ghd Curve Tapered Wand 0.5 Inch Curling Wand User Manual

Model: 99350101244

Brand: ghd

INTRODUCTION

The ghd Curve Tapered Wand is a professional hair curling tool designed to create a variety of styles, from soft beachy waves to tight, defined curls. Featuring patented Ultra-Zone technology, this wand maintains an optimal styling temperature of 365°F (185°C) to ensure consistent results and minimize heat damage. Its ceramic tapered barrel allows for versatile styling on different hair lengths and types.

SAFETY INFORMATION

- Always ensure the appliance is unplugged when not in use and before cleaning.
- Do not use this appliance near water, such as in bathtubs, showers, or basins.
- Keep the appliance out of reach of children.
- Allow the appliance to cool completely before storing.
- The ghd Curve Tapered Wand features an automatic sleep mode that activates after 30 minutes of inactivity, turning the appliance off for safety.
- Avoid contact with skin when the appliance is hot.

PRODUCT OVERVIEW

The ghd Curve Tapered Wand is engineered for ease of use and professional results. Key features include a tapered ceramic barrel, a cool tip for safe handling, and a simple on/off switch.

SETUP

1. **Unpack:** Carefully remove the ghd Curve Tapered Wand from its packaging. Retain the instruction manual for future reference.
2. **Plug In:** Insert the power cord into a suitable electrical outlet.
3. **Power On:** Press and hold the power button located on the handle. The indicator light will illuminate, and the device will emit an audible signal, indicating it is heating up. The wand will be ready for use when the light stops flashing and the signal sounds again, typically within 25 seconds.

OPERATING INSTRUCTIONS

For optimal results and hair protection, ensure your hair is completely dry before styling. Consider applying a heat protectant spray, such as ghd Curl Hold Spray, to enhance curl longevity and protect hair from heat.

1. **Section Hair:** Divide your hair into manageable sections, approximately 1-2 inches wide, depending on the desired curl tightness.
2. **Position the Wand:** Hold the wand with the tapered end pointing downwards.
3. **Wrap Hair:** Starting from the root, wrap a section of hair around the barrel, ensuring the hair lies flat against

the ceramic surface. Leave approximately 0.5 to 1 inch of the hair ends unwrapped for a more natural, beachy wave effect.

4. **Hold and Release:** Hold the hair in place for 5-8 seconds. The precise time may vary based on hair type and desired curl intensity. Gently release the hair from the barrel.
5. **Cool and Set:** Allow the newly formed curl to cool completely before touching or brushing it. This helps to set the curl and ensure long-lasting results.
6. **Repeat:** Continue this process for all sections of your hair.
7. **Finish:** Once all hair is curled and cooled, gently run your fingers through the curls to loosen them for a softer look, or leave them as is for more defined curls.

MAINTENANCE

- **Cleaning:** Ensure the wand is unplugged and completely cool before cleaning. Wipe the ceramic barrel with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** Store the cooled wand in a safe, dry place, away from moisture and direct heat. Ensure the cord is not tightly wrapped around the appliance to prevent damage.

TROUBLESHOOTING

- **Appliance not heating:** Ensure the power cord is securely plugged into a working electrical outlet and the power button is pressed. If the issue persists, contact customer support.
- **Hair getting caught:** The ghd Curve Tapered Wand is designed with a smooth ceramic barrel to minimize snagging. Ensure hair sections are detangled before wrapping and avoid wrapping hair too close to the base of the wand where the barrel meets the handle.
- **Curls not holding:** Ensure hair is completely dry before styling. Use a heat protectant and curl hold spray.

Allow curls to cool completely before disturbing them.

SPECIFICATIONS

Feature	Detail
Product Dimensions	14.25 x 2 x 1.5 inches
Weight	0.02 ounces
Item Model Number	99350101244
UPC	850011636312
