LOCKINK Low Temperature Drip Candle Set

Flaming Valentines Candle Set Instruction Manual

Brand: **LOCKINK** | Model: **Low Temperature Drip Candle Set**

INTRODUCTION

This instruction manual provides essential information for the safe and effective use of your LOCKINK Flaming Valentines Candle Set. Designed for romantic relaxation and celebration, these low-temperature drip candles offer a unique visual experience. Please read this manual thoroughly before first use and retain it for future reference.

SAFETY INFORMATION

Your safety is paramount. Adhere to the following warnings to prevent accidents and ensure proper use:

- **Never leave burning candles unattended.** Always keep candles within sight.
- Burn candles on a stable, heat-resistant surface, away from drafts and flammable materials.
- **Be cautious when using the ladle:** The candle-pin and the edge of the leaves are sharp and prickly. Handle with care.
- Keep candles and all related components away from children and pets.
- When lighting a candle, the burning part will become very hot. Exercise caution.

- It is recommended that the flame be blown out just before the burn is complete to prevent overheating of the base.

PRODUCT FEATURES

The LOCKINK Flaming Valentines Candle Set is designed with several key features for an optimal experience:

- **Premium Low-Heat Wax:** Crafted from high-quality wax with a low melting point (118-126°F / 48-52°C), ensuring a warm but not excessively hot experience.
- **Non-Sticky Formula:** The wax is designed to be non-sticky, making cleanup simple and hassle-free.
- **Ergonomic Ladle/Holder:** Includes a specially designed metal ladle that serves as a candle holder, providing ease of handling and a stable base.
- **Approximate 1-Hour Burn Time:** Each candle provides approximately one hour of flame, ideal for short, focused sessions.
- **Creative Design:** The unique "wiring harness" design in red and black adds a distinctive aesthetic.

SETUP

1. **Unpack:** Carefully remove the candles and the metal ladle from their packaging.
2. **Placement:** Choose a stable, flat, and heat-resistant surface for burning the candle. Ensure it is away from flammable materials, drafts, and out of reach of children and pets.
3. **Insert Candle:** Place one of the Flaming Valentines Candles securely into the provided metal ladle/holder. Ensure the candle is upright and stable.

OPERATING INSTRUCTIONS

1. **Lighting the Candle:** Using a long match or lighter, carefully ignite the wick of the candle. Allow the flame to establish.
2. **Managing Drips:** The design of these candles encourages dripping. The low-temperature wax ensures that any drips are warm but not scalding. You can gently tilt or rotate the ladle to guide the wax flow if desired, or simply allow it to drip naturally onto the holder.
3. **Burn Time:** Each candle is designed to burn for approximately one hour. Monitor the candle as it burns.

4. **Extinguishing the Flame:** To extinguish the candle, gently blow out the flame. It is recommended to extinguish the candle just before it completely burns down to the base to prevent the base from becoming excessively hot.

MAINTENANCE & CLEANING

The non-sticky wax formula makes cleaning straightforward:

- **Cleaning the Ladle/Holder:** If wax has dripped onto the metal ladle, soak the ladle in warm water for a few minutes. The wax will soften and can then be easily peeled off.
- **Wax on Skin:** In case wax gets on your skin, apply the same method: soak the affected skin area in warm water, and the wax can then be gently removed.
- **Storage:** Store unused candles in a cool, dry place away from direct sunlight to maintain their shape and quality.

TROUBLESHOOTING

Here are solutions to common issues you might encounter:

- **Uneven Burn:** If the candle is burning unevenly, ensure it is placed on a level surface and away from drafts. Trim the wick to about 1/4 inch before each use to promote an even burn.
- **Difficulty Lighting:** If the wick is too short, carefully trim away some wax around the wick to expose more of it.
- **Excessive Dripping:** While these are drip candles, if dripping is more than desired, ensure the candle is not in a drafty area, which can cause faster, uneven melting.

SPECIFICATIONS

Attribute	Detail
Brand	LOCKINK
Color	Black, Red (as a set)
Item Weight	Approx. 0.3 Grams (per candle) / 0.011 ounces
Number of Items	2 (Candles)
Indoor/Outdoor Usage	Indoor
Specific Uses For Product	Celebration, Relaxation, Date
Material	Synthetic Wax
Container Material	Metal (Ladle/Holder)
Occasion	Date, Valentine's, Anniversary
