7. TROUBLESHOOTING

If you encounter issues with your WOOX Smart Socket R6087, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Device cannot connect to Wi-Fi / App shows "offline"	Incorrect Wi-Fi password, 5GHz Wi-Fi network, weak signal, or device too far from router.	Ensure you are using a 2.4GHz Wi-Fi network. Check Wi-Fi password. Move the smart socket closer to the router. Reset the smart socket and try pairing again.
Voice control not working	Incorrect linking with Alexa/Google Assistant, device name not recognized, or voice assistant device is offline.	Verify that the WOOX Home account is correctly linked in your Alexa/Google Home app. Ensure the device name is simple and easily recognizable. Check the voice assistant device's internet connection.
Smart socket not responding	Power outage, smart socket unplugged, or app connectivity issue.	Check if the smart socket is properly plugged in and receiving power. Verify your home Wi-Fi network is active. Restart the WOOX Home app.
Scheduling not activating	Incorrect schedule settings, or smart socket is offline at scheduled time.	Review the schedule settings in the WOOX Home app for accuracy. Ensure the smart socket has a stable Wi-Fi connection at the scheduled time.
