Nakedcellphone HOLCOM-LINK2-BLACK (zte)

Instruction Manual

NAKEDCELLPHONE CASE WITH CLIP FOR ZTE CYMBAL 2 FLIP PHONE

Model: HOLCOM-LINK2-BLACK (zte)

Introduction

This manual provides comprehensive instructions for the Nakedcellphone Case with Clip, designed specifically for the ZTE Cymbal 2 Flip Phone and compatible models such as ZTE Cymbal U, Z2335CC, Telstra Flip 3, Z2335T, and Z2335CA. This product offers both a protective case for your device and a custom-fit belt clip holster for convenient carrying.

Product Overview

The Nakedcellphone Case + Holster Combination is engineered to provide protection and accessibility for your flip phone. It consists of two primary components:

- **Protective Case:** A two-piece hard shell cover that snaps onto the front and back panels. It features precise cutouts for all buttons, charger port, camera, and speaker, ensuring full functionality. The case is made of durable polycarbonate with a powder coating and a ribbed grid pattern for enhanced grip and fingerprint resistance.
- **Belt Clip Holster:** Custom-made to securely hold the phone with the case attached. The interior is lined with soft, non-abrasive micro-fiber material. The holster features a rotating ratchet clip that allows for 13 different locking positions.

Figure 2: The protective case detached from the belt clip holster, illustrating the two main components of the product.

Figure 3: A detailed view of the case and holster, highlighting their individual designs and the grid texture on the case.

Setup and Installation

1. Attaching the Protective Case:

Align the two hard shell pieces of the case with the front and back panels of your ZTE Cymbal 2 flip phone. Gently press them onto the phone until they snap securely into place. Ensure all cutouts align with the phone's buttons, ports, camera, and speaker.

2. Using the Belt Clip Holster:

With the case installed on your phone, slide the phone into the holster. The holster is designed to fit the collapsed phone, allowing for concealed and secure carrying. You can insert the phone either "face-inward" (screen protected) or "face-outward" depending on your preference.

Operating Instructions

- **Rotating the Belt Clip:** The ratchet clip on the holster can be rotated and locked into 13 different positions. To adjust the angle, simply rotate the clip to your desired orientation (e.g., vertical, horizontal) until it clicks into place. This allows for comfortable carrying on your belt, waistband, or other attachment points.

ROTATION

**Ratchet Clip Will
Turn/Lock in
Different Positions**

Figure 4: Illustration of the belt clip's 180-degree rotation capability, allowing for various carrying positions.

- **Enhanced Grip and Fingerprint Resistance:** The case features a ribbed grid pattern and a powder coating, which provides an enhanced tactile grip and resists fingerprints, keeping your case looking clean.

Figure 5: Close-up view of the case's grid texture, designed for enhanced grip and to prevent messy fingerprints.

- **Accessing Your Phone:** To answer a call or use your device, simply remove the phone from the holster. The holster acts as a secure holder, keeping your phone accessible at your side while freeing your pockets.
- **Phone Functionality with Case:** The case is designed to allow full functionality of your flip phone. You can still open and close the phone normally, access all buttons, charge the device, and use the camera and speaker without removing the case.

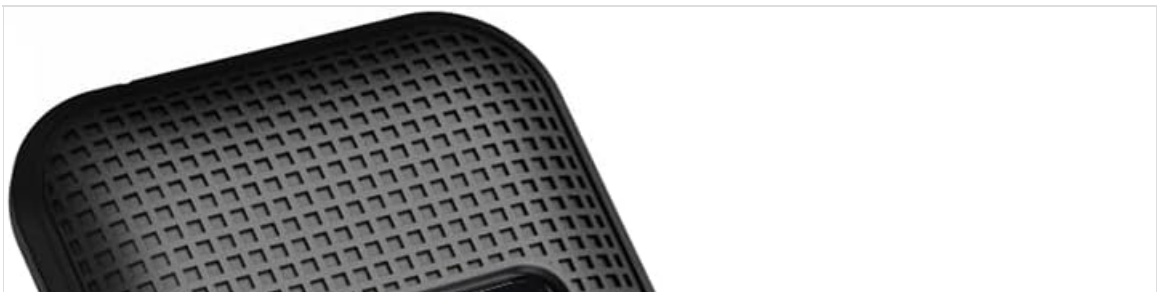

Figure 6: The ZTE Cymbal 2 flip phone with the protective case installed, shown in the open position, demonstrating full accessibility.

Figure 7: A hand holding the ZTE Cymbal 2 with the protective case, illustrating comfortable handling and the slim profile.

Maintenance

To ensure the longevity and appearance of your Nakedcellphone case and holster, follow these simple maintenance guidelines:

- **Cleaning the Case:** The case is made of rigid rubberized polycarbonate with a matte texture grid pattern designed to resist fingerprints. To clean, wipe with a soft, damp cloth. Avoid abrasive cleaners or solvents that may damage the finish.
- **Cleaning the Holster:** The holster's interior is lined with micro-fiber. Gently wipe the exterior with a soft, damp cloth. For the interior, a dry, soft brush can be used to remove dust or debris.
- **Storage:** When not in use, store the case and holster in a clean, dry environment away from direct sunlight or extreme temperatures.

Troubleshooting

If you encounter any issues with your Nakedcellphone Case with Clip, consider the following:

- **Case Not Snapping On:** Ensure you are using the correct model of phone (ZTE Cymbal 2, Cymbal U, Z2335CC, Telstra Flip 3, Z2335T, Z2335CA). Verify that no debris is obstructing the phone or case edges. Apply gentle, even pressure until both halves snap securely.
- **Phone Not Fitting in Holster:** Confirm the case is properly installed on the phone. The holster is custom-fit for the phone *with* the case. Ensure the phone is collapsed before inserting it into the holster.
- **Belt Clip Not Rotating Smoothly:** Check for any foreign objects or debris in the rotating mechanism. Ensure the clip is not bent or damaged.

If problems persist, please refer to the Support section for further assistance.
