SETUP

1. **Connect the Mouse:** Insert the USB connector of the Wings Crosshair 100 mouse into an available USB 3.0 port on your computer.
2. **Driver Installation:** The mouse is plug-and-play. Your operating system (Windows XP/Vista/7/8/8.1/10/11, Mac OS) will automatically detect and install the necessary drivers. No additional software installation is typically required for basic functionality.
3. **Initial Use:** Once the drivers are installed, the mouse is ready for immediate use.

OPERATING INSTRUCTIONS

DPI Adjustment

The Wings Crosshair 100 features an adjustable DPI (Dots Per Inch) setting, allowing you to change cursor sensitivity on the fly.

To adjust DPI, press the dedicated DPI button located on the top of the mouse, usually behind the scroll wheel. Each press cycles through predefined DPI levels: 1000, 1600, 2400, and 3200.

6 Button Functionality

This mouse is equipped with 6 buttons for enhanced control:

- **Left Click Button:** Standard primary click.
- **Right Click Button:** Standard secondary click.
- **Scroll Wheel Button:** Clickable scroll wheel for middle-click functions.
- **DPI Button:** Cycles through DPI settings.
- **Forward Button:** (Side button) Default function for navigating forward in web browsers or file explorers.
- **Backward Button:** (Side button) Default function for navigating backward in web browsers or file explorers.

While default configurations are set, some operating systems or third-party software may allow for customization of these buttons.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the mouse surface. For stubborn dirt, slightly dampen the cloth with water. Avoid harsh chemicals or abrasive materials.
- **Sensor Care:** Keep the optical sensor on the bottom of the mouse clean and free from dust or debris to ensure accurate tracking.
- **Cable Management:** Avoid sharp bends or excessive pulling on the braided cable to prevent damage.

TROUBLESHOOTING

Problem	Solution
Mouse not responding.	Ensure the USB cable is securely plugged into the computer. Try a different USB port. Restart your computer.
Cursor movement is erratic or jumpy.	Clean the optical sensor on the bottom of the mouse. Ensure you are using the mouse on a clean, non-reflective surface.

Problem	Solution
LED lights are not working.	Check the USB connection. If the mouse is otherwise functional, this might indicate a minor LED issue that does not affect performance.
DPI button not changing sensitivity.	Ensure the mouse is properly connected. Some applications or games may override mouse sensitivity settings.

SPECIFICATIONS

Feature	Detail
Brand	Wings
Model	WL-CROSSHAIR100-BLK
Connectivity	Wired (USB)
Movement Detection Technology	Optical
