

BoxWave LX9000

BoxWave ClearTouch Crystal Screen Protector User Manual

For LXNAV LX9000

1. INTRODUCTION

The BoxWave ClearTouch Crystal Screen Protector is designed to provide superior protection and maintain the visual clarity of your LXNAV LX9000 device's screen. This high-quality film shields your screen from scratches, dust, and minor impacts, ensuring a clear and vibrant viewing experience. This package includes two screen protectors, an applicator card, and a microfiber cleaning cloth for a complete installation.

2. SETUP AND INSTALLATION

Follow these steps carefully to ensure a smooth, bubble-free application of your ClearTouch Crystal screen protector.

1. **Prepare Your Workspace:** Choose a clean, dust-free environment. Wash your hands thoroughly to avoid transferring oils or dirt to the screen or protector.
2. **Clean the Device Screen:**
 - Use the included microfiber cleaning cloth to gently wipe down the LXNAV LX9000 screen. Ensure all dust, smudges, and fingerprints are removed.
 - If necessary, use a small piece of tape or the included dust-removing sticker to lift any stubborn dust particles.

The actual product is tailored specifically to fit your device

Image: The essential accessories for screen protector application, including an applicator card, a microfiber cleaning cloth, and a dust removing sticker.

3. **Align the Protector:** Carefully peel back a small portion of the protective layer (usually labeled "Step 1" or similar) from one end of the screen protector. Align the exposed edge of the screen protector with one edge of your device's screen. Take your time to ensure precise alignment with all cutouts (if any) and edges.
4. **Apply the Protector:** Once aligned, slowly and steadily peel back the rest of the protective layer while simultaneously applying the screen protector to the device's screen. Use the applicator card (squeegee) to gently push out any air bubbles as you go, working from the center outwards.
5. **Remove Remaining Bubbles:** If small bubbles remain, use the applicator card to push them towards the nearest edge. For stubborn bubbles, you can gently lift the nearest edge of the protector and reapply, pushing the bubble out.
6. **Final Touches:** Once the protector is fully applied and bubbles are removed, peel off the top protective layer (usually labeled "Step 2" or similar). The low-tack adhesive may take up to 48 hours to fully settle along the edges, and any initial tiny air bubbles typically clear with regular use.

3. USAGE AND BENEFITS

Once installed, your BoxWave ClearTouch Crystal screen protector provides continuous protection without

compromising the functionality or visual quality of your LXNAV LX9000.

- **High Transparency:** Enjoy up to 99% visual clarity, ensuring your device's display remains vibrant and true-to-color. The protector is designed to be almost invisible.
- **Enhanced Protection:** Shields your screen from daily scratches, scuffs, dust, and minor impacts, extending the lifespan of your device's display.
- **Smooth Touch Sensitivity:** The smooth, glass-like surface maintains the original touch sensitivity of your LXNAV LX9000, allowing for precise and responsive interactions.

4. MAINTENANCE

To keep your ClearTouch Crystal screen protector in optimal condition and ensure maximum clarity, follow these simple maintenance guidelines:

- **Regular Cleaning:** Use a soft, lint-free microfiber cloth (like the one provided) to gently wipe away dust, smudges, and fingerprints from the screen protector surface.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, alcohol, or ammonia-based solutions, as these can damage the protector's coating. A small amount of water on the microfiber cloth is usually sufficient for cleaning.
- **Gentle Handling:** While durable, avoid sharp objects or excessive force that could scratch or puncture the protector.

5. TROUBLESHOOTING

If you encounter any issues during or after the installation of your screen protector, refer to the following common problems and solutions:

Problem	Solution
Bubbles After Installation	Small bubbles often disappear within 24-48 hours as the adhesive settles. For larger bubbles, gently lift the nearest edge of the protector and use the applicator card to push the bubble out while reapplying. Ensure no dust is trapped underneath.
Dust Particles Trapped Underneath	Carefully lift the nearest corner of the screen protector. Use a dust-removing sticker or a piece of tape to gently dab and lift the dust particle from both the screen and the adhesive side of the protector. Reapply slowly.
Misalignment	If the protector is significantly misaligned, gently peel it off completely. Clean the screen again thoroughly and attempt reapplication, paying extra attention to initial alignment. The glueless adhesive allows for clean removal and reapplication.
Edges Not Sticking	Ensure the screen edges are clean and free of dust or oils. Apply gentle pressure with the applicator card along the edges. Allow up to 48 hours for the low-tack adhesive to fully bond.

6. SPECIFICATIONS

Feature	Detail
Brand	BoxWave
Model Compatibility	LXNAV LX9000
Material	Polyethylene Terephthalate (PET)
Screen Surface Description	Glossy
Number of Items	2 (Two-Pack)
