Vente-unique AGLENA

AGLENA Corner Whirlpool Bathtub User Manual

Model: AGLENA | Brand: Vente-unique

Introduction

The AGLENA corner whirlpool bathtub is designed to provide a luxurious and relaxing bathing experience. Featuring a modern design, it includes advanced hydrojet massage systems and a unique cascade water feature. This manual provides essential information for the safe installation, operation, and maintenance of your new bathtub.
Key features include 8 hydrojets (4 lateral and 4 back), a hand shower, and two comfortable headrests, all designed to enhance your relaxation.

Safety Information

- Always ensure the bathtub is properly grounded by a qualified electrician.
- Do not operate the hydrojet system without sufficient water in the tub.
- Keep electrical components dry and away from water splashes.
- Children and individuals with health conditions should be supervised when using the bathtub.
- Avoid using abrasive cleaners or harsh chemicals that may damage the acrylic surface.
- Ensure proper ventilation in the bathroom to prevent excessive humidity.

Setup and Installation

The AGLENA bathtub is designed for floor-standing installation. Due to its size and weight, professional installation by a licensed plumber and electrician is highly recommended to ensure proper water and electrical connections.

Figure 1: Front view of the AGLENA Corner Whirlpool Bathtub, showcasing its compact corner design and integrated features.

Pre-Installation Checks:

- Verify the floor can support the weight of the filled bathtub (approximately 350 liters of water + 82 kg tub weight + user weight).
- Ensure adequate space for the 150 cm x 150 cm footprint and 60 cm height.
- Confirm availability of 220-240V, 50Hz electrical supply with appropriate circuit protection.
- Prepare water supply lines (hot and cold) and drainage connections.

Installation Steps (Summary - Consult a Professional):

1. Position the bathtub in the desired corner, ensuring the adjustable feet are level.
2. Connect the hot and cold water supply lines to the integrated faucet system.
3. Install the included siphon and connect it to the main drainage system.
4. Connect the electrical pump to the dedicated power outlet, ensuring all connections are waterproof and meet local electrical codes.
5. Perform a leak test by filling the tub and running the jets before final sealing.
6. Install the front apron (tablier) if not pre-attached.

Operating Instructions

Familiarize yourself with the controls before first use.

Figure 2: Close-up of the integrated controls and hand shower for water flow and jet activation.

Filling the Bathtub:

- Turn the main faucet knob to fill the tub with water to the desired level. Ensure the water level is above the highest jet before activating the massage system.
- The integrated cascade system provides a unique water flow.

Figure 3: The elegant cascade water feature, providing a soothing visual and auditory experience.

Using the Hydrojet System:

- Once the tub is filled, locate the hydrojet activation button on the control panel.
- Press the button to activate the 8 hydrojets (4 lateral and 4 back).
- Adjust the intensity of the jets if a control is available (refer to specific knob functions).
- To turn off the jets, press the activation button again.

Using the Hand Shower:

- Pull out the hand shower from its holder.
- Use the diverter knob on the control panel to switch water flow from the main faucet/cascade to the hand shower.
- Adjust water temperature and flow using the main faucet knobs.

Headrests:

- The two integrated headrests are designed for maximum comfort during your bath.

Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your AGLENA bathtub.

Figure 4: Overhead view highlighting the placement of hydrojets and headrests for comprehensive cleaning.

Cleaning the Bathtub Surface:

- Use a soft cloth or sponge with mild, non-abrasive bathroom cleaner.
- Rinse thoroughly with clean water after cleaning to remove all soap residue.
- For stubborn stains, consult a specialized acrylic bathtub cleaner. Avoid acetone, ammonia, or abrasive powders.

Hydrojet System Cleaning:

- Periodically fill the tub with warm water and add a small amount of non-foaming jet cleaner or white vinegar.
- Run the hydrojet system for 10-15 minutes to circulate the cleaning solution.
- Drain the tub and refill with clean water, then run the jets again for a few minutes to rinse the system.

Drain and Siphon Maintenance:

- Regularly check the drain for hair and debris to prevent blockages.
- Clean the siphon periodically as needed to ensure efficient drainage.

Troubleshooting

This section addresses common issues you might encounter with your AGLENA bathtub. For complex problems, contact a qualified technician.

Problem	Possible Cause	Solution
Hydrojets not working	Insufficient water level; Power supply issue; Pump malfunction.	Ensure water level is above jets. Check power connection and circuit breaker. Contact service if pump is faulty.
Weak jet pressure	Clogged jets; Low water pressure; Pump issue.	Clean jets as per maintenance section. Check household water pressure. Contact service for pump inspection.
Water not draining	Clogged drain or siphon.	Remove drain cover and clear any debris. Clean siphon if accessible.
Unusual noise from pump	Air in system; Loose components; Pump bearing issue.	Ensure tub is adequately filled. Check for loose connections. Contact service for pump inspection.

Specifications
