VR-robot M7

VR-robot M7 Bluetooth Motorcycle Helmet Headset User Manual

Comprehensive guide for setup, operation, and maintenance of your M7 headset.

PRODUCT OVERVIEW

The VR-robot M7 Bluetooth Motorcycle Helmet Headset is designed to provide a seamless audio experience for motorcycle riders. It features a minimalist design with large, easy-to-operate buttons, active noise cancellation for clear audio even at high speeds, and a long-lasting battery. Enjoy high-quality music, FM radio, GPS voice guidance, and automatic call answering, all while maintaining focus on the road.

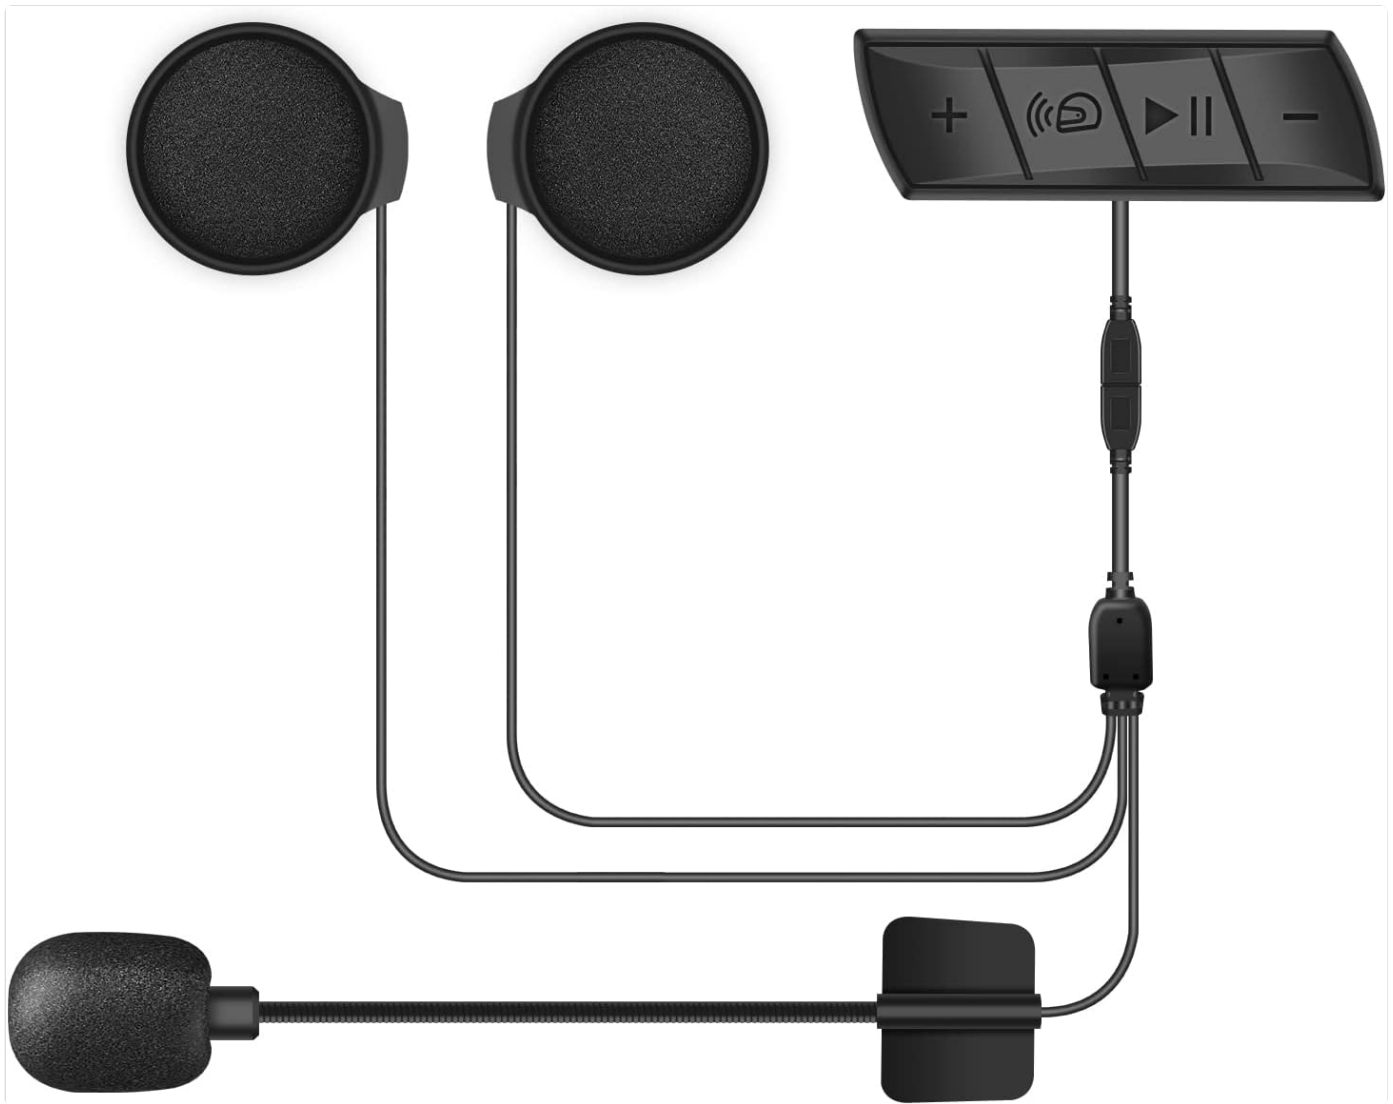

Image: Overview of the VR-robot M7 headset components, including the main control unit, speakers, and microphone.

- **Comfortable and Minimalist Design:** Streamlined large button design for easy operation with gloves. Includes sponge noise-canceling headset cover for comfort.
- **High Quality Music and Noise Cancellation:** DSP and CVC advanced noise cancellation technology for clear audio up to 20m transmission distance. Supports Hi-Fi stereo music, FM radio, and GPS voice guidance.
- **Long Standby and Voice Assistant:** Built-in 500mAh rechargeable battery provides 180H music and 360H standby time. Intelligent voice assistant system with Siri compatibility.
- **Auto Answer Phone:** Bluetooth 5.0 with CSR 5.0 chip supports intelligent noise cancellation and automatic incoming call answering. Allows switching between two connected Bluetooth devices.
- **Strong Helmet Compatibility:** IPX67 waterproof design for use in various weather conditions. Suitable for full-face and most half-face helmets with Velcro mounting.

WHAT'S IN THE BOX

Your VR-robot M7 package includes the following items:

- M7 Bluetooth Helmet Headset Main Unit
- Speaker and Microphone Assembly
- USB Charging Cable
- User Manual
- Ear Cushions (Sponge noise-canceling covers)
- Velcro Mounting Pads

No fear of wind, snow and dust

Advanced waterproof technology, no fear of wind and rain,
super protection, durable

SETUP & INSTALLATION

Follow these steps to properly install your VR-robot M7 headset into your helmet.

1. **Prepare the Headset:** Before installation, ensure the headset is functioning normally. Connect the speaker and microphone assembly to the main control unit.
2. **Attach Main Unit:** Identify a suitable flat surface on the side of your helmet for the main control unit. Clean the surface thoroughly. Peel off the adhesive backing from the mounting pad and firmly press the main unit onto the helmet.

Auto answer

There is no need to reach out and hold the mobile phone for incoming calls, which is safer and more convenient

Image: Demonstrates attaching the main control unit to the side of a motorcycle helmet using the adhesive pad.

3. **Install Speakers:** Open the helmet's inner lining. Place the speakers inside the helmet, aligning them with your ears. Use the provided Velcro pads to secure them firmly. Ensure the speaker wires are neatly tucked away within the helmet lining.

Image: Shows the process of placing and securing the headset speakers inside the helmet's ear pockets.

4. **Position Microphone:** Route the microphone arm towards your mouth. Secure the microphone base within the helmet lining, ensuring it is close enough for clear voice pickup but not obstructing your vision or comfort.
5. **Cable Management:** Carefully tuck all excess cables into the helmet's lining to prevent tangling and ensure a comfortable fit.

OPERATING INSTRUCTIONS

Power On & Bluetooth Connection

1. **Power On:** When the headset is off, press and hold the power button (center button) for 3 seconds. You will hear a voice prompt "Power on", and the red and blue lights will flash alternately, indicating it has entered pairing state.
2. **Connect to Phone:** On your mobile phone, enable Bluetooth and search for "M7" in the list of available devices. Select "M7" to connect. Once connected, the voice prompt will confirm, and the indicator light will change.

Connecting Two Phones Simultaneously

1. **First Connection:** After booting into the pairing state, connect to one of your mobile phones via Bluetooth as described above.
2. **Enter Pairing Mode Again:** After connecting the first phone, turn off its Bluetooth. The headset will return to pairing mode.
3. **Second Connection:** Turn on the Bluetooth of your second mobile phone and connect to "M7".
4. **Reconnect First Phone:** Re-enable the Bluetooth of the first paired mobile phone. The headset will automatically connect back to the last connected device. Both phones should now be successfully connected.

MAINTENANCE

Proper care and maintenance will extend the life of your VR-robot M7 headset.

- **Cleaning:** Use a soft, damp cloth to wipe the main unit and speakers. Avoid using harsh chemicals or abrasive cleaners.
- **Charging:** Charge the headset using the provided USB cable. Ensure the charging port is dry before connecting the cable. Avoid overcharging.

Image: Visual representation of the headset's battery charging status.

- **Storage:** When not in use for extended periods, store the headset in a cool, dry place away from direct sunlight and extreme temperatures.
- **Water Resistance:** The headset is IPX67 waterproof, meaning it is protected against temporary immersion in water. However, avoid prolonged submersion or exposure to high-pressure water jets.

TROUBLESHOOTING

If you encounter issues with your VR-robot M7 headset, refer to the following common problems and solutions:

Problem	Solution
---------	----------

Problem	Solution
Low Volume	Ensure the headset volume is increased using the "+" button. Check the volume settings on your connected mobile phone. Ensure speakers are correctly positioned close to your ears inside the helmet.
Wind Noise During Calls	Reconnect to Bluetooth. Reduce motorcycle speed when answering calls to minimize wind interference.
Voice Assistant Not Responding	Ensure your phone's voice assistant (e.g., Siri) is enabled. Press and hold the pause button for 2-4 seconds to activate.
Headset Not Pairing	Ensure the headset is in pairing mode (red and blue lights flashing alternately). Turn off and on your phone's Bluetooth. Restart both the headset and your phone.
