

Totnz TZED1

Totnz 48x24 Inch Electric Standing Desk Instruction Manual

Model: TZED1

INTRODUCTION

Thank you for choosing the Totnz Electric Standing Desk. This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your new height-adjustable desk. Please read this manual thoroughly before assembly and use to ensure safe and efficient operation.

The Totnz Electric Standing Desk is designed to offer a flexible and ergonomic workspace, allowing you to easily switch between sitting and standing positions. Its robust construction and quiet motor ensure a comfortable and productive environment.

SAFETY INFORMATION

- **Weight Limit:** Do not exceed the maximum recommended weight of 176 lbs (80 kg) on the desktop. Overloading can cause damage to the desk and potential injury.
- **Proper Assembly:** Ensure the desk is assembled correctly according to the instructions for optimal stability and safety. Incorrect assembly can lead to instability and malfunction.
- **Assembly Hazards:** Exercise caution during assembly to prevent injury. Use appropriate tools and follow all instructions carefully. Keep small parts away from children.
- **Clearance:** Ensure there are no obstructions above or below the desk when adjusting its height to prevent damage or injury.
- **Power Connection:** Connect the desk to a grounded power outlet. Do not use damaged power cords or adapters.
- **Children and Pets:** Keep children and pets away from the desk during operation to avoid accidents.

SETUP AND ASSEMBLY

The Totnz Electric Standing Desk is designed for easy assembly. Please follow these steps carefully. A Phillips screwdriver is required and not included; all other necessary tools are provided.

Official assembly video for the Totnz Electric Standing Desk. This video demonstrates each step of the assembly process, from unboxing to final setup, ensuring a smooth installation.

Step-by-Step Assembly Instructions

1. **Unpack Components:** Carefully unpack all parts and lay them out. Verify all components are present against the parts list in your packaging. Organize screws and small parts using the labeled bags provided.
2. **Assemble the Leg Bases and Crossbar:** Attach the leg bases to the main leg columns. Secure them using the provided screws and Allen wrench. Ensure the adjustable feet are installed at the bottom of each leg base for leveling.
3. **Secure Side Plates and Transmission Rod:** Attach the side plates to the table legs using the provided screws. Insert the transmission rod into the motor mechanism and secure it with the small screw. This rod connects the two legs for synchronized height adjustment.
4. **Attach Desktop to the Stand:** Place the desktop (which comes in two pieces) upside down on a soft, clean surface. Position the assembled leg frame onto the desktop, aligning the pre-drilled holes. Use the provided screws to secure the desktop to the frame. Ensure the desktop pieces are flush and securely joined.
5. **Connect the Cables:** Connect the motor cable and control panel cable to the control box. Ensure all connections are secure. Use cable ties or clips to manage cables neatly underneath the desk.
6. **Install Monitor Stand (Optional):** If your package includes a monitor stand, attach it to the desktop using the provided screws. This stand offers additional elevation for your monitor.

OPERATING INSTRUCTIONS

Your Totnz Electric Standing Desk features an intuitive control panel for easy height adjustment.

Height Adjustment

- **Up/Down Buttons:** Use the **Up** and **Down** arrows on the control panel to smoothly adjust the desk height. The desk can be adjusted from 28.3 inches (71.9 cm) to 47.2 inches (119.9 cm) at a speed of approximately 1 inch per

second.

- **Quiet Operation:** The desk operates with a powerful yet silent motor, producing less than 50 dB of noise during adjustment.
- **Preset Heights:** Your control panel may include options to save up to three preferred height settings. To save a height, adjust the desk to your desired position, then press and hold a memory button (e.g., '1', '2', or '3') until you hear a beep or see a confirmation on the display (if available). To recall a saved height, simply press the corresponding memory button.

MAINTENANCE

Regular maintenance helps ensure the longevity and optimal performance of your Totnz Electric Standing Desk.

- **Cleaning:** The engineered wood desktop features a durable laminate surface that is moisture-resistant, heat-resistant, and easy to clean. Use a soft, damp cloth to wipe down the surface. Avoid abrasive cleaners or harsh chemicals that could damage the finish.

HIGH QUALITY ENGINEERED WOOD

Image: Close-up view of the desk's high-quality engineered wood desktop surface.

- **Frame Care:** Wipe the metal frame with a dry or slightly damp cloth. Ensure no liquids enter the motor or control box.
- **Cable Management:** Periodically check that all cables are securely connected and neatly managed to prevent snagging or damage.
- **Tighten Screws:** Over time, screws may loosen. Periodically check and tighten all assembly screws to maintain stability.

TROUBLESHOOTING

If you encounter any issues with your Totnz Electric Standing Desk, please refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Desk does not move or motor stops working.	Power disconnection, motor overload, or control box error.	◦ Check if the power cord is securely plugged into the wall outlet and the control box. ◦ Unplug the desk for 30 seconds, then plug it back in to reset the system. ◦ Perform a reset: Press and hold the Up and Down buttons simultaneously for 3 seconds. Then, try to move the desk in one direction. If it still doesn't move, contact customer support.
Desk is wobbly or unstable.	Loose screws, uneven floor, or excessive weight.	◦ Ensure all assembly screws are tightened. ◦ Adjust the leveling feet at the bottom of the leg bases to compensate for uneven floors. ◦ Reduce the weight on the desktop to ensure it does not exceed the 176 lbs limit.
Tabletop pieces are not flush or have a gap.	Improper alignment during assembly.	◦ Loosen the screws holding the desktop to the frame slightly. ◦ Adjust the desktop pieces to align them properly, then re-tighten the screws firmly.
