De'Longhi ES72 YOUNG

De'Longhi Pinguino Compact ES72 YOUNG Mobile Air Conditioner User Manual

Model: ES72 YOUNG

INTRODUCTION

The De'Longhi Pinguino Compact ES72 YOUNG is a portable air conditioner designed to provide optimal comfort in your home. This compact unit offers cooling and dehumidification functions, making it versatile for various room conditions. Its design allows for easy movement between rooms and requires no permanent installation, ensuring immediate operation.

Setup

Unpacking and Component Check

Carefully remove the air conditioner and all accessories from the packaging. Ensure all components are present and undamaged.

Image: A visual representation of the components included with the De'Longhi Pinguino Compact ES72 YOUNG, such as the exhaust hose, various adapters, and the remote control.

- Portable Air Conditioner Unit
- Exhaust Hose
- Window Adapter
- Wall Flange with Cap
- Window Support with Wing Nut
- Remote Control

Placement Guidelines

Place the unit on a flat, stable surface. For optimal performance, ensure there is at least 60 cm of clear space around the air intake areas (rear and left side) to allow for proper airflow. The compact design makes it suitable for smaller rooms.

Image: The De'Longhi Pinguino Compact ES72 YOUNG positioned in a living space, demonstrating its compact size and how the exhaust hose can be routed to a window.

Exhaust Hose Installation

The exhaust hose is crucial for expelling hot air. Connect one end of the exhaust hose to the air conditioner's air outlet. The other end must be vented outside through a window or a dedicated wall opening.

Image: Two common methods for installing the exhaust hose are shown: one using a standard window opening and another using a specialized window kit for a more sealed setup.

- **Window Installation:** Attach the window adapter to the end of the exhaust hose. Open a window slightly and place the adapter in the opening, ensuring the hot air is directed outside. For better efficiency, use a window sealing kit (not included) to minimize air leakage.
- **Wall Installation:** If a permanent opening is available, use the wall flange to secure the exhaust hose.

The exhaust hose is approximately 150 cm long. Ensure it is as straight as possible to avoid kinks that can restrict airflow and reduce efficiency.

Operating Instructions

Control Panel and Remote Control

The unit can be operated using the control panel on top of the unit or the included remote control.

Pour une utilisation encore plus simple

Image: A detailed view of the air conditioner's control panel, showing buttons for mode selection, temperature adjustment, fan speed, and timer, with the remote control resting on the unit.

- **Power Button:** Turns the unit on or off.
- **Mode Button:** Cycles through operating modes: Cooling, Dehumidifying, and Fan.
- **Temperature Adjustment:** Use the up/down arrows to set the desired temperature.
- **Fan Speed:** Select from 3 available fan speeds (low, medium, high) or an automatic setting.
- **Timer:** Program the unit to turn on or off after a set period (up to 24 hours).

Operating Modes

- **Cooling Mode:** Provides cooling by expelling hot air through the exhaust hose. Set your desired room temperature.
- **Dehumidifying Mode:** Removes excess moisture from the air. The unit will collect condensed water internally.
- **Fan Mode:** Circulates air without cooling. You can select from different fan speeds.

When the set temperature is reached in cooling mode, the compressor may turn off, but the fan will continue to operate to circulate air. The compressor will restart if the room temperature rises.

Maintenance

Filter Cleaning

Regular cleaning of the air filters is essential for maintaining the unit's efficiency and performance. It is recommended to clean the filters weekly, or more frequently depending on usage and air quality.

1. Turn off the unit and unplug it from the power outlet.
2. Locate the air filters (typically at the rear or side of the unit).
3. Remove the filters carefully.
4. Clean the filters using warm water and a mild detergent. Rinse thoroughly.
5. Allow the filters to air dry completely before reinserting them into the unit. Do not expose them to direct sunlight or excessive heat.

Water Drainage

During dehumidification or in very humid conditions, water will condense inside the unit. The Pinguino Compact ES72 YOUNG is designed to evaporate most of this water automatically. However, if the internal tank becomes full, the unit will stop operating and an indicator light may illuminate.

- Locate the drainage plug at the bottom rear of the unit.
- Place a shallow pan or container beneath the plug.
- Carefully remove the plug to drain the water.
- Once drained, securely replace the plug.

Storage

Before storing the unit for an extended period, ensure it is completely dry. Drain any remaining water, clean the filters, and store the unit in a cool, dry place, preferably in its original packaging.

Troubleshooting

If you encounter issues with your De'Longhi Pinguino Compact ES72 YOUNG, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not turn on.	No power, power cord unplugged, full water tank.	Check power connection. Ensure outlet is functional. Drain water tank if full.
Insufficient cooling.	Dirty air filters, blocked air intake/outlet, room too large, open windows/doors, exhaust hose not properly vented.	Clean air filters. Ensure clear airflow. Close windows/doors. Verify exhaust hose installation.
Unit is noisy.	Normal operating noise, unit not on a flat surface, dirty fan blades.	Ensure unit is on a stable, flat surface. Clean fan blades if accessible (refer to service manual if needed). Note that some noise is normal during operation.
Water leakage.	Drain plug not secured, unit tilted.	Ensure drain plug is tightly closed. Place unit on a level surface.

If the problem persists after attempting these solutions, please contact customer support.

Specifications

Key technical specifications for the De'Longhi Pinguino Compact ES72 YOUNG:

Feature	Value
Model	ES72 YOUNG
Cooling Capacity	8,300 BTU/h (2.1 kW)
Recommended Room Volume	Up to 60 m^3
Refrigerant	R290
Power Consumption	2.1 KW (Watt)
Voltage	240V
Noise Level	47 to 52 dB(A) (Operating), 65 dB (Max)
Dimensions (L x W x H)	29.6 x 36.1 x 68.9 cm
Weight	25 kg
Energy Efficiency Class	A
Special Features	Dehumidifier function, 24-hour timer
