

Shark Ninja RV990

Shark Ninja EZ Robot Smart Vacuum User Manual

Model: RV990

INTRODUCTION

The Shark Ninja EZ Robot Smart Vacuum (Model RV990) is designed to provide an easy path to a smart, multi-room clean. This robotic vacuum offers convenient automated cleaning for various floor types, helping to maintain a tidy home with minimal effort.

SETUP

Before first use, ensure the charging dock is placed against a wall in an open area with adequate space around it. Connect the power cord to the dock and plug it into a wall outlet. Place the robot vacuum onto the charging dock to allow it to fully charge. A full charge is recommended before the initial cleaning cycle.

The Shark Ninja EZ Robot Smart Vacuum, shown with its compact charging dock, ready for use.

Download the SharkClean app on your smartphone. Follow the in-app instructions to connect your robot vacuum to your home Wi-Fi network. The app allows for easy scheduling and control of your device.

OPERATING THE VACUUM

The Shark Ninja EZ Robot Smart Vacuum can be operated via the SharkClean app or directly using the buttons on the unit. The app provides comprehensive control, including starting, stopping, and scheduling cleaning cycles. You can set daily cleaning schedules or select specific days of the week for the vacuum to operate automatically.

CLEAN ON THE GO

Start, stop, or schedule cleanings from anywhere with the SharkClean® app.

The SharkClean app allows users to start, stop, or schedule cleanings remotely, providing convenient control over the vacuum.

The robot is designed to navigate around your home, creating a map of your living space which can be viewed within the app. This mapping feature allows you to see where the vacuum has cleaned and its current location. It can effectively clean various floor types, including hard floors and carpets, thanks to its powerful suction and multi-surface brushroll.

CLEANS ALL FLOOR TYPES

Powerful suction and a multi-surface brushroll combine to tackle debris on carpets and floors

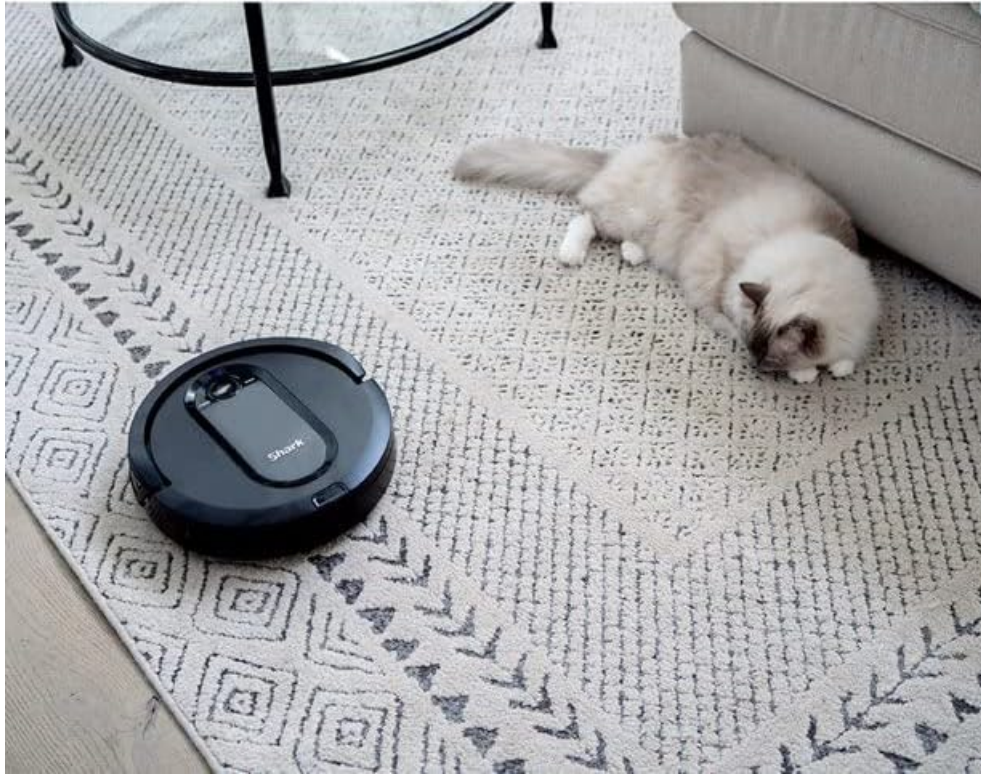

Equipped with powerful suction and a multi-surface brushroll, the vacuum effectively cleans different floor types, from hard surfaces to carpets.

For homes with pets, the vacuum is particularly effective at picking up pet hair and other debris, helping to keep floors clean between deeper cleaning sessions.

PERFECT FOR HOMES WITH PETS

Daily cleanings effortlessly keep up with pet hair and other messes.

The robot vacuum efficiently picks up pet hair from various surfaces, including rugs, making it ideal for homes with pets.

The robot is also equipped with sensors that prevent it from falling down stairs, ensuring safe operation in multi-level homes. It can navigate over most common rug thicknesses without issue.

MAINTENANCE

Regular maintenance is crucial for optimal performance. The robot vacuum will automatically return to its dock to charge and empty its dustbin into the base. To manually empty the base, simply pull out the dustbin, open the front button, and dispose of the collected debris. The filter should also be cleaned regularly to maintain suction power.

TROUBLESHOOTING

If the robot vacuum encounters an issue, check the SharkClean app for diagnostic messages. Common issues include:

- **Robot not charging:** Ensure the robot is properly docked and the charging contacts are clean.
- **Poor suction:** Check and clean the dustbin and filter. Clear any blockages in the brushroll or suction path.
- **Navigation issues:** Ensure there are no new obstacles in the cleaning path. The robot's mapping system adapts to its environment.
- **App connectivity:** Verify your home Wi-Fi is active and the robot is within range. Restarting the app or robot may resolve minor connectivity issues.

For persistent problems, consult the full product manual or contact Shark Ninja customer support.

SPECIFICATIONS

Brand	Shark Ninja
Model Name	EZ Robot
Item Model Number	RV990
Special Feature	Bagless
Color	Black
Product Dimensions	12"L x 12"W x 6"H
Included Components	Docking Station, Filter
Filter Type	Generic Filter
Power Source	Battery Powered
Form Factor	Robotic
UPC	622356576819
Item Weight	9.13 pounds
