## TimeFlys 602989859763

# TimeFlys Digital Audio Baby Monitor Camry User Manual

Model: 602989859763

## INTRODUCTION

---

This manual provides comprehensive instructions for the safe and effective use of your TimeFlys Digital Audio Baby Monitor Camry. This device is designed to provide reliable audio monitoring of your baby, ensuring peace of mind through digital, interference-free technology and convenient features.

## PRODUCT COMPONENTS

---

Your TimeFlys Digital Audio Baby Monitor Camry system includes two main units and essential accessories:

- **Parent Unit:** The portable receiver unit with controls for volume, two-way talk, and night light. It features a rechargeable lithium battery.
- **Baby Unit:** The transmitter unit placed in the baby's room. It includes a microphone, speaker, and a night light. This unit requires continuous power via a USB connection.
- **USB Cables:** For powering and charging the units.
- **Lithium Rechargeable Battery:** Included for the Parent Unit.

---

### 1. Charge the Parent Unit:

Insert the included lithium rechargeable battery into the Parent Unit. Connect the Parent Unit to a power outlet using the provided USB cable and adapter. Allow it to charge fully before first use (approximately 20 hours of battery life).

### 2. Power the Baby Unit:

Place the Baby Unit in your baby's room, ensuring it is within 3 feet of the baby but out of reach. Connect the Baby Unit to a power outlet using its dedicated USB cable and adapter. The Baby Unit operates only when plugged in.

### 3. Positioning:

Ensure both units are placed on a flat, stable surface. Avoid placing them near other electronic devices that may cause interference. Maintain a clear line of sight between the units for optimal range, though the digital technology is designed to minimize interference.

### 4. Power On:

Press and hold the power button on both the Parent Unit and the Baby Unit until the indicator lights illuminate. The units should automatically link.

---

## OPERATING INSTRUCTIONS

### 1. Volume Control

Use the **Volume Up** and **Volume Down** buttons on the Parent Unit to adjust the listening level. The digital display will show the current volume setting.

### 2. Two-Way Talk Function

To speak to your baby through the Baby Unit, press and hold the **Talk** button on the Parent Unit. Release the button when you are finished speaking. This feature allows you to soothe your baby from another room.

Figure 3: Visual representation of the two-way talk feature, showing communication flow between the Parent Unit and the Baby Unit.

### 3. Night Light Control

The Baby Unit features a remote-controlled night light. Press the **Night Light** button on the Parent Unit to turn the night light on or off. This provides a soft glow in the baby's room without disturbing sleep.

Figure 4: The Baby Unit's night light providing illumination in a baby's crib, and the Parent Unit positioned near a sleeping parent.

#### 4. Alarms and Indicators

- **Low Battery Alarm:** The Parent Unit will emit an audible alert and display a low battery icon when its battery level is critically low. Recharge the unit promptly.
- **Out of Range Alarm:** If the Parent Unit loses connection with the Baby Unit, an audible alarm will sound, and an out-of-range indicator will appear. Move closer to the Baby Unit to re-establish connection. The monitor offers a range of up to 1000 feet in open areas.
- **Sound Alert:** The Parent Unit provides visual sound level indicators, allowing you to see the intensity of sounds from the baby's room even if the volume is low or muted.

#### MAINTENANCE

- **Cleaning:** Wipe both units with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Battery Care:** For optimal battery life, fully charge the Parent Unit before its first use and whenever the low battery

indicator appears. Avoid extreme temperatures.

- **Storage:** If storing the monitor for an extended period, ensure the Parent Unit's battery is fully charged and then remove it. Store units in a cool, dry place.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
No sound from Parent Unit.	Volume too low or muted. Units out of range.	Increase volume. Move Parent Unit closer to Baby Unit. Ensure both units are powered on.
Static or interference.	Other electronic devices nearby. Units too far apart.	Move units away from other electronics (e.g., Wi-Fi routers, cordless phones). Reduce distance between units.
Parent Unit not charging.	Charging cable or adapter faulty. Battery not inserted correctly.	Check cable and adapter connections. Ensure battery is properly seated. Try a different power outlet.
Baby Unit not powering on.	Not plugged into a power source. Power outlet issue.	Ensure Baby Unit is securely plugged into a working power outlet.

## SPECIFICATIONS

- **Brand:** TimeFlys
- **Model:** 602989859763
- **Technology:** Digital, Interference-Free (UHF)
- **Number of Channels:** 36
- **Frequency Range:** 400-470 MHz
- **Parent Unit Battery:** 1 Lithium Polymer (rechargeable, included)
- **Parent Unit Battery Life:** Up to 20 hours (average)
- **Baby Unit Power:** Micro USB connection (plug-in only)
- **Special Features:** Two-Way Talk, Remote-Controlled Night Light, Sound Alert, Low Battery Alarm, Out of Range Alarm, Zero Emission Night Mode
- **Range:** Up to 1000 feet (open field)
- **Color:** White
- **Dimensions (Parcel):** 19.2 x 10.8 x 5.2 cm
- **Weight (Parcel):** 290 g
