Professional Audio Mixer V8S Live Sound Card User Manual

Model: Vbestlife5ypxw8276e7762 | Brand: VBESTLIFE

INTRODUCTION

This manual provides comprehensive instructions for the Professional Audio Mixer, V8S Live Sound Card and Audio Interface Sound Board. This dual-channel multifunctional sound mixer kit is designed for various applications including webcast and outdoor activities. It features professional mixer adjustments, knob controls, and supports a range of sound effects and functions to enhance audio quality and user interaction.

SETUP GUIDE

Follow these steps to set up your V8S Live Sound Card for optimal performance.

Connections

- **Microphone Connection:** The mixer features dual microphone ports, allowing two individuals to use microphones simultaneously for enhanced interaction during live broadcasts.
- **Live Broadcast Output:** Utilize the dual live broadcast ports to stream to two different platforms concurrently.
- **Headset/Monitor Output:** Connect your headphones or monitoring device to the designated port for real-time audio monitoring.
- **Accompaniment Input:** Connect an external device (e.g., phone, tablet) via the accompaniment input for background music. The device supports Auxiliary connectivity.
- **Power Source:** The unit is battery powered. Ensure it is charged or connected to a power source via the USB port (5V/1A) for operation.

Bluetooth Pairing (for Wireless Accompaniment)

1. Turn on the sound card.
2. Activate Bluetooth on your mobile phone or device.
3. Search for the sound card's Bluetooth name (refer to device screen if available, or look for "V8S" or similar).
4. Select and pair. The Bluetooth indicator light will flash during pairing and remain steady after a successful connection.

OPERATING INSTRUCTIONS

This section details the functions of the various knobs and buttons on your V8S Live Sound Card.

Control Knobs

- **MIC:** Adjusts the microphone input volume.
- **TREBLE:** Controls the high-frequency sound output. Increasing treble makes the sound sharper.
- **BASS:** Controls the low-frequency sound output. Increasing bass makes the sound deeper.
- **BACKING TRACK:** Adjusts the volume of the background music or accompaniment.
- **RECORD:** Controls the recording volume level.
- **MONITOR:** Adjusts the volume for your monitoring headphones.
- **ECHO:** Controls the reverberation effect. Turning on reverb makes the sound fuller and more three-dimensional.

Function Buttons

The V8S sound card includes various buttons for quick access to sound effects and modes:

- **Warm-up Sound Effects:** Access 10 different warm-up sound effects to set the mood or transition between segments.
- **One-Key Mute:** Instantly mute all audio output.
- **Voice Changing Function:** Modify your voice with various effects.
- **Funny Sound Effects:** Trigger a selection of entertaining sound effects.
- **Smart Evasion Mode:** When activated, this mode automatically lowers the volume of background music when the host speaks and increases it when they stop speaking.
- **Primal Sound / Voice Over / Elimination:** Buttons for specific vocal effects or processing.

- **EMC / Pro / Pop / Karaoke:** Preset sound modes for different audio environments.
- **Cheer / Din / 9277 / Kiss / Gunshot / Internal Play / Yell / Laughter / PUBG / Awesome / Dindir** Specific sound effect triggers.

KEY FEATURES

Professional Reverb Adjustment and Knob Design

The V8S sound mixer is equipped with professional mixer adjustments and a user-friendly knob design. Activating the reverb function enriches the sound, making it fuller and more three-dimensional, ideal for various vocal and musical applications.

Multi-Functional Support

This DJ mixer supports 10 distinct warm-up sound effects and features a convenient one-key mute function. It also allows for precise reverberation adjustment, high and low bass tuning, and includes versatile voice changing and funny sound effects for creative expression.

Smart Evasion Mode

The sound mixer incorporates a smart evasion mode. When the primary speaker (host) begins to speak, the volume of the background accompaniment music automatically lowers. Conversely, when the host stops speaking, the music volume automatically increases, ensuring clear vocal prominence.

Clear and Stable Sound Quality

The integrated sound card significantly enhances audio clarity and stability, resulting in a more rounded and professional sound during live broadcasts. It optimizes voice output and offers multiple sound effects to create a beautiful and engaging audio experience.

Dual Port Design for Enhanced Interaction

Featuring a dual microphone port design, the mixer supports two individuals broadcasting live simultaneously, fostering greater interaction. Additionally, its dual live broadcast port design enables simultaneous streaming to two different platforms, expanding your reach.

Dual microphone port design, supports 2 people to live broadcast at the same time, more interactive.
Dual live broadcast port design, can broadcast 2 platforms at the same time.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your audio mixer.

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the mixer. Avoid using liquid cleaners or abrasive materials, which can damage the finish or internal components.
- **Storage:** Store the mixer in a cool, dry place away from direct sunlight, extreme temperatures, and high humidity.
- **Handling:** Handle the device with care. Avoid dropping it or subjecting it to strong impacts.
- **Connectivity:** When connecting or disconnecting cables, always grasp the plug, not the cable itself, to prevent damage to the connectors or ports.

TROUBLESHOOTING

This section addresses common issues you might encounter with your V8S Live Sound Card.

Problem	Possible Cause	Solution
No Sound Output	<ul style="list-style-type: none">◦ Volume knobs (MIC, MONITOR, ECHO) are too low.◦ Cables are not properly connected.◦ Mute function is activated.◦ External device (e.g., phone) volume is low.	<ul style="list-style-type: none">◦ Increase relevant volume knobs.◦ Check all cable connections (microphones, headphones, output).◦ Deactivate the one-key mute function.◦ Increase volume on connected devices.
Distorted Sound	<ul style="list-style-type: none">◦ Volume levels are too high (clipping).◦ Poor quality cables or connections.◦ Interference from other electronic devices.	<ul style="list-style-type: none">◦ Lower MIC, TREBLE, BASS, and ECHO levels.◦ Ensure all cables are securely connected and undamaged.◦ Move the mixer away from potential sources of interference.
Bluetooth Connection Issues	<ul style="list-style-type: none">◦ Mixer not in pairing mode.◦ Device too far from mixer.◦ Interference.	<ul style="list-style-type: none">◦ Ensure mixer is discoverable.◦ Keep devices within close range (typically 10 meters).◦ Restart both the mixer and the Bluetooth device.
