## Kisonli L-8080

# Kisonli L-8080 Wired Mini Speaker with RGB LED Light - User Manual

Model: L-8080 | Brand: Kisonli

## 1. INTRODUCTION

Thank you for purchasing the Kisonli L-8080 Wired Mini Speaker with RGB LED Light. This manual provides essential information for the safe and efficient operation of your new speaker system.

Please read this manual thoroughly before use and retain it for future reference.

The Kisonli L-8080 is a compact wired speaker system designed for personal computers. It features vibrant RGB LED lighting and delivers clear audio. The speakers connect via USB and are suitable for tabletop placement.

## 2. SAFETY INFORMATION

- Do not expose the device to water or excessive moisture. This product is not water-resistant.
- Avoid placing the speaker near heat sources, such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Use only attachments/accessories specified by the manufacturer.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Do not attempt to service this product yourself. Refer all servicing to qualified service personnel.
- Keep out of reach of children.

## 3. PACKAGE CONTENTS

Please check the package contents carefully. If any items are missing or damaged, contact your

retailer.

- Kisonli L-8080 Mini Speaker (2 units)
- User Manual

### Key Features:

- Compact design for desktop use.
- Wired USB connectivity for power and audio.
- Integrated RGB LED lighting.
- Tabletop mounting type.

## 5. SETUP INSTRUCTIONS

Follow these steps to set up your Kisonli L-8080 speakers:

1. **Placement:** Place the two speakers on a stable, flat surface, such as your desk, ensuring they are positioned for optimal sound delivery.
2. **Connect USB Cable:** Locate the integrated USB cable from the speaker system. Plug the USB connector into an available USB port on your personal computer or a compatible USB power adapter. This connection provides power to the speakers and transmits the audio signal.

3. **Audio Output Selection:** On your computer, ensure that the Kisonli L-8080 speakers are selected as the default audio output device. This can typically be done through your operating system's sound settings.
4. **Power On:** The speakers will power on automatically once connected to a powered USB port. The RGB LED lights will illuminate.

## 6. OPERATING INSTRUCTIONS

### 6.1 Audio Playback

- Once connected and powered on, the speakers are ready to play audio from your connected computer.
- Control the volume directly from your computer's operating system or through the volume control integrated into the speaker cable (if present).

### 6.2 RGB LED Lighting

- The speakers feature automatic RGB LED lighting that cycles through various colors.
- The product specifications mention a "remote control" method. If your speaker cable includes an inline controller, use it to adjust lighting modes or turn the lights on/off. Refer to the specific controls on your speaker's cable.

## 7. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the speakers. Do not use liquid cleaners or aerosol sprays.
- **Storage:** When not in use for extended periods, store the speakers in a cool, dry place, away from direct sunlight and extreme temperatures.
- **Cable Care:** Avoid bending or crimping the USB cable excessively to prevent damage.

## 8. TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound from speakers.	<ul style="list-style-type: none"> <li>◦ USB cable not properly connected.</li> <li>◦ Speakers not selected as default audio device.</li> <li>◦ Volume too low on computer or speaker.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Ensure USB cable is securely plugged into a working USB port.</li> <li>◦ Check your computer's sound settings and select the Kisonli L-8080 as the output device.</li> <li>◦ Increase volume on your computer and any inline speaker controls.</li> </ul>
RGB lights are not working.	<ul style="list-style-type: none"> <li>◦ Speakers not receiving power.</li> <li>◦ Lighting feature turned off (if controllable).</li> </ul>	<ul style="list-style-type: none"> <li>◦ Verify the USB connection is providing power. Try a different USB port.</li> <li>◦ If your speakers have an inline controller, check if the lights have been manually turned off.</li> </ul>
Sound quality is poor or distorted.	<ul style="list-style-type: none"> <li>◦ Audio source issue.</li> <li>◦ Volume set too high, causing distortion.</li> </ul>	<ul style="list-style-type: none"> <li>◦ Test with a different audio source or file.</li> <li>◦ Reduce the volume on your computer and speakers.</li> </ul>
