Setup Instructions

Follow these steps to set up your Belkin 5-in-1 Multiport Hub Adapter:

1. **Connect to your Chromebook:** Plug the integrated USB-C cable from the hub into an available USB-C port on your Chromebook or compatible device.
2. **Connect Power (Optional):** For charging your Chromebook and connected devices, connect a USB-C power adapter (minimum 65W recommended) to the USB-C Power Delivery (PD) port on the hub. This port supports up to 100W pass-through charging.
3. **Connect HDMI Display (Optional):** Use an HDMI cable to connect your external monitor or display to the HDMI port on the hub. Ensure your display is set to the correct input source.
4. **Connect USB Peripherals (Optional):** Plug your USB-A devices, such as a mouse, keyboard, or external storage, into the two USB-A 3.1 Gen 1 ports on the hub.
5. **Connect Ethernet (Optional):** For a wired internet connection, connect an Ethernet cable from your router or modem to the Gigabit Ethernet port on the hub.

Operating Instructions

Once connected, the Belkin 5-in-1 Multiport Hub Adapter operates automatically with your Chromebook. Chrome OS will detect connected devices and displays.

- **Display Output:** Your Chromebook should automatically extend or mirror its display to the connected HDMI monitor. Adjust display settings in Chrome OS if needed.
- **USB Devices:** USB-A peripherals will function as soon as they are plugged into the hub.
- **Network Connectivity:** The Gigabit Ethernet port provides a stable wired network connection, which will be prioritized over Wi-Fi when connected.
- **Power Delivery:** Ensure your external USB-C power adapter meets the recommended wattage for optimal charging performance, especially when using multiple hub functions.

Maintenance

To ensure the longevity and optimal performance of your Belkin Multiport Hub:

- Keep the adapter clean by wiping it with a soft, dry cloth. Avoid liquid cleaners.
- Store the adapter in a cool, dry place away from direct sunlight and extreme temperatures.
- Avoid bending or stressing the integrated USB-C cable excessively.

Troubleshooting

- **No Display on External Monitor:**
 - Ensure the HDMI cable is securely connected to both the hub and the monitor.
 - Verify the monitor's input source is set to HDMI.
 - Check your Chromebook's display settings to ensure the external display is detected and configured correctly.
 - Try a different HDMI cable or monitor if possible.
- **USB Devices Not Working:**
 - Ensure the USB-A devices are fully inserted into the hub's ports.
 - Test the USB device by connecting it directly to your Chromebook (if possible) to rule out device issues.
 - If using high-power USB devices, ensure the hub is connected to a power adapter.
- **No Internet Connection via Ethernet:**
 - Verify the Ethernet cable is securely connected to both the hub and your router/modem.
 - Check the network status on your Chromebook.
 - Ensure your router/modem is functioning correctly.
- **Chromebook Not Charging:**
 - Ensure a USB-C power adapter is connected to the hub's USB-C PD port.
 - Verify the power adapter is functioning and provides sufficient wattage (minimum 65W recommended for optimal pass-through charging).
 - Check the charging indicator on your Chromebook.
