6. TROUBLESHOOTING

Before contacting customer support, review the following common issues and their potential solutions.

Problem	Possible Cause	Solution
No hot water / Unit not turning on	No power; Circuit breaker tripped; Insufficient water flow.	Check circuit breakers; Ensure adequate water flow (minimum GPM); Verify electrical connections.
Water is lukewarm / Not hot enough	Inlet water temperature too low for flow rate; Temperature setting too low; Scale buildup.	Reduce water flow at the faucet; Increase temperature setting on the unit; Consider professional descaling.
Error code on display	Internal fault; Sensor issue.	Refer to the specific error code in the full product manual (if available) or contact ANZZI customer support.
Water leakage	Loose plumbing connections; Damaged internal component.	Tighten connections (ensure power is off); Contact a qualified plumber or ANZZI support.
