1. Introduction

Thank you for choosing the Irontar Storage Cabinet. This freestanding cabinet is designed to provide versatile storage solutions for various rooms in your home, including bathrooms, bedrooms, kitchens, and living rooms. Featuring a sturdy engineered wood frame, tempered glass doors, and adjustable shelving, it offers both functionality and a sleek aesthetic. Please read this manual carefully before assembly and use to ensure proper installation and long-term enjoyment of your product.

2. Safety Information

- Always assemble the cabinet on a soft, clean surface to prevent scratches.

- Ensure all parts are present and undamaged before beginning assembly. Do not proceed with assembly if any parts are missing or broken.

- Follow all assembly instructions carefully. Incorrect assembly can lead to instability and potential injury.

- Do not overtighten screws, as this can damage the material.

- Keep small parts and packaging materials away from children and pets to prevent choking hazards.

- For safety, it is recommended to secure the cabinet to a wall using anti-tip hardware (if included) to prevent accidental tipping, especially in homes with children or pets.

- Do not overload shelves. Distribute weight evenly to maintain stability.

- Avoid placing hot items directly on the cabinet surface.

3. Package Contents

Before starting assembly, please verify that all components are included in your package. While a detailed list is typically provided in the separate installation manual, you should expect to find:

4. Setup and Assembly

The Irontar Storage Cabinet requires assembly. Ensure you have a Phillips head screwdriver and any other tools specified in the installation manual. It is recommended to have two people for assembly to ensure stability and ease of handling larger panels.

5. Operating and Usage

Your Irontar Storage Cabinet is designed for versatile storage in various home environments. Its freestanding design allows for flexible placement.

- **Adjustable Shelves:** The cabinet includes one or more adjustable shelves. To reposition a shelf, remove all items, lift the shelf, remove the shelf pins from their current holes, insert them into the desired new holes, and then place the shelf back on the pins. This allows you to customize storage space for items of different heights.
- **Storage Capacity:** Utilize the upper compartment with tempered glass doors for displaying decorative items or storing frequently accessed essentials. The open middle shelf is ideal for quick access items like towels or toiletries. The lower compartment with solid doors provides concealed storage for larger or less aesthetically pleasing items.
- **Room Placement:** This cabinet is suitable for use in bathrooms, bedrooms, kitchens, and living rooms. Consider the dimensions (11.8"D x 23.6"W x 50.4"H) to ensure it fits your intended space.

6. Maintenance

Proper care will extend the life and appearance of your Irontar Storage Cabinet.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals, abrasive cleaners, or polishes that may damage the powder-coated finish or glass.
- **Spills:** Immediately wipe up any spills to prevent moisture damage to the engineered wood.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Retighten as necessary to maintain stability.
- **Environment:** Avoid exposing the cabinet to extreme temperatures or humidity, as this can cause warping or damage to the materials.

7. Troubleshooting

If you encounter issues with your Irontar Storage Cabinet, refer to the following common problems and solutions:

- **Cabinet feels wobbly or unstable:**
  - Ensure all screws and fasteners are securely tightened.
  - Verify that the cabinet is placed on a level surface. Use shims if necessary to stabilize.
  - Confirm that all panels are correctly aligned and fully seated in their respective connections.
- **Doors do not close properly or stay open:**
  - Check the alignment of the door hinges. Adjust if they are loose or misaligned.
  - Inspect the magnetic catches (if applicable) to ensure they are properly installed and making contact with the door. If the magnets are weak, consider replacing them or adding additional magnetic strips for better closure.
  - Ensure the cabinet itself is level, as an unlevel cabinet can cause doors to swing open.
- **Scratches or minor damage to the finish:**
  - For minor scratches, a furniture repair marker or touch-up paint matching the powder-coated finish may be used.
