The VSYSTO D6RL DVR Host serves as a direct replacement component for compatible VSYSTO DVR systems. It is designed to integrate seamlessly with your existing VSYSTO setup, restoring full recording and processing capabilities.

COMPATIBILITY

This DVR host is engineered to be compatible **only** with specific VSYSTO DVR products. It is not a universal DVR host and will not function with non-VSYSTO systems or incompatible VSYSTO models. Always verify compatibility with the seller before purchase.

INSTALLATION GUIDELINES

1. **Safety First:** Before beginning any installation, ensure that the main power supply to your VSYSTO DVR system is completely disconnected.
2. **Identify Old Host:** Locate the existing DVR host within your VSYSTO system. Note how all cables are connected.

3. **Disconnect Cables:** Carefully disconnect all cables from the old DVR host. Pay attention to the type and orientation of each connector.
4. **Remove Old Host:** Unmount or remove the old DVR host from its position.
5. **Install New Host:** Place the new D6RL DVR Host in the designated position.
6. **Connect Cables:** Reconnect all cables to the new D6RL DVR Host. Ensure each connection is secure and correctly oriented. Refer to your original VSYSTO DVR system manual for specific port layouts if needed.
7. **Power On and Test:** Once all connections are secure, reconnect the main power supply to your VSYSTO DVR system. Power on the system and verify that the new DVR host is recognized and functioning correctly.

If you are unsure about any step, it is recommended to seek assistance from a qualified technician or contact VSYSTO customer support.

OPERATION

The D6RL DVR Host is a core component of a VSYSTO DVR system. Its operation is integrated with the overall system functionality. For detailed instructions on how to operate your VSYSTO DVR system, including recording, playback, and settings adjustments, please refer to the user manual provided with your complete VSYSTO DVR system.

MAINTENANCE

- **Cleaning:** Keep the DVR host clean and free from dust. Use a soft, dry cloth for cleaning. Avoid liquid cleaners or abrasive materials.
- **Ventilation:** Ensure adequate ventilation around the DVR host to prevent overheating. Do not block any ventilation openings.
- **Environmental Conditions:** Operate the DVR host within the recommended temperature and humidity ranges specified in your main VSYSTO DVR system manual.

TROUBLESHOOTING

If you encounter issues after replacing the DVR host, consider the following:

- **No Power:** Check all power connections to the DVR host and the main DVR system. Ensure the power source is active.
- **System Not Recognizing Host:** Verify that all data and video cables are securely connected to the correct ports on the new DVR host and the rest of the system. Double-check compatibility with your specific VSYSTO DVR model.
- **Recording Issues:** If the system powers on but recording is not functioning, ensure storage media (e.g., SD card) is correctly inserted and formatted, and refer to your main VSYSTO DVR system manual for recording settings.

For persistent issues, please contact VSYSTO customer support for further assistance.
