Kozyard KZAHG1012GRA

Kozyard Alexander 10' x 12' Hardtop Gazebo Instruction Manual

Model: KZAHG1012GRA

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your Kozyard Alexander 10' x 12' Hardtop Gazebo. Please read all instructions carefully before beginning assembly and retain this manual for future reference. This gazebo is designed to provide a durable outdoor living space with a galvanized steel double roof, aluminum frame, and integrated curtains and netting.

SAFETY INFORMATION

Adherence to the following safety guidelines is crucial for safe assembly and long-term use of your gazebo:

- **Read All Instructions:** Ensure you understand all steps before assembly.
- **Two-Person Assembly:** Assembly typically requires at least two adults. Some steps may require more.
- **Wear Protective Gear:** Gloves are recommended to protect hands from sharp edges during assembly.
- **Clear Work Area:** Assemble the gazebo in a clear, level area free from obstructions.
- **Anchoring:** The gazebo must be properly anchored to a solid surface to withstand wind and snow loads. Refer to the "Setup and Assembly" section for anchoring details.
- **Weather Conditions:** While designed for durability, extreme weather conditions (e.g., severe storms, heavy snowfall beyond specified limits) may require additional precautions or temporary disassembly.
- **Overhead Clearance:** Ensure adequate overhead clearance from power lines, tree branches, and other structures.
- **Tool Usage:** Use appropriate tools as specified. Avoid over-tightening fasteners, which can strip threads or damage

components.

PACKAGE CONTENTS

Before beginning assembly, verify that all parts are present and undamaged. Refer to the parts list provided in your physical instruction manual. Components are typically organized into multiple boxes.

- Aluminum Frame Components (posts, beams, connectors)
- Galvanized Steel Roof Panels
- Curtains (polyester)
- Mosquito Netting (mesh)
- Hardware Kit (screws, bolts, washers, nuts, hex wrenches)
- Integrated Gutter System Components

SETUP AND ASSEMBLY

Assembly of the Kozyard Alexander Gazebo requires careful attention to detail and typically two or more people. It is recommended to lay out all parts and organize them according to the provided physical manual before starting. Do not fully tighten any fasteners until instructed, as adjustments will be necessary.

1. Site Preparation

Choose a level surface for installation. Ensure adequate space around the gazebo for assembly and future use. The gazebo dimensions are 10' x 12' (120"W x 144"L x 115.2"H).

10' X 12' DIMENSIONS

Image: Detailed dimensions and anchor blueprint for the 10' x 12' Kozyard Alexander Gazebo.

2. Frame Assembly

Begin by assembling the main aluminum frame. The frame features 4.7" x 4.7" triangular aluminum poles and 5" x 4" reinforced beams for stability. Ensure all connections are secure but leave bolts slightly loose for alignment during roof installation.

COLUMN

Pure aluminum casting
No welding, no splicing
Foundation anchoring

3. Roof Installation

The roof consists of galvanized steel panels. Install these panels carefully, ensuring they fit into the channels. The double-roof design enhances ventilation and wind resistance. It is crucial to align the panels correctly before tightening any screws. Some users find it helpful to use painter's tape to secure panels temporarily and to keep fasteners loose until all panels are in place.

GALVANIZED CEILING

The galvanized material has a smooth surface and high reflectivity, providing insulation and smooth rainwater flow. thickened materials can reduce the sound of rain.

Image: Cross-section of the galvanized ceiling, detailing the thickened steel plate and its properties for insulation and smooth water flow.

4. Gutter System Assembly

The integrated water-gutter system channels rainwater away. Ensure all gutter components are correctly installed and sealed to prevent leaks. Water will drain down the poles.

DRAINAGE SYSTEM

Double roof slope drainage, quick drainage without blockage. The eaves have water gutter, drainage along columns.

Image: Visual representation of the double roof slope drainage system with integrated water gutters and column drainage.

5. Anchoring

Once the main structure is complete, anchor the gazebo securely to the ground using the provided hardware. Proper anchoring is essential for stability, especially in windy conditions (up to 60 MPH wind resistance when anchored) and under snow loads (up to 2,500-lb snow load capacity).

6. Curtains and Netting Installation

Install the gray polyester curtains and mesh netting using the dual-track system. The curtains and netting feature double-sided zippers for full enclosure, providing privacy, UV protection, and insect deterrence.

DOUBLE TRACKS

Support the installation of curtains and mosquito nets. The curtains are made of **FLAME-RETARDANT MATERIALS** and weigh up to **180 g**. Competitors are usually not flame retardant materials, weighing around 140 g.

Image: Detail of the double tracks designed for easy installation of flame-retardant curtains and mosquito nets.

OPERATING INSTRUCTIONS

Your Kozyard Alexander Gazebo is designed for versatile outdoor use.

- **Curtains and Netting:** Use the dual-track system to adjust the curtains for privacy or sun protection, and the netting to keep insects out. Zip them fully for complete enclosure.
- **Ceiling Hook:** A reinforced ceiling hook is provided for hanging outdoor lights or a ceiling fan. Ensure any hung items do not exceed the weight limit specified in the physical manual.

INTERIOR

Multi spoke frame structure enhances structural stability. There are some hooks on the top that can hang fans, lights, etc.

Image: Interior view highlighting the multi-spoke metal frame for stability and the built-in hook for hanging lights or fans.

MAINTENANCE

Regular maintenance will extend the life and appearance of your gazebo.

- **Cleaning:** Clean the aluminum frame and steel roof with mild soap and water. Avoid abrasive cleaners. The curtains and

netting can be spot cleaned or hand washed as needed.

- **Drainage System:** Periodically check the integrated gutter system for debris (leaves, dirt) and clear any blockages to ensure efficient water runoff.
- **Fastener Check:** Annually inspect all bolts and screws for tightness and re-tighten as necessary.
- **Winter Care:** While the galvanized steel roof is designed to handle snow loads, it is advisable to regularly clear heavy snow accumulation to prevent excessive stress on the structure.

TROUBLESHOOTING

This section addresses common issues you might encounter.

- **Misaligned Holes During Assembly:** If screw holes do not align perfectly, ensure all surrounding fasteners are loose. Gently adjust the components until alignment is achieved, then tighten. Do not force screws.
- **Roof Leaks:** Check the gutter system for blockages. Inspect roof panel seams for proper seating and consider applying a

waterproof sealant if leaks persist.

- **Curtains/Netting Not Moving Smoothly:** Inspect the dual tracks for debris or damage. Ensure the fabric is not snagged.
- **Gazebo Instability:** Verify that the gazebo is properly anchored to a solid, level surface. Check all frame connections for tightness.

SPECIFICATIONS

Brand	Kozyard
Model Number	KZAHG1012GRA
Product Dimensions	144"L x 120"W x 115.2"H (10' x 12')
Item Weight	320 pounds
Frame Material	Aluminum (powder-coated)
Roof Material	Galvanized Steel
Water Resistance Level	Water Resistant
UV Protection	UV protection (level not specified)
Snow Load Capacity	2,500 lbs (when properly anchored)
Wind Resistance	Up to 60 MPH (when properly anchored)
Included Accessories	Polyester Curtains, Mesh Netting

WARRANTY AND SUPPORT

The Kozyard Alexander Hardtop Gazebo comes with a **1-year limited warranty**. Kozyard LLC guarantees parts availability and provides responsive customer service through their U.S.-based teams in New Jersey and California. For support or warranty claims, please contact Kozyard LLC directly.
