HIKMICRO Pocket2 Thermal Camera Instruction Manual

Model: Pocket 2

1. INTRODUCTION

The HIKMICRO Pocket2 Thermal Camera is a compact, powerful thermal imaging device designed for professionals and DIY enthusiasts. It combines a high-resolution infrared sensor with an 8MP visual camera to provide detailed thermal and visual images, enabling efficient troubleshooting and inspection across various applications. Its user-friendly interface and robust design make it an essential tool for identifying heat-related issues.

2. WHAT'S IN THE BOX

Upon opening your HIKMICRO Pocket2 package, please ensure all the following items are included:

- Pocket2 Thermal Imager x1
- US Charger x1
- USB Cable x1
- Protection Case x1
- User Manual x1

5. OPERATING THE CAMERA

5.1 Image Modes

The Pocket2 offers multiple image modes for clear scene image reference:

- **Thermal:** Displays only the infrared image.
- **Visual:** Displays only the visible light image from the 8MP camera.
- **PIP (Picture-in-Picture):** Overlays a small thermal image on the visual image.
- **Fusion:** Blends the thermal and visual images for enhanced detail.
- **Blending:** Allows adjustable transparency between thermal and visual images.

7. MAINTENANCE

7.1 Battery Life & Charging

The built-in Li-Ion rechargeable battery supports up to 4 hours of continuous operation. Charge the device using the provided USB Type-C cable and US charger.

7.2 Durability

The Pocket2 is designed for rugged use, featuring a 2-meter drop test rating and IP54 protection against dust and splashing water, ensuring reliable performance in most work environments.

7.3 Calibration

For optimal accuracy, HIKMICRO recommends sending the camera in for calibration annually. Refer to the user manual or contact HIKMICRO support for calibration services.

8. TROUBLESHOOTING & APPLICATIONS

8.1 Water Leak Detection

Thermal imaging is an effective non-destructive method for detecting water leaks by identifying temperature differences caused by moisture. Areas affected by moisture often appear cooler (blue) on the thermal camera's screen, while hot water leaks will show as warmer (red) areas.

Your browser does not support the video tag.
