

BWE 7007

BWE Freestanding Bathtub Faucet Model 7007-Black Instruction Manual

Brand: BWE | Model: 7007

IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage, personal injury, or voiding of warranty.

- **Professional Installation Recommended:** For optimal performance and safety, professional plumbing installation is highly recommended.
- **Water Pressure:** Ensure your water pressure is within acceptable limits for plumbing fixtures. Consult a professional if unsure.
- **Hot Water Safety:** Exercise caution when operating the faucet to avoid scalding. Test water temperature before use.
- **Inspect Components:** Before installation, carefully inspect all components for any damage. Do not install damaged parts.
- **Local Codes:** Ensure all installation procedures comply with local plumbing and building codes.

PRODUCT OVERVIEW

The BWE Freestanding Bathtub Faucet Model 7007-Black is designed to provide a modern and functional addition to your bathroom. It features a durable brass construction with a matte black finish, a waterfall spout, a single handle for water control, and an integrated hand shower.

Key Features:

- **Premium Material:** Solid brass body ensures rust resistance and durability.
- **Matte Black Finish:** Anti-fingerprint and water stain resistant for easy cleaning.
- **Waterfall Spout:** Provides a unique and elegant water flow.
- **Single Handle Control:** Easily adjust water temperature and flow.
- **Hand Shower:** High-pressure handheld shower with a flexible stainless steel hose for versatile use.

- **Floor Mount Design:** Includes a brass tripod base and expansion screws for stable floor installation.
- **Swivel Spout:** The main spout can swivel for convenience.

Included Components:

The package contains all necessary hardware for installation. Please verify all parts are present before beginning installation.

INSTALLATION INSTRUCTIONS

Before starting, ensure you have all necessary tools and that your water supply lines are ready. Turn off the main water supply before beginning any plumbing work.

Tools You May Need:

- Adjustable Wrench
- Pipe Wrench
- Drill (for floor mounting)
- Level
- Sealant Tape (Teflon Tape)
- Safety Glasses

Step-by-Step Installation:

1. **Prepare the Installation Area:** Position the faucet in the desired location next to your freestanding bathtub. Mark the drilling points for the brass tripod base on the floor. Ensure the area is clean and clear.
2. **Install the Brass Tripod Base:** Drill holes at the marked points. Insert the expansion screws into the holes and secure the brass tripod base to the floor. Ensure it is level and firmly attached.
3. **Connect Water Supply Lines:** Connect the hot and cold water supply hoses to your existing water supply valves. Use sealant tape on threaded connections to prevent leaks. Route the other ends of the hoses through the floor and up to the faucet body.
4. **Mount the Faucet Body:** Carefully place the faucet body onto the brass tripod base, aligning the connections for the water supply hoses. Secure the faucet body to the base using the provided mounting hardware. Ensure the faucet is stable and upright.
5. **Connect Hand Shower Hose:** Attach the flexible shower hose to the designated outlet on the faucet body and to the handheld shower head. Hand-tighten, then use a wrench for a snug fit, being careful not to overtighten.
6. **Install Cover Plate:** Slide the decorative cover plate down to conceal the mounting hardware and base connections at the floor level.
7. **Test for Leaks:** Slowly turn on the main water supply. Check all connections for any signs of leaks. If leaks are detected, tighten the connections as needed. Operate the faucet and hand shower to ensure proper function and check for any further leaks.

OPERATING INSTRUCTIONS

The BWE Freestanding Bathtub Faucet is designed for intuitive operation, allowing you to easily control water flow, temperature, and outlet mode.

Water Flow and Temperature Control:

The single handle controls both water flow and temperature:

- **To Turn On/Off:** Lift the handle to turn on the water. Push it down to turn off.
- **To Adjust Flow:** The further you lift the handle, the greater the water flow.
- **To Adjust Temperature:** Swivel the handle left for hot water and right for cold water.

Switching Water Outlet Modes:

The faucet features a diverter knob to switch between the waterfall spout and the handheld shower.

- **Waterfall Spout:** Ensure the diverter knob is in the position for the main spout. Water will flow from the

wide waterfall opening.

- **Handheld Shower:** Pull or push the diverter knob (depending on model) to redirect water flow to the handheld shower.

Swivel Spout Functionality:

The main waterfall spout can be swiveled 360 degrees, allowing you to direct the water flow as needed for filling the tub or for convenience.

MAINTENANCE AND CARE

Proper care will help maintain the finish and functionality of your BWE faucet for years to come.

- **Cleaning the Finish:** Clean the matte black finish regularly with a soft, damp cloth. For stubborn spots, use a mild soap and water solution. Rinse thoroughly and dry with a soft cloth to prevent water spots.
- **Avoid Harsh Cleaners:** Do not use abrasive cleaners, ammonia-based products, bleach, or cleaners containing alcohol or harsh chemicals. These can damage the finish and void your warranty.
- **Prevent Mineral Buildup:** In areas with hard water, wipe down the faucet after each use to prevent mineral deposits. For existing buildup, a solution of white vinegar and water can be used sparingly, followed by thorough rinsing.
- **Check Connections:** Periodically inspect all water connections for any signs of leaks or corrosion. Tighten connections if necessary.
- **Hand Shower Nozzles:** If the handheld shower nozzles become clogged with mineral deposits, gently rub them to dislodge the buildup.

TROUBLESHOOTING

If you encounter any issues with your faucet, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Low Water Flow	Clogged aerator/spout, kinked supply line, low water pressure.	Clean the spout opening. Check supply lines for kinks. Verify household water pressure.
Leaks at Connections	Loose connections, worn washers/O-rings, insufficient sealant tape.	Tighten connections. Replace worn washers/O-rings. Reapply sealant tape.
Water Not Switching Between Spout and Hand Shower	Diverter knob malfunction, debris in diverter mechanism.	Ensure diverter knob is fully engaged. Inspect for debris and clean if necessary.
Hand Shower Leaks	Loose hose connection, damaged washer in hand shower or hose.	Tighten hose connections. Check and replace washers if damaged.

If the problem persists after attempting these solutions, please contact customer support.

WARRANTY AND CUSTOMER SUPPORT

BWE products are manufactured to high-quality standards and are backed by a limited warranty. Please refer to the warranty card included with your purchase for specific terms and conditions.

For technical assistance, replacement parts, or warranty claims, please contact BWE customer support through the retailer where the product was purchased or visit the official BWE website for contact information.

Contact Information: Please refer to your purchase documentation or the BWE official website for the most current customer support details.
