## SETUP

### 1. Assembling the Stand and Microscope

1. Attach the metal stand to the metal base. Secure it firmly using the provided knob.

2. Mount the microscope unit onto the adjustable bracket on the metal stand. Ensure it is securely fastened.
3. If extended working distance is required, insert the 4.7-inch extension tube between the microscope lens and the main body. This allows for a wider field of view, ideal for observing entire coins.

## 2. Connecting External LED Lights

The two external LED lights provide additional illumination for your specimens. Connect the Type-C end of the light cables to the USB output ports on the microscope base.

## 3. Powering On

Connect the power adapter to the microscope and a power outlet. Press the 'POWER' button on the microscope to turn it

on. The 7-inch LCD display will illuminate.

## OPERATING INSTRUCTIONS

---

### 1. Basic Viewing and Focusing

1. Place the specimen on the observation platform.
2. Adjust the height of the microscope unit using the knob on the stand until the specimen appears on the screen.
3. Rotate the focus wheel on the microscope body to achieve a clear and sharp image.

## 2. Adjusting LED Lights

The microscope features built-in LEDs and two adjustable side lights. The side lights are controlled via touch-sensitive areas on the base.

- **Built-in LEDs:** These provide primary illumination.
- **Side Lights:** Touch the designated areas on the base to turn the side lights on/off and adjust their brightness. These are useful for reducing glare and enhancing contrast on reflective surfaces.

## MAINTENANCE

- **Cleaning the Lens:** Use the provided cleaning cloth or a soft, lint-free cloth to gently wipe the lens. For stubborn smudges, use a lens cleaning solution designed for optical devices.
- **Cleaning the Screen:** Wipe the LCD screen with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **General Care:** Keep the microscope in a clean, dry environment. Avoid exposing it to extreme temperatures,

humidity, or direct sunlight. When not in use, store it in its original packaging or a protective case.

## TROUBLESHOOTING

- **No Power:** Ensure the power adapter is securely connected to both the microscope and a working power outlet. Check if the power button is pressed.
- **Blurry Image:** Adjust the focus wheel on the microscope body. Ensure the specimen is within the working distance of the lens. Clean the lens if necessary.
- **No Image on External Display (HDMI/USB):** Verify that the cables are correctly connected. For USB connection, ensure appropriate camera software is running on your computer and the microscope is selected as the input device.
- **Lights Not Working:** Check the connections of the external LED lights to the base. For touch-controlled lights, ensure you are touching the correct activation area.
- **Cannot Capture Photos/Videos:** Ensure the 32GB TF card is properly inserted and has sufficient free space. Check the menu settings to confirm the correct mode is selected.
