

BrickBling P34601-1

BrickBling LED Light Kit for Lego Death Star Trash Compactor (75339)

Instruction Manual

INTRODUCTION

Thank you for choosing the BrickBling LED Light Kit. This kit is designed to illuminate your Lego Death Star Trash Compactor (model 75339), enhancing its display with dynamic lighting. Please note that this product includes only the LED light kit; the Lego model itself is not included. This manual provides essential information for proper installation, operation, and maintenance of your light kit.

WHAT'S IN THE BOX

Upon receiving your BrickBling LED Light Kit, please verify that all components are present and undamaged. The package should contain the following items:

- LED decorative lights
- Expansion board
- USB cable
- Connecting cables
- Battery pack (Note: Batteries are not included and must be supplied separately)
- Other necessary parts for installation
- Online Instruction access (details provided with the kit)

All parts are individually bagged and then integrated into a new original box for protection.

SETUP INSTRUCTIONS

Careful installation is crucial for optimal performance and longevity of your light kit. Please follow these general guidelines and refer to the detailed online instructions provided with your purchase for specific step-by-step guidance.

1. **Prepare Your Lego Model:** Ensure your Lego Death Star Trash Compactor (75339) model is fully assembled and ready for light kit integration.

2. **Unpack Components:** Carefully remove all light kit components from their packaging.
3. **Connect Lights:** Following the online instructions, integrate the LED lights into your Lego model. Pay close attention to wire routing to avoid pinching or damaging the fragile wires. Do not over-pull, bend, or shake the wires during installation.
4. **Connect to Expansion Board:** Attach the light wires to the expansion board as directed in the online guide.
5. **Connect Power:** Connect the USB cable or battery pack to the expansion board. If using a battery pack, insert the required batteries (not included).
6. **Test Functionality:** Before finalizing the installation, test each lamp pellet to ensure it lights up correctly.

For detailed visual instructions, please refer to the online manual accessible via the QR code or link provided in your package.

OPERATING INSTRUCTIONS

The BrickBling LED Light Kit offers flexible power options to suit your display needs.

- **Power Supply:** The light kit can be powered via the provided USB cable or a battery pack.
- **USB Power:** Connect the USB cable to a power bank, a wall socket adapter, a computer, or any other USB power source. The recommended voltage for the power supply is less than 5V.
- **Battery Power:** If using the battery pack, ensure you have inserted the correct type and number of batteries (not included).

Once connected to a power source, the lights will illuminate, bringing your Lego model to life. For the Classic Version, there are no additional controls for light patterns or intensity. Other versions may feature light control modules, as demonstrated in the video below.

MAINTENANCE

To ensure the longevity and optimal performance of your BrickBling LED Light Kit, consider the following maintenance tips:

- **Handle with Care:** The light wires are delicate. Avoid excessive pulling, bending, or shaking, especially during cleaning or repositioning.
- **Cleaning:** Gently dust the lights and wires with a soft, dry cloth. Avoid using liquid cleaners directly on the electrical components.
- **Storage:** If disassembling for storage, carefully disconnect components and store them in a dry, safe place to prevent damage.

TROUBLESHOOTING

If you encounter any issues with your light kit, please refer to the following common troubleshooting steps:

- **Lights Not Illuminating:**
 - Check all connections to ensure they are secure between the lights, expansion board, and power source.
 - Verify that the USB power source is active or that the batteries in the battery pack are correctly inserted and have sufficient charge.
 - Ensure the recommended voltage of less than 5V is used for USB power.
- **Missing Parts or Damaged Components:**
 - Upon receiving the parcel, confirm if any parts are missing against the 'What's in the Box' section.
 - Test whether every lamp pellet can light up before full installation.
 - If you find any missing or damaged parts, please contact BrickBling customer support immediately.
- **Flickering Lights:**
 - Check for loose connections.
 - Ensure the power source is stable and providing adequate power.

For further assistance, please do not hesitate to contact BrickBling customer support.
