OPERATING THE HYDRAULIC STORAGE SYSTEM

The KLMM Upholstered Bed features a hydraulic lift mechanism, providing convenient access to under-bed storage. This system allows you to easily lift the mattress platform to store or retrieve items.

Instructions for Use:

1. **Clear the Bed:** Remove any heavy items or bedding from the mattress that might obstruct the lifting mechanism or add unnecessary weight.
2. **Lift the Platform:** Grasp the lifting strap or edge of the mattress platform firmly. With both hands, gently but firmly lift the platform upwards. The hydraulic pistons will assist in raising and holding the platform in the open position.
3. **Access Storage:** Once the platform is fully raised, you will have full access to the storage compartment underneath.
4. **Lower the Platform:** To close, grasp the platform firmly and gently pull it downwards. The hydraulic system will control the descent, ensuring a smooth and safe closing. Ensure no hands or objects are in the way as the platform lowers.

Important Safety Note: Always ensure the platform is fully raised and stable before accessing the storage area. Keep children and pets away from the bed when operating the hydraulic system.

MAINTENANCE

Proper maintenance will extend the life and appearance of your KLMM Upholstered Bed.

Cleaning Instructions:

- **Fabric Upholstery:** The upholstery material is linen. For general cleaning, use a soft brush or vacuum cleaner with an upholstery attachment to remove dust and loose debris.
- **Spot Cleaning:** For spills or stains, blot immediately with a clean, dry cloth. For more stubborn stains, professional dry cleaning is recommended. *Do not use harsh chemical cleaners or abrasive materials, as this may damage the fabric.*
- **Frame:** Wipe the wooden and metal components with a soft, damp cloth. Avoid excessive moisture.

General Care:

- Periodically check all bolts and screws to ensure they remain tight. Retighten if necessary.
- Avoid placing the bed in direct sunlight or near heat sources to prevent fading or material degradation.
- Do not exceed the maximum weight capacity of 500 lbs.
