows PC / MAC

The image shows two scenarios for file transfer. On the left, an Android phone is connected to a GARMAY recorder via an OTG adapter. The phone's screen displays a file manager interface with folders like 'Android', 'LOST.DIR', 'RECORD', 'Sounds', and 'Time Synchronization Tool', along with files like 'Encryption tools.exe' and 'Instruction for...computer.docx'. On the right, a laptop is connected to the same GARMAY recorder via a standard USB cable. The recorder has a small screen and several buttons including REC, SAVE, and playback controls.

- 1 When connecting to an Android phone, another OTG adapter is required. OTG adapter is not in the package.
- 2 Connect the recorder and computer using the supplied USB cable.(Transfer/Download/ Rename/ Deleted/and so on)

6. MAINTENANCE

6.1. Cleaning

Wipe the device with a soft, dry cloth. Do not use liquid cleaners or solvents.

6.2. Storage

Store the recorder in a cool, dry place away from direct sunlight and extreme temperatures. Avoid dropping or subjecting the device to strong impacts.

6.3. Battery Care

To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use for extended periods.

7. TROUBLESHOOTING

- **Device does not power on:** Ensure the battery is charged. Connect to a power source and try again. Check the ON/OFF switch position.
- **Cannot record:** Check if there is sufficient memory space. Ensure the device is not in playback mode.
- **Poor recording quality:** Ensure the microphone is not obstructed. Reduce background noise. Adjust microphone sensitivity settings if available.
- **Cannot transfer files to computer/phone:** Ensure the USB cable is securely connected. Try a different USB port or cable. For Android phones, confirm the OTG adapter is functional and correctly connected.
- **Playback distortion:** Check the audio file format. Ensure headphones or speakers are properly connected. Adjust volume levels.
