Key Features:

- **Precision Blasts:** Delivers 18 powerful, individual water blasts with unmatched accuracy.
- **Extended Range:** Water blasts can reach up to 30 feet.
- **Durable Construction:** Crafted from high-quality materials for long-lasting outdoor use.
- **Tactical Tank Indicator:** A convenient indicator allows for quick monitoring of the water supply.
- **Battery-Free Operation:** Always ready for action without the need for batteries.

- **PressureTech Reload:** Rapidly repressurize the tank by dipping the front into any water source and pumping.

Image 1.2: Overview of SpyraLX™ features including 18 high-power water blasts, fast refill, quick-view tank level indicator, and textured handle.

2. SAFETY INFORMATION

Please read and understand all safety instructions before using the SPYRA Manual Water Blaster. Failure to follow these instructions may result in injury or damage to the product.

- **Age Recommendation:** This product is recommended for users aged 14 years and older.
- **Eye Protection:** Always wear appropriate eye protection during use to prevent eye injury from water blasts.
- **Aiming:** Do not aim the water blaster at people's eyes or faces.
- **Water Source:** Use only clean, fresh water in the blaster. Do not use dirty water, corrosive liquids, or other substances that could damage the product or cause harm.
- **Supervision:** Adult supervision is recommended for younger users, even if they meet the age requirement.

- **Product Modification:** Do not attempt to modify or disassemble the water blaster. This can void the warranty and may lead to unsafe operation.
- **Storage:** Store the blaster in a cool, dry place away from direct sunlight and extreme temperatures.
- **Proposition 65 Warning:** This product may contain chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, visit www.P65Warnings.ca.gov.

3. SETUP

The SPYRA Manual Water Blaster requires minimal setup before its first use. It does not require batteries.

Initial Preparation:

1. **Unpack:** Carefully remove the water blaster from its packaging.
2. **Inspect:** Check the blaster for any visible damage or missing parts. If anything is amiss, contact customer support.
3. **First Fill:** Before operating, ensure the blaster is filled with clean water as described in the "Operating Instructions" section.

4. OPERATING INSTRUCTIONS

Follow these steps to operate your SPYRA Manual Water Blaster:

4.1 Filling the Water Tank (PressureTech Reload)

1. **Locate Water Source:** Find a clean water source such as a bucket, pool, or natural body of water.
2. **Submerge Front:** Dip the front nozzle of the SPYRA blaster completely into the water.
3. **Pump to Fill:** While submerged, pull the trigger or pump mechanism repeatedly. The blaster will draw water in and repressurize the tank.
4. **Monitor Tank Indicator:** Observe the tactical tank indicator on the side of the blaster. This gauge shows your current water level, allowing you to know when the tank is full or running low.

SPÝRA™

PRESSURE TECH RELOAD

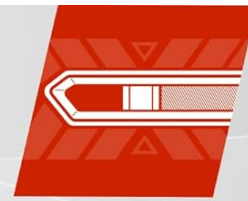

Refill and repressurize quickly from any water source, or accelerate the process with added force.

***SpyraBase™ is
sold separately.***

Image 4.1: Demonstrating the PressureTech Reload by dipping the front of the blaster into a water source. A SpyraBase™ (sold separately) can be used for convenient reloading.

SPYRA™

TANK INDICATOR

Stay battle-ready with the tank indicator for quick water level checks.

Image 4.2: Close-up of the tank indicator, which provides a quick visual check of the water level.

4.2 Firing the Blaster

1. **Aim:** Point the blaster towards your target, ensuring it is not aimed at anyone's eyes or face.
2. **Pull Trigger:** Firmly pull the trigger to unleash a single, powerful water blast.
3. **Repeat:** Continue pulling the trigger for subsequent blasts until the tank is empty. The blaster can deliver up to 18 individual blasts per fill.

SPYRA™

PRECISION WATER POWER

SPYRABLAST TECHNOLOGY

*Ditch the stream, dominate
with 18 powerful, precise blasts.
SPYRA changes the game*

5. MAINTENANCE

Proper maintenance will ensure the longevity and optimal performance of your SPYRA Manual Water Blaster.

5.1 After Each Use:

- **Drain Water:** Empty any remaining water from the tank. The blaster has an outlet for excess water inside the housing.
- **Rinse:** Briefly rinse the blaster with clean water to remove any debris or residue.
- **Dry:** Allow the blaster to air dry completely before storing. Ensure all internal components are dry to prevent mold or mildew.

Image 5.1: The outlet designed to release excess water from inside the blaster's housing, aiding in drainage and drying.

5.2 Storage:

- Store the blaster in a cool, dry place, away from direct sunlight and extreme temperatures.
- Avoid storing in areas with high humidity.

6. TROUBLESHOOTING

If you encounter issues with your SPYRA Manual Water Blaster, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Weak or No Water Blasts	<ul style="list-style-type: none"> • Insufficient water in tank. • Improper reload/repressurization. • Air trapped in system. 	<ul style="list-style-type: none"> • Check the tank indicator and refill the blaster completely using PressureTech. • Ensure the nozzle is fully submerged during reload. • Pump several times while submerged to expel air.

Problem	Possible Cause	Solution
Water Leaking from Blaster	<ul style="list-style-type: none"> Loose connections or seals. Damage to the blaster housing. Excess water not drained after use. 	<ul style="list-style-type: none"> Inspect the blaster for any visible cracks or damage. Ensure the blaster is properly drained after each use. If damage is present, contact customer support.
Blaster Not Drawing Water	<ul style="list-style-type: none"> Nozzle not fully submerged. Debris blocking intake. 	<ul style="list-style-type: none"> Ensure the entire front nozzle is underwater during the reload process. Check the intake for any visible obstructions and carefully remove them if present.
