**WOLFBOX i07**

# WOLFBOX i07 3 Channel Dash Cam User Manual

Model: i07

## INTRODUCTION

The WOLFBOX i07 is a high-performance 3-channel dash camera system designed to provide comprehensive video surveillance for your vehicle. It simultaneously records footage from the front, interior, and rear of your car, ensuring 360-degree protection. Equipped with advanced features such as 4K resolution, infrared night vision, built-in GPS, Wi-Fi connectivity, and multiple parking modes, the i07 offers reliable evidence collection and enhanced driving safety.

Image: Overview of the WOLFBOX i07 Dash Cam system, including the main unit, rear camera, and mobile app interface.

## WHAT'S IN THE BOX

Please verify that all components are present and in good condition upon unboxing:

- i07 Dash Cam (Main Unit)
- 1080P IP68 Rear Camera
- GPS Module
- 32GB MicroSD Card
- 20-foot Rear Camera Cable
- Type-C Power Supply Cable with Car Charger
- User Manual
- Electrostatic Sticker
- Car Wire Trim Tool

Image: Contents of the WOLFBOX i07 package.

| | | | | |
|---|---|---|---|---|
| i07 4K Dash Cam | GPS Bracket | Adhesive | Type-C Power Cable | 20ft Rear Cam Cable |
| 1080P Rear Camera | Memory Card | Electrostatic Sticker | Car Wire Trim Tool | User Manual |

## SETUP

### 1. Memory Card Insertion

Before initial use, insert the provided 32GB MicroSD card into the dash cam's card slot. Ensure the card is inserted correctly until it clicks into place. It is recommended to format the card within the dash cam's settings before first use.

Image: Inserting the 32GB MicroSD card.

### 2. Main Unit Installation

1. Clean the windshield area where the dash cam will be mounted.
2. Apply the electrostatic sticker to the clean windshield.
3. Attach the main unit onto the electrostatic sticker using the adhesive mount. Ensure it does not obstruct your driving view.
4. Connect the Type-C power cable to the dash cam and route it along the windshield edge and A-pillar to the car's cigarette lighter socket.

### 3. Rear Camera Installation

1. Mount the rear camera on the rear windshield, ensuring a clear view.
2. Connect the 20-foot rear camera cable to the main unit and route it discreetly along the vehicle's interior trim to the rear camera.
3. Ensure the rear camera's headphone jack is firmly inserted for proper detection.

# Easy Installation & Removal

Easy To Move The Dashcam From One Car To Another
An additional GPS mount is included as a backup.

**Sliding Bracket**

Image: Easy installation and cable routing for the dash cam and rear camera.

## OPERATING INSTRUCTIONS

### 1. Power On/Off

The dash cam will automatically power on and begin recording when connected to the car's power supply and the vehicle is started. It will power off automatically when the car is turned off.

### 2. Recording Modes

The WOLFBOX i07 supports various recording configurations:

- **3-Channel Recording:** Simultaneously records Front (2.5K), Interior (1080P), and Rear (1080P) footage.
- **Dual-Channel Recording:** Records Front (4K UHD) and Interior (1080P FUD) footage.

Image: Triple Channel Recording overview.

Image: Dual Channel Recording overview.

### 3. Infrared Night Vision

The interior camera features 6 infrared LED lights and advanced STARVIS technology to capture clear and balanced video in low-light conditions, ensuring visibility inside the cabin even at night.

Image: Infrared Night Vision capability.

## 4. Parking Modes (24/7 Protection)

The i07 offers two parking monitoring modes for continuous vehicle protection:

- **Collision Boot Recording:** The dash cam will automatically power on and record when an impact is detected while the vehicle is parked.
- **Time-Lapse Record:** Captures 24-hour time-lapse footage at 1 frame per second (FPS) when the vehicle is parked. Note: Collision Boot Recording does not function in Time-Lapse Mode.

*A hardwire kit (sold separately) is required for 24/7 parking monitoring functionality.*

Image: Parking Modes (Collision Boot Recording and Time-Lapse).

## 5. Built-in GPS & Wi-Fi

The integrated GPS module accurately records driving routes, speeds, and times, embedding this data into video files for evidence. Built-in Wi-Fi allows you to connect the dash cam to your smartphone via the WOLFBOX app for easy management, video playback, editing, and sharing.

Image: Built-in Wi-Fi and GPS features with app connectivity.

## 6. G-Sensor & Loop Recording

- **G-Sensor:** Detects sudden impacts or collisions and automatically locks the current video footage to prevent it from being overwritten.
- **Loop Recording:** Continuously records video in short segments. When the memory card is full, the oldest unlocked footage is automatically overwritten by new recordings.
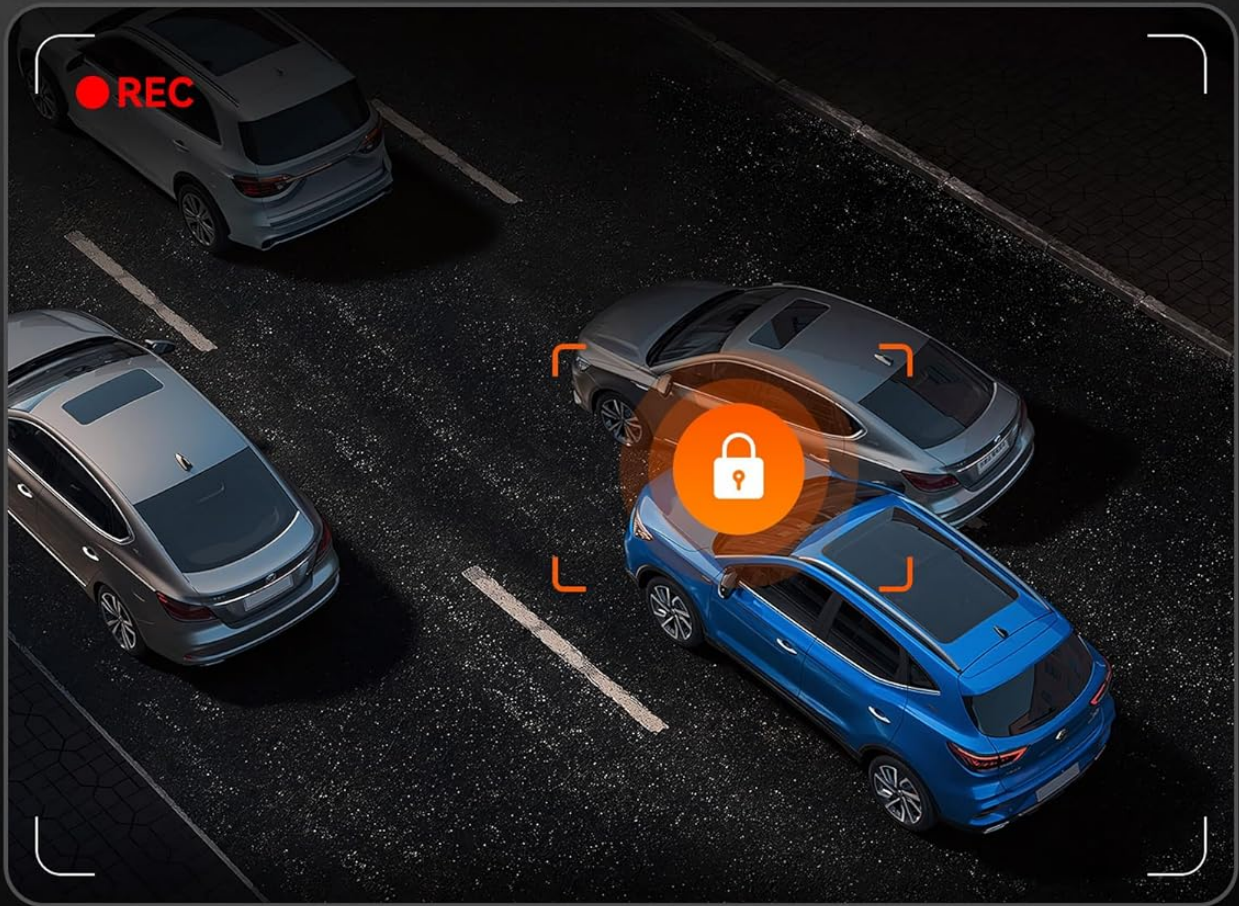

Image: G-Sensor and Loop Recording functionality.

## MAINTENANCE

- **Regular Formatting:** To maintain optimal performance and prevent data corruption, it is recommended to format the MicroSD card every 2-4 weeks using the dash cam's settings.
- **Lens Cleaning:** Gently clean the camera lenses with a soft, lint-free cloth to ensure clear video quality. Avoid abrasive materials.
- **Firmware Updates:** Check the official WOLFBOX website periodically for firmware updates to ensure your

dash cam has the latest features and bug fixes.

- **Temperature Considerations:** The dash cam is designed to operate within a wide temperature range due to its supercapacitor. However, extreme prolonged heat or cold can affect battery life (if applicable) and overall longevity.

## TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|---|---|---|
| Dash cam does not power on. | No power supply; faulty cable; car charger issue. | Check power connection; try a different USB port or car charger; ensure vehicle's ignition is on. |
| Recording stops or freezes. | Memory card full/corrupted; low-quality SD card; firmware issue. | Format the SD card; use a high-speed (Class 10 or U3) MicroSD card; update firmware. |
| Rear camera not detected. | Loose connection; damaged cable. | Ensure the rear camera cable's headphone jack is firmly inserted into the main unit. Check cable for damage. |
| Wi-Fi connection issues. | Incorrect app usage; interference. | Ensure Wi-Fi is enabled on the dash cam and your phone; restart both devices; try connecting in a different location. |
| GPS not acquiring signal. | Poor satellite reception; GPS module obstructed. | Ensure the GPS module has a clear view of the sky; move the vehicle to an open area. |

## SPECIFICATIONS

| Feature | Detail |
|---|---|
| Model Name | i07 |
| Product Dimensions | 4.72 x 1.38 x 3.07 inches |
| Item Weight | 5 ounces |
| Front Camera Resolution | Up to 4K (2160p) |
| Interior Camera Resolution | 1080P |
| Rear Camera Resolution | 1080P |
| Display | 3-inch LCD Screen |
