3.3. Installation Overview

The Moen 2-Series bidet seat is designed for easy installation. It features quick-release hinges for a retrofittable design that fits most toilets. Installation typically involves removing your existing toilet seat, attaching the mounting hardware, connecting the bidet seat to your toilet's water supply using the T-shaped connector and water inlet hose, and then securing the bidet seat onto the mounting plates. Always ensure water supply is turned off before beginning any plumbing work.

Retrofittable Design

Easily transform your cleansing experience with a retrofittable bidet seat that features quick-release hinges. The elongated and round designs fit most toilets.

4. OPERATION

The Moen 2-Series bidet seat is designed for simple and intuitive operation, providing a complete and comfortable

cleansing experience.

4.1. Cleansing Functions

The bidet features dual nozzles for both front and rear cleansing. Water pressure can be easily adjusted to your preference for a customized experience.

Enhanced Hygiene

We use water to wash our hands and bodies, and now you can use it to elevate another basic routine. With a bidet seat, you can cleanse with water — the purest, most efficient way to clean.

This image provides a close-up view of the bidet's self-cleaning nozzle extending and spraying water, demonstrating its cleansing function.

4.2. Control Knob

All functions are controlled via a single, easy-to-turn knob located on the side of the bidet seat. Rotate the knob to activate the desired cleansing mode and adjust water pressure.

This image shows a hand operating the control knob on the side of the bidet seat, which is used to select cleansing modes and adjust water pressure.

5. MAINTENANCE

Regular maintenance ensures optimal performance and hygiene of your bidet seat.

5.1. Nozzle Cleaning

The bidet features self-cleaning options for its replaceable nozzles. Periodically inspect and clean the nozzles as per the detailed instructions in your product's installation guide to maintain elevated cleanliness.

5.2. General Cleaning

Clean the exterior of the bidet seat with a mild, non-abrasive cleaner and a soft cloth. Avoid harsh chemicals that may damage the finish. The soft-close lid and seat can be easily removed for thorough cleaning around the toilet bowl.

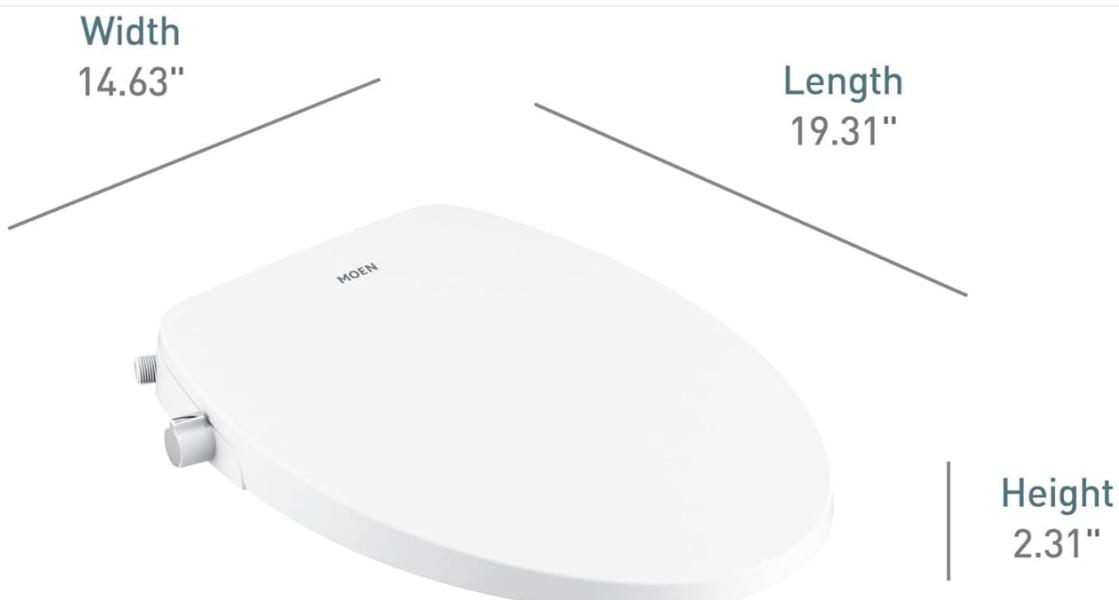

6. TROUBLESHOOTING

This section addresses common issues you might encounter with your Moen bidet seat. For more complex problems, please refer to the full installation guide or contact Moen customer support.

Problem	Possible Cause / Solution
Low Water Pressure	Ensure the water supply valve is fully open. Check for kinks in the water inlet hose. Verify that your household water pressure is adequate. Some users have noted that the water pressure may not be as strong as other bidet models.
Seat Not Secure / Loose	Ensure mounting inserts and bolts are properly tightened. Some users have reported difficulty in securing the mounting. Re-check the installation steps for proper alignment and tightening.
Lid/Seat Does Not Stay Up	Verify the bidet seat is correctly positioned on the toilet bowl. If the seat is too long for your toilet, it may interfere with the tank or not stay upright. Ensure it is compatible with your toilet's shape (elongated vs. round).
Unusual Odor	Ensure regular cleaning of the bidet seat and toilet. Some users have reported an odor, which might be related to plastic materials or lack of proper ventilation.
Improper Fit on Toilet	Confirm your toilet is an elongated shape, as this model is designed for elongated seats. While retrofittable, some toilet designs may not be fully compatible. Refer to product dimensions (19.5" L x 14.75" W) and compare with your toilet.
