SETUP AND ASSEMBLY

Assembly of the Navaris Desk Organizer Shelf Unit requires careful attention to detail. Follow these steps to ensure correct and stable construction.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface.
2. **Identify Parts:** Familiarize yourself with the 7 distinct bamboo parts. Note that the unit consists of two main sections that connect.
3. **Assemble First Section:** Begin by attaching the shelves to the side panels of one section using the provided screws. Ensure all connections are secure but do not overtighten.
4. **Assemble Second Section:** Repeat the process for the second section of the shelf unit.
5. **Connect Sections:** The two sections are designed to interlock and slide, allowing for adjustable configurations. Carefully align the connecting parts and secure them with the remaining screws. *Pay close attention to the orientation of part B (the sliding base) to avoid reassembly.*

OPERATING AND USAGE

The Navaris Desk Organizer Shelf Unit offers flexibility in its arrangement to best suit your space and organizational needs.

MAINTENANCE

To ensure the longevity and appearance of your bamboo shelf unit, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the surface with a dry cloth to remove dust and light dirt. Avoid using abrasive cleaners or excessive moisture, which can damage the bamboo finish.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the bamboo to fade or dry out.
- **Check Screws:** Periodically check all assembly screws and tighten them if necessary to maintain stability.

TROUBLESHOOTING

If you encounter issues with your shelf unit, consider the following common solutions:

- **Unit is Wobbly/Unstable:** Ensure all screws are fully tightened. Check that the unit is placed on a completely flat and level surface. Uneven surfaces can cause instability.
- **Parts Not Fitting Correctly During Assembly:** Double-check the assembly instructions, especially the orientation of similar-looking parts. Some parts may have specific front/back or left/right orientations. If a part seems forced, re-evaluate its position.
- **Difficulty Adjusting Sections:** Loosen the connecting screws slightly more before attempting to slide the sections. Ensure no debris is obstructing the sliding mechanism.
