# Timex Essex Avenue Day-Date 44mm Quartz Watch User Manual

Model: TW2W79900VQ

## 1. INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, and maintenance of your Timex Essex Avenue Day-Date 44mm Quartz Watch. Please read this manual thoroughly to ensure proper use and care of your timepiece.

## 2. WATCH COMPONENTS

**Figure 1:** Front view of the Timex Essex Avenue Day-Date 44mm Quartz Watch. This image displays the watch face with its black dial, silver-tone case, and metal bracelet. The day and date subdials are visible, along with the main hour, minute, and second hands.

- **Crown:** Used for setting time and date. Located on the right side of the watch case.
- **Hour, Minute, Second Hands:** Indicate the current time.
- **Day Subdial:** Displays the current day of the week.
- **Date Subdial:** Displays the current date.
- **24-Hour Subdial:** Indicates time in a 24-hour format.
- **Bracelet:** Metal link bracelet for securing the watch to the wrist.

### 3. SETUP AND INITIAL ADJUSTMENT

---

#### 3.1 Setting the Time

1. Pull the crown out to the **second click** position. The second hand will stop.
2. Rotate the crown in either direction to move the hour and minute hands until the desired time is set. Ensure the 24-hour subdial aligns correctly for AM/PM.
3. Push the crown back in to the normal position. The second hand will resume movement.

#### 3.2 Setting the Day and Date

1. Pull the crown out to the **first click** position.
2. Rotate the crown clockwise to adjust the date on the date subdial.
3. Rotate the crown counter-clockwise to adjust the day on the day subdial.
4. Once the correct day and date are set, push the crown back in to the normal position.

*Note: Avoid setting the date between 9:00 PM and 3:00 AM, as this may interfere with the automatic date change mechanism. If adjustment is needed during this period, first set the time outside this range, adjust the date, then reset the time.*

#### 3.3 Bracelet Adjustment

**Figure 2:** Rear view of the Timex Essex Avenue watch, showing the metal bracelet and clasp mechanism. The clasp features the Timex logo.

The metal link bracelet may require adjustment for a comfortable fit. This typically involves removing or adding links. It is recommended to have this procedure performed by a qualified jeweler or watch technician to prevent damage to the bracelet or clasp.

## 4. OPERATING YOUR WATCH

---

### 4.1 Water Resistance

**Figure 3:** Close-up of the watch's case back, indicating "WR 50M" for water resistance up to 50 meters. Other engravings include "WATCHMAKERS EST. 1854" and "THE ESSEX AVENUE COLLECTION".

Your Timex Essex Avenue watch is water resistant up to 50 meters (5 ATM). This rating means the watch is suitable for short periods of recreational swimming, showering, or general water splashes. It is **not** suitable for diving, snorkeling, or high-impact water sports. Always ensure the crown is fully pushed in before any contact with water.

## 5. MAINTENANCE AND CARE

- **Cleaning:** Wipe the watch case and bracelet regularly with a soft, dry cloth. For stubborn dirt, a slightly damp cloth with mild soap can be used, followed by drying thoroughly.
- **Avoid Chemicals:** Do not expose your watch to solvents, detergents, perfumes, or cosmetics, as these can damage the case, gasket, or bracelet.
- **Temperature Extremes:** Avoid exposing the watch to extreme temperatures (hot or cold) or sudden

temperature changes, which can affect its accuracy and water resistance.

- **Battery Replacement:** When the watch battery needs replacement, it is recommended to have it done by an authorized Timex service center or a professional watchmaker to ensure proper sealing and maintain water resistance.
- **Storage:** When not in use for extended periods, store your watch in a dry, cool place, away from direct sunlight and strong magnetic fields.

## 6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch stops or runs intermittently.	Depleted battery. Crown not fully pushed in.	Replace battery (professional service recommended). Ensure crown is fully pushed in.
Time or date is incorrect.	Incorrect setting.	Refer to Section 3.1 and 3.2 to reset time and date.
Condensation appears under the crystal.	Moisture ingress.	Seek immediate professional service to prevent internal damage.

## 7. SPECIFICATIONS

**Model Number:** TW2W79900VQ

**Movement:** Quartz

**Case Diameter:** 44mm

**Water Resistance:** 50 meters (5 ATM)

**Case Material:** Silver-tone metal
