SuperiorTek 3.0 Wireless CarPlay Adapter

USER MANUAL

INTRODUCTION

The SuperiorTek 3.0 Wireless CarPlay Adapter is designed to convert your car's existing wired CarPlay system into a wireless one. This device allows for seamless integration of your iPhone's CarPlay features without the need for a physical cable connection, enhancing convenience and reducing clutter in your vehicle. It maintains full functionality of CarPlay, including navigation, music playback, and voice commands, with minimal latency.

PACKAGE CONTENTS

Upon opening the package, please verify that all the following items are included:

- SuperiorTek Wireless CarPlay Adapter
- USB Cable
- User Manual

PRODUCT OVERVIEW

Image: The SuperiorTek 3.0 Wireless CarPlay Adapter, a compact black device with a green indicator light.

The SuperiorTek 3.0 Wireless CarPlay Adapter is a compact and user-friendly device designed to provide a reliable wireless CarPlay experience. Its slim design allows for discreet placement within your vehicle.

Carplay Wireless Adapter

Say goodbye to cable
Easy to hide in your car
Takes 10s for initial connection
Support Siri, GPS navigation, play music, etc.

SUPPORT MOST APP

Icons for supported apps: Siri, Podcasts, Twitter, Snapchat, Phone, Maps, Podcasts, Music, Facebook, YouTube, Navigation, Messages, Music.

Image: Diagram highlighting the adapter's compact size, user-friendly nature, and reliability, along with supported applications.

This adapter eliminates the need for wired connections, allowing for quick and automatic connection to CarPlay within seconds of starting your car. It supports various CarPlay functions including Siri, GPS navigation, and music playback.

Industry-leading Power Management Chip for Stable Wireless Connection

Image: An exploded view of the adapter showing its internal components, emphasizing the 5.8GHz certification module and power management chip.

Equipped with an advanced Smart IC Chip and Next Generation Signal Filter Technology, the adapter ensures a stable and continuous connection. This technology enhances Wi-Fi signals, leading to clear audio and video, minimal lag, and responsive GPS navigation, comparable to a wired connection.

All Hands Free and Without Wires

Image: Screenshots of a car's infotainment system displaying CarPlay interfaces for music playback, real-time GPS navigation, and a voice call using Siri.

The adapter supports hands-free operation, allowing you to use CarPlay features like music, navigation, and voice calls (e.g., Siri) without physically interacting with your phone.

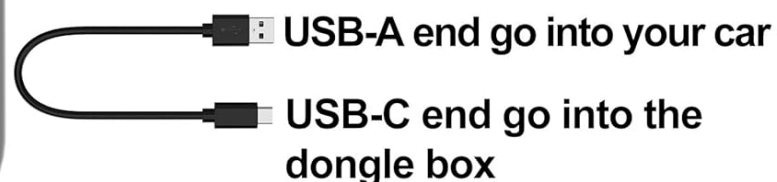

CarPlay Adapter also works with your car's controls

Image: Close-up views of a car's steering wheel buttons, infotainment touchscreen, and control knobs, indicating that the CarPlay adapter is compatible with these existing car controls.

The SuperiorTek CarPlay Adapter is designed to work seamlessly with your car's existing controls, including steering wheel buttons, touchscreen, and physical knobs, ensuring a familiar and intuitive user experience.

Enjoy Your Cordless Trip With SuperiorTek Carplay Adapter

USB-A end go into your car

**USB-C end go into the
dongle box**

Image: A diagram illustrating the connection of the SuperiorTek CarPlay Adapter: the USB-A end plugs into the car's USB-A socket, and the USB-C end plugs into the dongle box.

The adapter connects to your car's wired CarPlay USB port. The USB-A end of the provided cable connects to your car's USB-A socket, and the USB-C end connects to the adapter.

SETUP INSTRUCTIONS

Follow these steps for the initial setup of your SuperiorTek Wireless CarPlay Adapter:

1. **Prepare your phone:** Before starting, ensure your iPhone has forgotten any previous regular Bluetooth and Wi-Fi connections to your car.
2. **Start your car:** Turn on your vehicle's ignition.
3. **Access CarPlay screen:** On your car's infotainment touch screen, navigate to the CarPlay screen. Allow a few moments for the car's CarPlay module to load.
4. **Connect the adapter:** Plug the SuperiorTek wireless CarPlay adapter into the wired CarPlay USB-A socket in your car.

5. **Wait for CarPlay icon:** Observe your car's screen and wait for the CarPlay icon to illuminate or become active.
6. **Initiate Bluetooth search:** Once the CarPlay icon is active, select it on your car's screen. This action will prompt the car to begin a Bluetooth search.
7. **Pair with iPhone (Bluetooth):** On your iPhone, go to Settings and initiate a Bluetooth search. When your car's make or a relevant device name appears as an item to pair with, select it.
8. **Confirm pairing on car screen:** Your car's screen will display a pairing request. Choose to confirm the pairing.
9. **Join Wi-Fi on iPhone:** On your iPhone, go to Settings and initiate a Wi-Fi search. When your car's make or a relevant Wi-Fi network appears, select it to join.
10. **Allow CarPlay wireless link:** Your iPhone will prompt you to allow CarPlay to link wirelessly. Select "Allow" to complete the connection.

Important Notes:

- If your CarPlay socket is a Type-C type, please contact SuperiorTek for a complimentary Type-C to Type-C cable.
- The USB-A end of the cable connects to your car's CarPlay USB-A socket, and the Type-C end connects to the dongle.

OPERATION

Once successfully set up, the SuperiorTek Wireless CarPlay Adapter will automatically connect to your iPhone when you start your car, typically within 5-10 seconds. This allows you to keep your phone in your pocket or bag, reducing the wear and tear on your phone's charging port from frequent plugging and unplugging.

The adapter ensures that sound quality, map responsiveness, and overall CarPlay experience are maintained at the same level as a wired connection. All standard CarPlay features, including steering wheel controls, knobs, and touchscreen interactions, will function as expected.

The adapter also features a pass-through USB port, which can be used to charge other devices if needed.

TROUBLESHOOTING

- **Connection Issues:** If the adapter is not working properly or fails to connect, try rebooting it by simply unplugging it from the car's USB port and then plugging it back in.
- **Initial Setup Problems:** Ensure your phone has forgotten any previous Bluetooth and Wi-Fi connections to your car before attempting the setup process. This prevents conflicts with the adapter's connection.
- **Firmware Updates:** It is generally recommended **not** to update the firmware if the unit is functioning well. Firmware updates should only be performed if specifically instructed by SuperiorTek support to resolve a known issue.
- **Compatibility:** This adapter is designed for cars with existing factory wired CarPlay. It is not compatible with cars that do not have wired CarPlay or with Android Auto systems.
- **USB Port Type:** Verify that you are using the correct USB cable for your car's CarPlay USB socket (USB-A to USB-C). If your car has a Type-C CarPlay socket, ensure you have the appropriate Type-C to Type-C cable.

SPECIFICATIONS

Brand	SuperiorTek
Model Number	49bebc01-64fe-402e-bbbd-035f95d8d882
Connectivity Technology	Bluetooth, USB, Wi-Fi
Compatible Devices	Smartphone (iOS for CarPlay)
Connector Type	USB
Color	Black
Item Weight	4.2 ounces
Package Dimensions	4.61 x 3.23 x 1.46 inches
