Image: The nose shaver attachment and the body shaver attachment, with an example of the body shaver being used on the chest area.

- Attach the Body Shaver head.
- You can use it directly for a close trim or attach a guide comb (2mm, 3mm, or 5mm) for desired length.
- Turn on the device and move it over the desired body area.

5.4 Nose/Ear Hair Shaver

For safe and effective removal of unwanted nose and ear hair.

- Attach the Nose/Ear Hair Shaver head.
- Turn on the device.
- Gently insert the trimmer tip into your nostril or ear canal, rotating it slowly to trim hairs. Do not insert too deeply.

5.5 Art Hair Clipper

For precise detailing, shaping, and creating intricate designs in hair (e.g., beard lines, sideburns, eyebrows).

- Attach the Art Hair Clipper head.
- Turn on the device.

- Use the fine blade (approx. 4mm width) to create sharp lines and detailed patterns.

6. Maintenance and Cleaning

Regular cleaning and maintenance will prolong the life of your grooming kit and ensure optimal performance.

1. **After Each Use:** Turn off the device and detach the used head. Use the provided cleaning brush to remove any loose hairs from the blades and inside the attachment.
2. **Rinsing (if applicable):** Some attachments may be rinseable under running water. Refer to the specific attachment's instructions. Ensure the main unit is never rinsed or submerged.
3. **Lubrication:** Apply a small drop of the provided lubricating oil to the blades of the clipper and shaver attachments after every few uses, or when performance decreases. Turn on the device for a few seconds to distribute the oil.
4. **Storage:** Store the device and all attachments in a dry, cool place, away from direct sunlight and out of reach of children.
5. **Battery Care:** To maintain battery life, avoid completely draining the battery frequently. Recharge when the power is low. If storing for an extended period, charge the device every 3-6 months.

7. Troubleshooting

Problem	Possible Cause	Solution
Device does not turn on.	Battery is depleted.	Charge the device for 8 hours.
Poor cutting performance.	Blades are dull or clogged with hair.	Clean the blades thoroughly. Apply lubricating oil.
Device makes unusual noise.	Lack of lubrication or foreign object.	Clean and lubricate blades. Ensure no foreign objects are present. If problem persists, discontinue use and contact support.
Attachment does not fit securely.	Incorrect alignment or debris.	Ensure correct alignment and push firmly until it clicks. Check for any debris preventing proper fit.
