7. Troubleshooting

Problem	Possible Cause	Solution
Bed feels wobbly or unstable.	Loose hardware connections.	Check and tighten all bolts and screws. Ensure all parts are correctly aligned.
Slats creak or make noise.	Uneven weight distribution or loose slat connections.	Ensure mattress is centered. Verify all slats are properly seated and secured. If necessary, add additional support or felt pads between slats and frame.
Missing or damaged parts upon arrival.	Shipping damage or packaging error.	Do not proceed with assembly. Contact customer support immediately with your order details.
Difficulty aligning holes during assembly.	Parts are not correctly oriented or minor manufacturing variance.	Double-check part orientation against diagrams. Apply gentle pressure or slightly adjust alignment. If a hole is too shallow, carefully clear it. Avoid forcing parts.
